SECTION 1
INTRODUCTION

Multidisciplinary Accident Investigation (MDAI) data reported on the Annotated Collision Performance and Injury Report (CPIR) were collected by in-depth U.S. and Canadian teams and automated by the University of Michigan Transportation Research Institute (UMTRI) from 1969 until 1978. UMTRI was formerly the Highway Safety Research Institute (HSRI). During that period, each NHTSA-sponsored MDAI case involving a passenger car, light truck, van, school bus, or large truck was assigned a unique DOT HS registration number by the Department of Transportation upon receipt of a completed accident investigation case. Those investigations sponsored by the Motor Vehicle Manufacturers Association or the Canadian Ministry of Transport are not listed by DOT HS number. Each case is an in-depth study of an accident describing all vehicles involved in the crash as well as the occupant kinematics and injuries sustained by all occupants of those vehicles.

After these case registration numbers (DOT HS numbers) were assigned, case summaries were reproduced and published in summary volumes for distribution. Each volume contains twenty to forty case summaries and carries a unique DOT HS volume number.

This document has been prepared as an attempt to assist in the search of case summary documentation as published in summary volumes.¹ No previous cross-reference is available. The full case hard copy for all cases listed is available from the Transportation Research Institute at the University of Michigan upon request.

¹In several instances two numbers have been assigned to the same case by the NHTSA. This is especially true of the PB Volume listing (summary volume 600 076) which duplicates many cases found in other volumes.

SECTION 2
NHTSA TEAM/CASE IDENTIFICATION

During the period 1968-1978, forty-four in-depth accident investigation teams collected data on the CPIR form and submitted to UMTRI their full case investigation narratives. Twenty-five of these teams were sponsored by the NHTSA and DOT HS numbers were assigned to their cases.

Throughout this period, teams used varying numbering systems for their case identifiers. Often a team would change its case designation system at the end of a year (beginning a new year with an entirely new method of numbering).

Table 1 presents the NHTSA team names and examples of each team's case numbering system for application in the use of this reference guide. As an example, when a user seeks to identify Indiana case number 2, he must know the year of the crash and identification of the vehicle involved as well, since Indiana has four number 2 cases (MCR 69-2, MCR 70-2, VDP 70-2 and SP 73-2). Assistance in determining which of the four is the sought-after case can be obtained by contacting UMTRI or by filtering the CPIR computer data for a specified vehicle type.

SECTION 3
DOT HS NUMBERED SUMMARY VOLUMES

Ranges of individual MDAI case DOT HS publication numbers are listed in Table 2 on the right. The corresponding DOT HS summary numbers are on the left in numerical order. Some volumes are listed more than once if individual cases are not in sequence or if individual case numbers are missing from the volume and found in earlier or later volumes.

The only summary volumes listed here are those containing numbered individual cases. Many additional volumes have been published containing MDAI cases, but since these additional volumes do not list their contents by DOT HS case number, they are not listed here.

Table 2
DOT HS NUMBERED SUMMARY VOLUMES

NOTE: Some cases in a given range do not appear in the volume specified.

SECTION 4
CASE LISTING BY PB NUMBER

The PB numbering system was used only for a short period of time and only one volume (600 076) is on record at UMTRI. Table 3 is a case listing by PB number. (There may be other volumes in existence.)

The majority of cases found in Volume 1, Number 1 (DOT HS 600 076) can be found in other volumes as listed in Section 6.

SECTION 5
CASE LISTING BY DOT HS NUMBER

Table 4 contains a case listing by DOT HS number. Team letters and report sequence number are listed in the left-hand column, and DOT HS numbers are listed in numerical order in the right-hand column. Users of this reference guide need only know a DOT HS number to be able to identify the team and case number (center column) by searching the right-hand column.

The report sequence numbers listed in the left column are those numbers assigned by UMTRI for use in the computerization of cases.

SECTION 6
CASE LISTING BY TEAM LETTERS

Users will most often know the team and case number for a particular crash they wish to access, read or analyze. The listing in this section, therefore, is probably the most useful tool available.

The first seven-character listing in Table 5 was created by UMTRI for computerization of the CPIR long form used by investigators of MDAI crashes. This seven-character code was necessitated by the fact that teams used various methods of identifying their cases over the ten-year period of performance. Some teams prefaced their case numbers with the year of the crash (68-02 Boston). Others set the year after the case number (02-68 Utah). Still others changed their format totally each year (Indiana and Miami). In the case of Stanford, there were three teams operating: Stanford Research Institute (1), Stanford Research Institute (2) and Stanford University. Tulane University began with a unique numbering system (TU 35G1070) and changed in 1971 to denote only year and case number (TU 71 2). Kentucky changed from a 321 series to a 766 series, and Calspan submitted cases under CAL A, CAL B and CAL.

In addition to the confusion in attempting to identify such cases for computerization, teams added confusion in their investigation of large truck and school bus accidents. Several teams began their numbering system with 1, 2, 3 for passenger cars, 1, 2, 3 for trucks, and 1, 2, 3 for school buses. With the development of the air cushion restraint system (ACRS), or airbag, teams began investigations of these vehicles involved in crashes, and yet another case series of 1, 2, 3 evolved.

UMTRI needed a unique computer ID for these cases and developed the following: the third digit of the team sequence number differentiated the type of vehicle. A school bus was indicated by a 7 (SC 75703), an air bag by an 8 (SC 75803), and a large truck by a 9 (SC 75903). With

this in mind, users of this reference guide may easily locate a specific case summary by the following method:

- 1) Determine team letters from Section 2.
- 2) Search Section 6 for exact team letters and specific case.
- 3) Locate DOT HS # for that case.
- 4) Locate case # in Section 3 to indicate Volume #.
- 5) Look up case summary in identified volume.

Table 5
Case Listing by Team Case Number

CASE NUMBER	TEAM CASE ID	DOT HS NUMBER
