Welcome

This project showcases the European travels of Asa Gray—the first professor at the University of Michigan and the founder of the school’s library collection. Interactive maps and narrative text will transport readers to the early 19th century, when the United States was still in its infancy and newly established states—such as Michigan—wished to found institutions of higher education. In addition to Gray’s journey, this website also highlights the books he and his literary agent purchased in Europe. The Board of Regents appropriated 5,000 dollars for Gray to spend on books while in Europe. Moreover, the selections of Gray and Putnam number approximately 3,400 volumes [1]. Readers can trace the lifecycle of these volumes, beginning in cities like Cambridge, London, Paris and Geneva and ending in Ann Arbor, Michigan. A virtual bookshelf further enables viewers to see a sample of works available in U-M’s Special Collections Library.

As Asa Gray's biographer, A. Hunter Dupree, writes, “Gray's educational philosophy was fundamentally a simple desire for more and better science at all levels of schooling” and that Gray had made clear these convictions in his meetings with the U-M Regents [2]. Thus, the Board of Regent’s choice to hire Professor Gray underscores the attitudes of the University’s founders; to create a “modern” institution, the University of Michigan would have to do away with tradition in lieu of innovation.

Asa Gray’s European Voyage

In 1838, Asa Gray was appointed the first professor of the University of Michigan. At this time, the University was transitioning from a secondary school in Detroit to an institution of higher education in the growing village of Ann Arbor. For this reason, the Board of Regents tasked Gray with collecting a foundational library while abroad in Europe. Gray, who wished to spend a year abroad for his own botanical research, willingly accepted this task [1].

In addition to his task of book acquisition, Gray was to visit the leading institutions of Europe and to generate a “report” about these findings [2]. Thus, university visits play a significant part of his European tour.

In the winter of 1838, Professor Asa Gray left for his year abroad in Europe. While in Europe, he visited prestigious universities and introduced himself to the European scientific community. He also bought books per his arrangement with the University of Michigan: a year-long sabbatical in exchange for a collegiate library [1]. Moreover, this interactive feature puts Gray’s thoughts and observations into a spatial context, enabling viewers to imagine themselves as European tourists in 1838-1839.

Clicking the image above launches a “Story Map” tracing Gray’s movement throughout Europe.

Journey of the Books

Like Professor Gray, his and George Palmer Putnam’s book purchases also moved throughout Europe. While many—if not most—of these books were printed, published and sold in London, others came from locales such as Oxford and Paris. A few titles were even originally published in the United States. The image above links to a “Story Map” that traces the movement of books in the Gray Collection. However, this is only a sample of books that moved around the University of Michigan’s campus after arriving in Ann Arbor. This map is especially useful in gauging how the University of Michigan’s Library System has changed; whereas small departmental libraries once served the University, students now rely on a large, centralized library to find and use materials.

About

This research project was authored by Eric Morgel as part of the Michigan Library Scholars summer internship at the University of Michigan Library.

This project was made using a WordPress Template hosted by U-M College of Literature, Science and the Arts and features bookshelf and timeline plugins. The interactive maps were made using Story Maps by ArcGIS.

Evyn Kropf and Kate Hutchens of the U-M Special Collections Library provided assistance and mentorship throughout the completion of the project.

The author would also like to thank Rashelle Nagar, University Library Associate 2014-2016, for notifying him about Russell E. Bidlack’s dissertation and for sharing her prior research.

The author wishes to dedicate this project to Russell E. Bidlack, without whose scholarship this project would not have been possible.

Russell E. Bidlack
1920-2003

Dean, School of Library Science
1969-1985

In recognition of his many contributions to our understanding of Ann Arbor history

Presented by the Ann Arbor Historical Foundation
