## HEURISTIC RESEARCH Design, Methodology, and Applications

by **CLARK MOUSTAKAS**,  
*Center for Humanistic Studies, Detroit*

A first of its kind, **Heuristic Research** presents heuristic methodology as an organized and systematic form for investigating human experience. Moustakas clearly illustrates how heuristic concepts and processes form both the components of the research design and the basis for a methodology. The mechanics of how heuristic inquiry works in practice are discussed and, using a step-by-step approach, the actual process of conducting a human science investigation is thoroughly outlined. Moustakas carefully describes various applications of heuristic research, the phases of heuristic research, and how to analyze collected data. In addition, practical examples are provided to guide the reader through the research process.

Clearly written and well organized, **Heuristic Research** is certain to interest researchers and students in evaluation, psychology, social psychology, gender studies, gerontology, family studies, and sociology.

*"The book is well organized and the content is comprehensive. I believe this book could become a classic."*

—Michael Quinn Patton, *University of Minnesota*

*"A gem. . . . It is most definitely a work of major significance both historically and methodologically."*

—Mike Arons, *West Georgia College*
