

Data Supplement 1: Survey

What is the length of your program? __3 years ____4 years

Does your institution currently have an official, institution-wide policy dictating remediation and/or probation policy? __ yes ___no

Once a resident has been identified as needing some form of remediation/probation, the program must decide in what way to document this status and who will see it. When you or your program places a resident on each level of remediation/probation below for MEDICAL KNOWLEDGE based reasons, please check the appropriate boxes describing what that status entails. (Check all that apply on each line)

	Informal Remediation	Formal Remediation	Informal Probation	Formal Probation
Generate a letter to put into that resident’s personal official residency file stating that this status has been initiated				
Generate a letter to put into the resident’s non-official residency file stating that this status has been initiated. (This file will not exist after the resident graduates)				
Do not generate a letter to put into any of the resident’s files stating that this status has been initiated				
Notify the GME office/committee that this status has been initiated				
Do not notify the GME office/committee that this status has been initiated				
Inform the faculty that this status has been initiated				
Do not inform the faculty that this status has been initiated				
Limit the resident's clinical privileges. (Please specify below)				
Do not limit the resident's clinical privileges				
This status does not exist in my program
