This is a year-long, 3-credit workshop in which students select a research question, choose an appropriate dataset, undertake analyses, write (and rewrite!) a paper, and present results in a workshop. Students enrolled in this class are required to attend (and present in) the Causal Inference in Education Research Seminar (CIERS), which meets every other week during this time slot in fall and winter. We will arrange additional meetings according to students' schedules, with the net result that we will meet once (and occasionally twice) per week throughout the academic year. Prereq: B- or above in EDUC 794, EDUC 795 or PubPol 639 (or equivalent, with permission)

Microbial soft matter							
The aim of the course is to provide students with the skills to understand, analyze, and interpret research and technologies associated with bacterial biofilms that they are likely to encounter in research or industry. Research and engineering in this area cuts across the disciplines of physical sciences and engineering and microbiology because biofilms are both a living ecosystem as well as a soft, elastic material. Designed to be valuable to both engineers and biologists, this course will emphasize issues that relate to biofilm formation and persistence in flowing natural, health-related, and industrial systems; the microbiology associated with these problems, and the design and use of experimental equipment to study these issues. The course will begin with about six weeks covering the fundamentals of relevant microbiology, fluid dynamics, kinetics, adhesion, and materials science with attention to bringing class participants from multiple disciplines into a common understanding of the material.

Electrical Engr & Computer Sci

Electrical Engineering And Computer Science (EECS)

IT IS CRITICAL THAT STUDENTS ATTEND CLASSES FROM THE BEGINNING OF THE TERM. EVEN THOUGH STUDENTS MAY BE REGISTERED OFFICIALLY FOR A COURSE, THE ELECTRICAL ENGINEERING AND COMPUTER SCIENCE DEPARTMENT MAY GIVE AWAY A STUDENT'S PLACE IN A CLASS IF THEY DO NOT ATTEND THE FIRST WEEK OF LECTURES AND LABS/DISCUSSIONS (AS APPROPRIATE) FOR ANY EECS COURSES. AT THE SAME TIME, THE EECS DEPARTMENT IS NOT OBLIGATED TO WITHDRAW STUDENTS OFFICIALLY FROM THE COURSE, EVEN THOUGH THE STUDENT HAS BEEN INFORMED THAT HIS/HER PLACE IN A COURSE HAS BEEN TAKEN AWAY. STUDENTS ARE RESPONSIBLE FOR THE ACCURACY OF THEIR SCHEDULES AND MUST BE SURE THAT ALL DROPS ARE PROCESSED THROUGH THE REGISTRATION SYSTEM DURING THE NORMAL DROP/ADD PERIOD.

In this course student teams made up of technology students, students with interest in multimedia creation (art, design, culture etc.) and students with interest in wellness practices will create new mobile technologies that will help Remind, Teach, Improve Practices for the user. The technology students will develop "apps" (no coding experience needed but a desire to learn app coding is important). The "wellness" will create best practices for issues related to (examples) mental wellness, physical wellness, education issues for students in deprived environments, old age wellness, etc. The students in art, design, music, culture will create a multimedia campaign that the apps will use. Please contact Prof. Jasprit Singh (singh@umich.edu) or Dr. John Hickley (ncko@umich.edu) if you have questions.

In this course student teams made up of technology students, students with interest in multimedia creation (art, design, culture etc.) and students with interest in wellness practices will create new mobile technologies that will help Remind, Teach, Improve Practices for the user. The technology students will develop "apps" (no coding experience needed but a desire to learn app coding is important). The "wellness" will create best practices for issues related to (examples) mental wellness, physical wellness, education issues for students in deprived environments, old age wellness, etc. The students in art, design, music, culture will create a multimedia campaign that the apps will use. Please contact Prof. Jasprit Singh (singh@umich.edu) or Dr. John Hickley (ncko@umich.edu) if you have questions.

IT IS CRITICAL THAT STUDENTS ATTEND CLASSES FROM THE BEGINNING OF THE TERM. EVEN THOUGH STUDENTS MAY BE REGISTERED OFFICIALLY FOR A COURSE, DEPARTMENTS MAY GIVE AWAY A STUDENT'S PLACE IN A CLASS IF THEY DO NOT ATTEND: ---THE FIRST MEETING OF BIOLOGY, CHEMISTRY, AND PHYSICS LABORATORIES; ---EITHER OF THE FIRST TWO MEETINGS OF ENGLISH COURSES; ---THE FIRST TWO MEETINGS OF HISTORY 396 AND 397; ---EITHER OF THE FIRST TWO MEETINGS OF ANY COURSE OFFERED BY THE DEPARTMENT OF ROMANCE LANGUAGES; ---THE FIRST TWO MEETINGS OF COURSES IN OTHER SUBJECTS. AT THE SAME TIME, DEPARTMENTS ARE NOT OBLIGATED TO WITHDRAW STUDENTS OFFICIALLY FROM THE COURSE, EVEN THOUGH THE STUDENT HAS BEEN INFORMED THAT HIS/HER PLACE IN A COURSE HAS BEEN TAKEN AWAY. STUDENTS ARE RESPONSIBLE FOR THE ACCURACY OF THEIR SCHEDULES AND MUST BE SURE THAT ALL DROPS ARE PROCESSED THROUGH REGISTRATION SYSTEM DURING THE NORMAL DROP/ADD PERIOD.

The Business of Chem and Bio

Many important fundamental discoveries in basic academic research have laid the foundation for companies and products that have changed society. From drugs to plastics from crops to pesticides, university research has improved our quality of life and led to growth in our economy. In this class, we will discuss how research in universities is conducted and funded and how those discoveries can be commercialized. Students will gain practical experience in teamwork and presentation skills and will be evaluated based on attendance, participation in class discussion, and oral presentations.

History Department

History (HISTORY)

--IT IS CRITICAL THAT STUDENTS ATTEND CLASS FROM THE BEGINNING OF THE TERM. ALTHOUGH STUDENTS MAY BE OFFICIALLY REGISTERED FOR A COURSE, THE DEPARTMENT MAY DISENROLL ANY STUDENT NOT ATTENDING THE FIRST TWO COURSE MEETINGS. --DISCUSSION SECTIONS DO NOT MEET UNTIL AFTER FIRST LECTURE. --STUDENTS ARE ENCOURAGED TO USE THE WAITLIST FOR ANY CLOSED COURSE. STUDENTS SHOULD REGISTER ON THE WAITLIST ACCORDING TO PREFERRED SECTION AND ATTEND THE FIRST CLASS. UP TO THE FIRST DAY OF CLASS, OVERRIDES WILL BE GIVEN BY THE DEPARTMENT AS SPACE BECOMES AVAILABLE. STUDENTS ARE NOTIFIED AND GIVEN TWO DAYS TO USE THE OVERRIDE, AFTER WHICH THE SPOT MAY GO TO AN ALTERNATE STUDENT ON THE WAITLIST. ONCE CLASSES HAVE STARTED, STUDENTS (WAITLISTED OR NOT) MUST CONTACT THE INSTRUCTOR FOR AN OVERRIDE.

Course Description 2013 CDB680 will highlight multiple aspects of organogenesis, including: major cell signaling pathways; stem cell biology; mathematical modeling of cell and tissue behavior; morphological and molecular events underlying organ formation; parallel pathways for organ formation in various model organisms; adult organ structure and pathology; organ regeneration and repair; cell and tissue engineering; links between organogenesis and carcinogenesis. Three modules make up the course: a) stem cells and cell signaling; b) organogenesis of the musculoskeletal system (for Fall 2013; the organ system changes each year). c) a grant writing exercise.							
Course objectives are: a) to provide students with a current, in- depth, multidisciplinary view of the processes of organogenesis; b) to highlight target areas of future research; c) to read and discuss significant papers in the field; and d) to practice the design and preparation of a research grant by writing a "miniproposal".

Course Description 2012 CDB 682 will highlight multiple aspects of organogenesis, including: morphological and molecular events underlying organ formation; parallel pathways for organ formation in various model organisms; adult organ structure and pathology; organ regeneration and repair; cell and tissue engineering; links between organogenesis and carcinogenesis. For Fall, 2012, the course will examine organogenesis of the musculoskeletal system. The major grading elements include participation in class discussions and an exercise in writing a scientific proposal. The course will begin on October 9, 2012 and run for the rest of the Fall semester.

Neurophysiology of Decision-Making People and animals alike are constantly faced with decisions, ranging from simple perceptual classifications to complex social games. This seminar will address how the brain manipulates signals in the service of choices, with a strong emphasis on the contributions of individual neurons and neuronal circuit properties. The specific papers covered will depend in part on the interests of participants, but will include studies on the information encoded by cortical, basal ganglia and dopamine neurons, and how such signals reflect processes of evaluation, expectancy and action selection. Course Structure and Grading: This seminar will consist of detailed Powerpoint presentations by students of 1-2 published papers each, with group discussion. The success of this course depends upon a high quality of student presentations, so presentations account for 2/3 of the overall grade. The remaining 1/3 is for class participation and attendance - do not register unless you can reliably attend. There will be no written assignment. Presentations are expected to be clear and cogent, demonstrating a solid understanding of the presented papers (including any supplementary material) and also background readings. The papers are challenging and will require careful consideration. If you do not clearly understand any aspect of the presented material, come and talk to me about it the week *before* your presentation. 100 Years of American Drama							
This course will examine the rise of an authentically American drama from the socially progressive and realistic theater of the 1920s and 1930s to the present. Beginning with playwrights like Elmer Rice and Clifford Odets, and continuing through the accomplishment of "the big four" (Eugene O'Neill, Arthur Miller, Tennessee Williams and Edward Albee), class meetings will consider the many ways in which more contemporary writers for the stage engage in a sometimes uneasy dialogue with their famous predecessors. Playwrights to be considered in our ongoing discussions include Sam Shepard, David Mamet, Suzan-Lori Parks, Paula Vogel, Tony Kushner, David Henry Hwang, and August Wilson, as well as figures drawn from the theatrical here and now (Amy Herzog, for example, and John Robin Baiz). Students enrolled in this course will be asked to prepare and present bi-weekly reports to the class as a whole; there will be an in-class midterm exam as well as a final term project. Class meetings will be supplemented by video recordings; these will be held on reserve at Asquith in the Shapiro Library for required outside-of-class viewing. No previous experience with theater and drama is a prerequisite for this course.

Dorothy Heathcote puts the Artist as the final "Frame Distance" in the interpretation of an event. According to Katherine Denning, it is within Heathcote's artist frame that "a deep understanding of the issues, moral dilemmas, complexities is sought." This is where events are transformed in society into ideas that can be applied to the broader problems in our society. The University of Michigan is one of the most innovative and dynamic research campuses in the world. Cutting-edge technology interfaces with multidisciplinary approaches in the pursuit of solutions to the world's most pressing problems. In the Interrogative Stage, students will use interviews, images, scenarios, video, and movement in order to explore ways to transform these scientific journeys into performance. We hope to create an artistic transformation to help further the dialogue between scientists and the people most affected by the work they do.

Theatre and Social Change meet together with RC 334.004 Artistic practice in prisons has occurred since the inception of prisons themselves, though popular thought tends not to connect the idea of the arts with that of criminal justice systems. This course surveys the history of performance in prisons through the examination of plays written by and about prisoners as well as narratives, which chronicle the process of creating theatre in prisons. More importantly, the course also requires all enrolled students to enter an adult prison once a week throughout the semester to lead a theatre workshop with prisoners. Students will be placed in pairs to facilitate workshops, and each workshop will hold a performance at the end of the semester. Students and prisoners together create social change through their performances, both by bringing two disparate communities (i.e. undergrads and prisoners) into meaningful interaction and also by using theatre to explore significant social issues.

Voice Over

Preference given to seniors. Voice work in narration, announcing, animation and character-based commercials, promos, and non-industrial categories - both single-voice and dialogues. Microphone technique, ins and outs of the commercial voice over business, audition techniques, and training with actual scripts are some of the subjects covered. The expectation is that by the end of the semester each student will be in possession of a rough cut of his/her best work over the semester.

We will work on plays by major writers such as Arthur Miller, Tennessee Williams, Lorraine Hansberry, Sam Shepard and Tony Kushner. For each play we will discuss dramaturgical background, script and character analysis and put scenes on their feet for constructive critique. Written assignments will center on a journal, which will include a series of actor's explorations of motivations

Drama from Ibsen to Beckett

Meets with English 447: Modern Drama Why do theater practitioners around the world continue to produce the great works of western European drama written by playwrights like Ibsen, Chekhov, Brecht, Pirandello and Beckett? This course will attempt to examine this question by a serious consideration of several of the major revolutionary plays that still haunt the dramatic imagination. While the perspective of this class is on dramatic form and on the potential for each play's dynamics in performance, the course will also examine the social, political and economic contexts vital to the longevity of these works. Plays to be considered include A Doll's House, The Cherry Orchard, Miss Julie, Mrs. Warren's Profession, Mother Courage, Six Characters in Search of an Author and Waiting for Godot.

In the second half of the semester, the students will investigate a local community of their choosing and create an interview-based performance as a final project. The class will perform this play for an invited audience at the end of the semester.

Principles of Comedy

This course will explore the principles of performing comedy, as experienced throughout the dramatic canon, investigating the work of Commedia, Moliere, Noel Coward, and David Lindsay-Abaire. The course will also explore improvisation, status work, and stand-up. We will ask ourselves, are there special considerations when playing comedy as opposed to straight drama? Is there such a thing as comic technique? If so, what is it? What are the technical demands of comic timing, rhythm, builds, and the ability to give and take focus? And are there ways in which we play comedy no differently than any other form of acting? We will also ask ourselves what makes a funny thing funny? Are there common threads through history? Are there universal comic elements that can be defined? We will pursue the course objectives through exercises, games, improvisations, discussions, readings, and group, solo and scene work.

In the second half small companies develop 15-minute performances, which are presented at the end of the semester to the class and anyone else who wishes to attend.
