A RESUME OF THE GRASSES OF THE REGION OF DOUGLAS LAKE AS
REPRESENTED IN PUBLICATIONS AND IN THE HERBARIUM OF THE
UNIVERSITY OF MICHIGAN BIOLOGICAL STATION, DOUGLAS LAKE,
MICHIGAN

June-August 1940

June-August 1941

I. Nomenclature used is that of Hitchcock: Manual of the Grasses
of the United States, 1935.

Unless otherwise indicated, all species are present in the herbarium and mentioned in Gates and Ehlers: An Annotated List of the Higher Plants of the Region of Douglas Lake, Mich., 1924 and additions thereto 1927 and 1931. If a species is listed by Gates and Ehlers, but is lacking in the herbarium it is marked *. If the species is present in the herbarium and is not mentioned by Gates and Ehlers, it is marked #.

II. Differences in nomenclature are given if they occur in Robinson and Fernald: Gray's New Manual of Botany, seventh edition, 1908 (indicated by the numeral 1.) or in the works of Gates and Ehlers (indicated by the numeral 2.)

IV. Species collected by W. Katz are indicated with an asterisk.
