

*Editorial*ANNOUNCING *CRITICAL PERSPECTIVES*

The following manuscript represents a new category of papers in *Environmental Toxicology and Chemistry (ET&C)*—a category that reflects the growing complexity of the nature of environmental research and risk assessment. *Critical Perspectives* will present in-depth, detailed analysis of a current scientific issue of national and international importance, while also offering the authors' own perspectives on the subject. We expect and hope that *Critical Perspectives* will inspire letters to the editor in response, stimulating healthy debate that can deepen scientific understanding within the environmental

toxicology and chemistry and ecological risk assessment communities.

If you are interested in submitting a letter to the editor in response to a *Critical Perspectives*, please contact *ET&C* at etc@setac.org.
