

FLORAL IMAGES
SCANNED PIXELLIST ART OF
ALMA LACH

Images are scanned images of actual flowers (as opposed to scanned images of photographs of flowers). Because the scanner captures the image using a line of light (instead of a point of light as does a camera) it is possible to see a flower more as the binocular vision of our eyes see it.

FROM JURIED TAVERN CLUB (CHICAGO) DISPLAY
2004

Compiled by Sandra Lach Arlinghaus, from original files.
