Env Organic Chem This course focuses on the behavior and transformation of anthropogenic chemicals in the environment. Specific topics will include sorption, volatilization, air-water exchange, and transformation processes (e.g., hydrolysis, photolysis, redox, etc.). Throughout the course, predictive tools for the fate and transport of chemicals in the environment will be developed using chemical molecular properties.

Electrical Engr & Computer Sci

Electrical Engineering And Computer Science (EECS)

IT IS CRITICAL THAT STUDENTS ATTEND CLASSES FROM THE BEGINNING OF THE TERM. EVEN THOUGH STUDENTS MAY BE REGISTERED OFFICIALLY FOR A COURSE, THE ELECTRICAL ENGINEERING AND COMPUTER SCIENCE DEPARTMENT MAY GIVE AWAY A STUDENT'S PLACE IN A CLASS IF THEY DO NOT ATTEND THE FIRST WEEK OF LECTURES AND LABS/DISCUSSIONS (AS APPROPRIATE) FOR ANY EECS COURSES. AT THE SAME TIME, THE EECS DEPARTMENT IS NOT OBLIGATED TO WITHDRAW STUDENTS OFFICIALLY FROM THE COURSE, EVEN THOUGH THE STUDENT HAS BEEN INFORMED THAT HIS/HER PLACE IN A COURSE HAS BEEN TAKEN AWAY. STUDENTS ARE RESPONSIBLE FOR THE ACCURACY OF THEIR SCHEDULES AND MUST BE SURE THAT ALL DROPS ARE PROCESSED THROUGH THE REGISTRATION SYSTEM DURING THE NORMAL DROP/ADD PERIOD.

Design Process Models							
Design Process Models --- Interaction and coordination of decisions based on multi-discipline design analyses is studied in the context of a newly developed artifact. Innovation and creativity are addressed as elements of the design process. Enterprise design decisions made on functionality and business criteria are analyzed within organizational, cultural and social models. Students propose and test novel analysis methods and design process models. Advisory prerequisite: DESCI 501 or Permission of Instructor

Section 005: This section will combine typical discussion activities with "field trips" where we will get the opportunity to see, up close and personal, several museum exhibits, library collections, and research projects, all at U-M, that relate to the fields of study on which "Zoom" draws. Tours will include the Detroit Observatory, the Museum of Paleontology and the Museum of Anthropology (including research labs), the Kelsey Museum of Archaeology, the Bentley Historical Library, and the William L. Clements Library. Students interested in this section MUST also enroll in UC 300.001 scheduled for Thursdays 2:00-3:00, forming a single two-hour block. Permission to register for HIST 238.005 and the UC 300.001 sections will be issued together. (See UC 300.001 listing for more details.) Students wishing to register should contact Sheila at sheilaw@umich.edu with their UMID for an override.

Statistics (STATS)

---IT IS CRITICAL THAT STUDENTS ATTEND CLASSES FROM THE BEGINNING OF THE TERM. EVEN THOUGH STUDENTS MAY BE REGISTERED OFFICIALLY FOR A COURSE, THE DEPARTMENT MAY GIVE AWAY PLACES IN A COURSE IF STUDENTS DO NOT ATTEND THE FIRST TWO COURSE MEETINGS. ---ALL STUDENTS MUST TAKE ACTION THROUGH THE REGISTRATION SYSTEM TO MAKE SURE THAT THEIR OFFICIAL SCHEDULE OF COURSES MATCHES THE COURSES THEY ARE ATTENDING.

This class is for beginning students to experience modern dance through the craft of choreography. We will explore the elements of dance composition--space, time, dynamic, and motivation-- through movement studies, improvisations, readings, discussions, performance viewings, and brief written assignments. The course will culminate in an informal concert for which the students will prepare final studies to perform for their peers. Students must currently have dance (Modern, Ballet, Jazz) experiences.

Drawing In & Around Florence

Course Description This class will be conducted in Florence Italy this spring, from June 27th to July 27th. A select group of students from the School of Art & Design will be traveling and working in the museums, piazzas and streets of Florence Italy. Florence is home to some of the world's greatest works of art. We will visit and work in the Uffizi Galleries, the Accademia, the Pitti Palace and Gardens and the Bargello museum just to name a few. We will be using the facilities of SACI (Studio Art Centers International) who will make available their apartments, studio's and courses in addition to the course offered by the Penny W. Stamps School of Art & Design. This course will focus on the techniques and methods related to drawing in an urban environment. The student will draw on location examining various ways of representing constructed space. We will begin our preparation for this course this semester in Ann Arbor. The students will be assigned drawings that will prepare them for the rigors of drawing on site in Florence Italy. We will complete our work in Florence this spring.

Tanzania - Improved Cook Stove

Course Description Traditional cooking methods in Sub-Saharan Africa are typically inefficient. Basic, hand built cook stoves can reduce firewood use by 50% improving forest health and reducing girl chores. Eco-Explorers will meet once a week during winter term in preparation for a 3 week June Design Build trip in Tanzania. Language and cultural preparation, test stove design build and design process documentation will be completed prior to the field component. The June trip will include a study tour to major wildlife park areas of Tanzania, a project site visit to a Peace Corps Volunteer and 2 weeks living with Masai families during the design / build process. Enrollment by application / permission of instructor.

Rethinking the Power of Art

Course Description This course will explore the nature and perception of physical and mental disability in our society and the role that art can play in improving the lives of individuals. We will examine numerous issues through classroom lectures and workshops, and will gain greater understanding of work and education opportunities for people with disabilities through fieldtrips (Detroit, Ann Arbor Center for Independent Living, Work Skills Corporation). The early part of this course during the winter term in Ann Arbor will lay the groundwork for the second part of the course, a one-month trip to Japan for field studies.

Impossible Worlds: Visual Effe

Course Description In the last ten years, the power and relatively low cost of desktop digital media tools has completely changed the nature of independent film and video. With a desktop program like Final Cut Studio, Cinema 4D, or Adobe After Effects, it is possible to completely alter the nature of cinematographic ?reality,? creating alternate physics, expressionistic color palettes, mythic utopias/dystopias, and impossible visual effects. This course explores the creative possibilities of digital manipulating the moving image. Through direct instruction and collaborative projects, students learn the essential techniques of modern visual effects: greenscreen, virtual sets, motion tracking, and digital compositing. They are then challenged to create their own ?impossible worlds,? using the high-end tools available in the University?s Duderstadt Center. Seats are reserved for A&D, SAC and PAT students. Others by permission of instructor.

What does this mean to you? --as readers and as makers? We'll make different forms of ""books"", some where parts are separated by space; a title here --or part of a title, and the rest blocks or even miles away! We'll explore what happens as outcomes of separation. Of course, these books will be ""about"" something, and that ""something"" will be determined in class. **This course is open to all undergraduates.

Book Arts

Course Description In this course, students explore their ideas through traditional and alternative bookmaking methods and discover how content can inform the structure of a book. Projects introduce basic materials - paper, book cloth, binder's board, PH neutral adhesives - and techniques - folding, gluing, and sewing - of bookbinding. Students also explore the significance of the book as a means of distribution and display. Students gain an understanding of basic bookbinding techniques and the tools and materials necessary to create handmade books. Traditional book arts techniques and the many ways in which contemporary artists have expanded upon them will be explored. Craftsmanship is important and so are ideas. Course Description In this class we explore the growth, development and significance of the artistic imagination in childhood. It is a studio class with a hefty amount of readings from literature, philosophy, psychology and art education. A core idea is that childhood remains with us throughout our lives; that the imaginative and expressive capacities formed in childhood are resources in later years. This class is meant for anyone interested in these ideas as well as for people who work with children and youth, and people who are interested in pursuing work as teachers, art therapists, social workers and community-based activists. Writing in art, writing as art

Course Description Written texts have often found their way into contemporary art, from Dada's found-text collages, through Conceptual Art's instructive texts, Jenny Holzer's site-specific text, and Joseph Kosuth's curatorial

essays as art. It's also a frequent site of crossover with graphic design, with a long tradition of makers writing and designing their own texts. But we often don't have a way to address writing as part of a studio practice, and to hold it up to the same critical examination as visual and physical art. In this class, we will do just that: explore strategies and models for writing as a part of art and design. Students will both write texts and present them as art experiences, visually and physically--books, wall texts, installations, and other. These texts might be fiction, non-fiction, or critical writing. The goal is to strengthen both the quality of writing and the relationship between the writing and its presentation in an art/design context. **Five seats are reserved for non A&D undergraduates.

They will have five assignments to investigate and portray views of a biological subject (mammal, fish, amphibian, reptile, insect, or bird from a museum). They will observe, measure, document, and depict their subject. The course will blend image making skills (drawing and digital) and concept development. Students will visit labs and museums around the University to see and use various imaging technologies and then produce their own drawings, images, objects, and representations to depict their subjects and to explain their subjects. Painting, Lenses & the Spect

Course Description Artists from the Renaissance to the present have relied on optical devices to assist them in the perception and representation of the external world. Students will explore historical developments in drawing aids and the simultaneous social and cultural engagement of presenting the natural world as a spectacle. The course will introduce a variety of lenses and optical devices such as the Camera Obscura, Camera Lucida, Claude glass, Magic Lantern, projectors, cameras and digital media to assist our depiction of landscape and nature and their potential in image making. The course will be centered on optical technologies, mediated reality and their interaction with the medium of painting. Course Description This course brings together students, faculty, and staff from a variety of backgrounds to collaboratively produce a 3D animated short film. It is the second of a two course sequence and focuses on the second half of the 3D production pipeline (animation, rendering, and post-production (the first semester focuses on concept art and asset development). Ultimately, our aim is to submit the finished short to film festivals during the summer of 2013. A blended learning and production environment will be maintained to support individual skill development and collaborative work. The film will be produced in stereoscopic 3D and with the expert guidance of the UM3D Lab consultants and artists. In the Classroom Course Description Connecting A&D students with fourth graders at the Bennett elementary school in Detroit through semester long art projects, this class is a combination of work with the children and contextual studies that address issues of urban schools and the radical transformation creative projects have on cognitive development. Working intensively in Detroit every week, students learn first hand some of the city's history and contemporary culture with field visits and projects. Planning for and reflecting on class projects, students develop close ties with the children and produce vibrant art that transforms the physical nature of the schools, and shared experiences across generations and cultures that transform the nature of connected creative work. **Five seats are reserved for non A&D undergraduates. ** Meeting times include travel to and from Detroit.

This course focuses on building knowledge of the basic tools of oil painting in order to intelligently create this engagement. Through a series of paintings from observation as well as from imagination, students investigate the potential of color, surface, mark, and form to create spaces and movement that refer to the external world as well as those that are unique to the pictorial plane. Students who anticipate enrolling in more advanced painting classes are encouraged to begin here, as this course prepares students for more advanced topics, and may serve as a prerequisite for some advanced courses.

27601	P RW LAB 001	MW	6-9PM	ARR	Kumao		
	Course Description In the current era of information overload, artists and designers can play a critical role in processing abstract data, facts, news, scientific research, into intelligible visual, time-based narratives. The art of storytelling is currently enjoying a cultural renaissance and is key to the creation of the media we consume everyday. From advertisements, political campaigns, and radio programs such as ?This American Life? and ?Storycorps,? to data visualizations, documentary film, and infomercials, the underlying story is what engages and affects us. Starting with the basics of storytelling, students will experiment with different ways images can be shaped into a narrative and will visually translate abstract concepts into short image sequences (animation, video, slide show, lecture, movie, performance, 30 sec - 2 min.). Contemporary examples of this might include: ?The Story of Stuff,? Annie Leonard?s pictorial guide to the western world?s waste, ?An Inconvenient Truth,? Al Gore?s visual analysis of climate change, and Paul Zaloom?s ?My Civilization,? a performative lecture (with props) about the history of the world. Students will learn a range of approaches to effective storytelling and visual communication through the irreverent use of graphics, diagrams, photos, movies, texts, sounds and other found materials. Tools to be implemented for these tasks include: Adobe After Effects (motion graphics), Final Cut Pro (video and audio), PowerPoint/Keynote, Excel, Photoshop, and Illustrator.

Experiments in Video Course Description In this interdisciplinary ?meet together? course between Art & Design and Architecture, students will creatively represent spatio-temporal ideas using video as the generative medium. To this end, students will begin by conducting experiments using high-end, fully manual video cameras and the editing software Final Cut Pro X and After Effects. Emphasis will be placed on light as a medium for sculpting space and on video as a means for heightening a spectator?s awareness of space and time. Applying split screens, green screens, advanced lighting and projections to ?objects-as-screens? each student will ultimately design and execute an independent project that challenges mainstream manners of viewing video. Artists and designers with thesis projects involving video may find this a useful compliment to their studio work. Prerequisite: TMP Time or permission of the instructor.

Course Description In this course sponsored by ArtsEngine, students explore the creative process through a structured sequence of exercises in four studio modules: sound, motion, visual images/objects, and verbal/symbolic language. Faculty from Art & Design (Elona Van Gent); Music, Theatre & Dance (Amy Chavasse); Architecture (Gregory Saldana); and Engineering (Herbert Winful) introduce a variety of creative strategies for generating problem solving ideas through hands-on projects. Weekly colloquia (Stephen Rush), discussions, and readings supplement projects. Grading is based upon attendance, class participation, a journal, four mini-projects, evidence of intellectual and creative process development, and a final culminating project. This course is appropriate for UM undergraduate students at all levels and in all disciplines. It is a fast paced, information-rich educational experience, offering insights that will make creativity and innovation an integral part of life and work.
