

Supplemental Figure 2: Expression of inflammatory cytokines and APC markers in adipose tissue of lean and obese WT and KO mice.

WT and KO mice were fed HFD for 20 weeks. RNA was isolated from eWAT and gene expression was determined by RT-PCR. A: Relative expression of *Ccl2* (MCP-1), *Nos2* (iNOS), *Tnfa* (TNF α) and *Il10* (IL-10) in eWAT. B: Relative expression of *Il12p35*, *Il12p40*, and *Ifng* in eWAT. C: Relative expression of *H2ab1* (MHC Class II), *Cd80*, and *Cd86* in eWAT. Data are means \pm SEM. * $P < 0.05$. ** $P < 0.01$. # $P < 0.05$ vs ND-fed mice.
