Erratum published online 21 July 2008 in Wiley InterScience (www.interscience.wiley.com).

DOI: 10.1002/jbm.a.32162

The article listed above, published in *J Biomed Mater Res* 2008;85A(1):145–156. The authors have brought to our attention an error in the figure legend for Figure 5E (the mRNA gel image). The correct version for Figure 5E should be: (E) Osteogenic differentiation was also assessed at the genetic level using reverse-transcriptase PCR. Osteocalcin mRNA levels were upregulated in samples cultured in the presence of osteogenic supplements (lane 3 [day 14]), as compared to samples cultured in media only (lane 1 [day 3] and 2 [day 14]). We regret any confusion caused by this error.
