This article was originally published with an incorrect version of Fig. 8 on p. 5298. AIP apologizes for this error; the correct version of Fig. 8 appears below. All online versions of the article have been corrected.

FIG. 8. Temperature dependence of the ratio of $\langle s_{seg}(t_{str}^{max}) \rangle$ and $\langle s(t_{str}^{max}) \rangle$. t_{str}^{max} is the peak time of $\langle s_{seg} \rangle$ and $\langle s \rangle$ at different temperatures. $T_{MCT} = 0.45$.
