Please tell me on a scale from 1 to 5, where 1 means not at all acceptable and 5 means very acceptable, how acceptable you feel each of the following is in order to get respondents to participate:

→ I went through the codebook ~~at~~ made changes in green. However, I'm not sure about the inap codes for: ^{B9a,} DIS, F4, F8, F13, F20, F24, H8b, H9, H15, DPS, K12

I've tried all afternoon to get in touch with coding (these are the vars they seemed to have changed without notifying me) to find out exactly what they did, but no one's answering phones. I'll send a msg with a request to reply by Mon a.m. I'll probably be in Mon afternoon, so can give you a definitive answer then.

→ Also, there are some minor discrepancies between variable names in the codebook vs dataset. I don't think they should matter, but if they do, we'll change the dataset.

→ Finally, our little campus thief returned today. He came marching into the main area, apparently thinking no one would be around, and looked quite surprised to see me. He took off pretty quick. I called DPS + they took a description, etc. Anyway, he doesn't seem too bright to be coming back so quickly.

I'll see you Mon or Tues.

CODING CONVENTIONS FOR THE 1996 DETROIT AREA STUDY

1. TIME BEGIN and TIME END are coded in military time.
2. If a range of numbers is given as a response, the upper value of the range is coded. If a Respondent gives a fraction, it is rounded in standard form (up for anything .5 or more).
3. If a question is coded '7-other' (or '97', '997', etc) the exact response given is noted in a separate notebook (the "other" notebook). The responses are arranged by log number and question number.
4. There is one open-ended question in this survey, question A19e. This question is not coded, but the responses are entered into a data file called:
't:\shared\das96\code96\A19e.doc'.
5. There are several files containing the information obtained from questions asking for precise locations of places the R visits. The files are all located in the
t:\shared\das96\code96 directory and are called: b8-xstrt.txt d13xstrt.txt h8-xstrt.txt
f1-xstrt.txt.
6. If a variable only has numeric responses, any inap responses will be coded 96 (or 996, etc.); all other inap responses are coded 0, 00, 000, etc.
7. Questions H5 and H7 were coded by the DAS coders up through log #1180. All other logged interviews were coded by the Fall 1996 DAS (Soc 513) students.
8. In Section X, questions X91, X12, X22 and X23 were not coded.

Resolutions to questions about coding sections A - E:

- 1) for cases in which a zero code can mean both inap and "none", we will code inap as 96. This applies to questions B4b and B10, among others. We need to go back through the questionnaires to resolve these discrepancies.
- 2) For question E7 (ethnicities), we will code UP TO 3 different ethnicities. I'll let the data entry people know we're doing this. Again, this means we need to go back and check the previously coded questionnaires for this problem.
- 3) For section D, if the R is separated (but not divorced), the questions about spouse's education should have been asked. If the questions were not asked, they should be coded as missing (9=NA). We have to go back and re-do #'s 1019, 1020, and 1048.
- 4) Log # 1061: question D12a should be coded as 7 'other' because we consider preschool and kindergarten distinct from each other.
- 5) ~~The definition of the code for "Franklin" will be changed to include both Franklin and Franklin Village. I'll relay this to Kathy.~~
- 6) ~~Log # 1126 -- we will code the city as separate from Macomb and Macomb Twp. This means we'll have to make a new code. Again, I'll talk to Kathy about how to do this.~~
- 7) We will use Jim Raymo's questionnaires for coding, so don't worry if there are discrepancies between his and Hoa's.

Holly, MI coded as Holly Twp, MI

Highland, MI coded as Highland Twp, MI

Novi, MI coded as Novi City, MI

CODING CONVENTIONS FOR THE 1996 DETROIT AREA STUDY

1. TIME BEGIN and TIME END are coded in military time.
2. If a range of numbers is given as a response, the upper value of the range is coded. If a Respondent gives a fraction, it is rounded in standard form (up for anything .5 or more).
3. If a question is coded '7-other' (or '97', '997', etc) the exact response given is noted in a separate notebook (the "other" notebook). The responses are arranged by log number and question number.
