Great Adventures of the Duderstadts

The Millennium Project
The University of Michigan

Preface

This book of images began as an effort to provide a photographic record of over half-a-century of our family's trips, where we have gone and what we have seen, in part to rekindle our memories of these "grand adventures". It was created from an archive of almost one million photos, taken as hundreds of slides in the early years and later culled from hundreds of thousands of digital images arising from our travels after 2000.

To some extent, it has evolved from a book of travel memories to a pictorial record of the hundreds of experiences we have had together as a family. In this sense, then, it has actually become more of a personal device to stimulate once again those memories of the marvelous adventures, challenges, and stories arising from our many travels through our lives.
