On behalf of the authors and readers of Reviews of Geophysics, AGU, and the broader scientific community, the editors would like to sincerely thank those who reviewed manuscripts for the Reviews of Geophysics in 2015. The hours reading and commenting on the comprehensive review papers not only improves the manuscripts themselves, but it also increases the scientific rigor of future research in the field. Chidong Zhang (University of Miami) went beyond and reviewed three manuscripts for our journal, and those indicated in italics reviewed two manuscripts. The refereeing contributions you made contributed to 78 individual reviews of over 30 submitted manuscripts. Thank you again. We look forward to a 2016 of exciting advances in the field and communicating those advances to our community and to the broader public.
