Self-Assessment ••• **iTeam**

We developed a **personal self-assessment survey** that students can complete **before their engagement experience**. The survey aims to provide students with a better understanding of their **current knowledge**, make visible their specific **knowledge gaps**, and provide **supportive resources** related to both.

I have the knowledge and skills to speak the language of the place that I am going.

Agree    Disagree

I have looked into UM resources and feel confident in using those resources to better my preparedness for this experience.

Agree    Disagree

I know how I am going to document my experience for personal gain as well as to share with other.

Agree    Disagree

Students answer a set of questions measuring their **knowledge**, **experience**, **attitudes**, and **confidence** around specific topics related to their upcoming engagement experience.

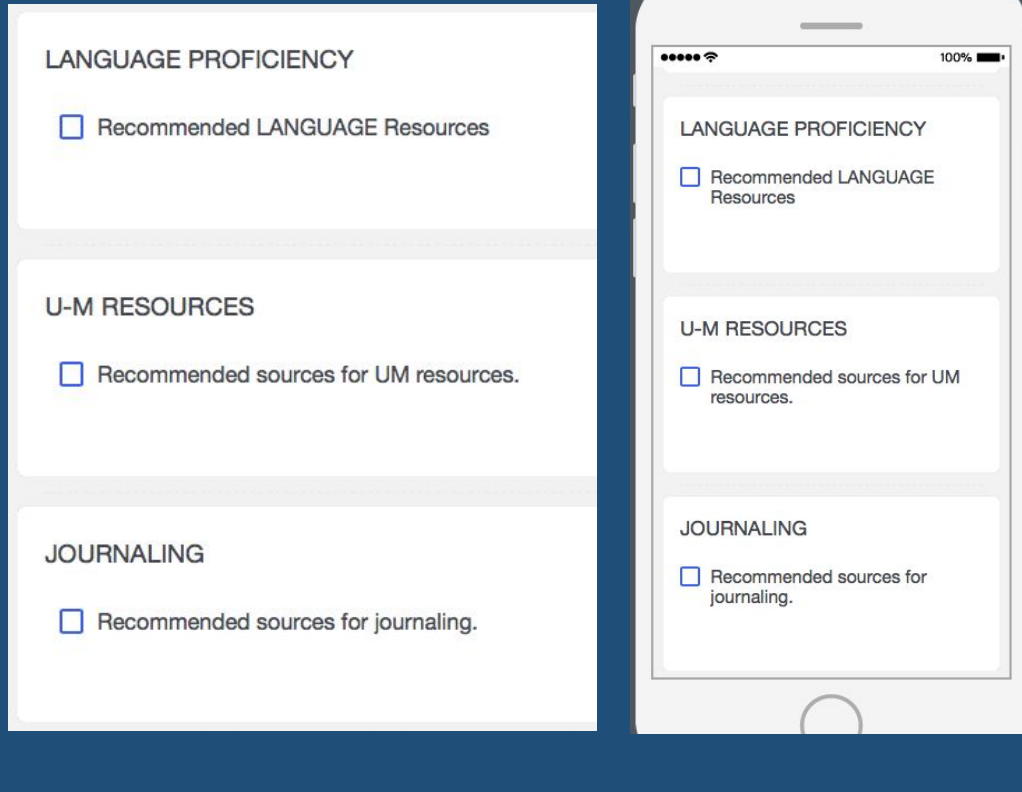

Taking study abroad as an example, we developed 12 **agree / disagree statements** (left) & 3 **open-ended questions** (below), using Qualtrics to prototype the survey as a web form.

What are 2 to 3 things you want to gain from your experience?

How will these outcomes inform or prepare you for your future plans?

How do you want the community to remember you?  
What do you want your legacy to be?

## Results for Study Abroad

*Upon completion of the survey, students receive **an email of recommended resources** to help them build on their strengths and address their knowledge gaps. The email contains **a personalized set of resources** depending on how the student responded to the survey, which they can **refer back to** throughout their engagement experience.*

*“I would have loved to have **heard from other U-M students** prior to going abroad. I would have **trusted their advice.**”*

Personal Legacy ••• **iTeam**

The image displays three overlapping screenshots of a web form from the University of Michigan. Each screenshot features the yellow 'M' logo and the text 'UNIVERSITY OF MICHIGAN' at the top. The first screenshot asks 'What did you do?' and has a text input field. The second screenshot asks 'What impact did the experience have on you, and what impact did you have on others?' and has a text input field. The third screenshot asks 'What do you wish you knew beforehand?' and has a larger text input field with a dark blue button containing '>>' at the bottom right.

*As a **post-engagement** complement to the self-assessment, students will also be prompted to leave a **personal legacy** in order to **pass on their institutional knowledge** and help the students who come after them. We built a web form that enables them to build **a legacy narrative** using several **universal prompts**.*
