A Guide for ORCID (Open Researcher and Contributor ID)

Merle Rosenzweig, Taubman Health Sciences Library, University of Michigan

Open Researcher and Contributor ID (ORCID)

This guide will walk you through ORCID. It will provide information about ORCID, its purpose, and how to register and use it to distinguish you, your research and your publications. To access ORCID, visit ORCID.ORG

Last Updated: Nov 11, 2013 | URL: http://guides.lib.umich.edu/ORCID

What is ORCID?

What is ORCID?

- An open, non-profit, community-based effort to create and maintain a registry of unique research identifiers and a transparent method of linking research activities and outputs to these identifiers
- ORCID provides a standard unique author identifier that distinguishes you from every other researcher and, through integration in key research workflows such as manuscript and grant submission, supports automated linkages between you and your professional activities ensuring that your work is recognized
- ORCID Registry aims to prevent authorship confusion
- Some publishers will require an ORCID ID in the ScienCV platform, for linking researchers, their grants and their scientific output
- To create your own ORCID ID, simply go to the ORCID website—http://orcid.org/—and register

Mission Statement

ORCID aims to solve the name ambiguity problem in research and scholarly communications by creating a central registry of unique identifiers for individual researchers and an open and transparent linking mechanism between ORCID and other current researcher ID schemes. These identifiers, and the relationships among them, can be linked to the researcher's output to enhance the scientific discovery process and to improve the efficiency of research funding and collaboration within the research community.
