SEE REMARKS

This dental chart is very important and should be filled in with great care. There are 32 teeth to be accounted for, as shown by the numbers on the chart. Beginning at the middle line in both upper and lower jaws, the teeth are arranged symmetrically on either side and classed as incisors (cutting teeth), cuspids or canines (tearing teeth), bicuspids (chewing teeth), and molars (principal chewing teeth). An examination should be made and findings charted to cover the following basic conditions: Lost teeth, crowned teeth, bridge work, fillings, caries (cavities of decay), dentures (plates), and any deformity of jaws found. See reverse side for illustrations.

1. Posthumously missing, L 16.
2. Spaces L 3-4: 1 mm
3. Unruptured before death R 16. Large L 16 socket indicates this tooth was unruptured before death.
4. The maxilla and mandible here charted were matched and charted together for the following reasons:
 - similarity in size, shape, color and wear of teeth, also
 - correct occlusion.
5. There were one separate maxilla and two separate mandibles found with this case LF-3173 A with no definite evidence that any of these belonged to this case, but might belong to any one case of the series LF-3173 A-I.
6. Medium sized ivory colored teeth in good alignment. No fillings. Brown stains.

JUN 8 1945

Dear Mrs. Greuter:

I am inclosing a check for \$28.25, representing funds of your husband, Staff Sergeant Jennings C. Greuter.

No other property belonging to him has been received at the Army Effects Bureau to date.

My action in forwarding these funds does not, of itself, vest title in you. The money is transmitted in order that you may safely keep it on behalf of the owner, pending his return. In the event he later is reported as a casualty, the funds should be distributed according to the laws of the state of his legal residence. I sincerely hope that such distribution will not be necessary.

Please acknowledge receipt of the check by signing one copy of this letter in the space provided below and returning that copy to this Bureau. For your convenience, there is inclosed an addressed envelope which needs no postage.

All War Department agencies have instructions to forward the personal effects of military personnel to this Bureau for disposition. Money, as a rule, is converted to a check and sent, by mail, in advance of other property. Any of his property received here will be forwarded promptly. Therefore, I ask that you please notify this Bureau in the event of a change in your address.

Yours very truly,

A. G. SCHUMACHER

SEE REMARKS

This dental chart is very important and should be filled in with great care. There are 32 teeth to be accounted for, as shown by the numbers on the chart. Beginning at the middle line in both upper and lower jaws, the teeth are arranged symmetrically on either side and classed as incisors (cutting teeth), cuspids or canines (tearing teeth), bicuspid (chewing teeth), and molars (principal chewing teeth). An examination should be made and findings charted to cover the following basic conditions: Lost teeth, crowned teeth, bridge work, fillings, caries (cavities of decay), dentures (plates), and any deformity of jaws found. See reverse side for illustrations.
