# Electrical Engr & Computer Sci

## Electrical Engineering And Computer Science (EECS)

IT IS CRITICAL THAT STUDENTS ATTEND CLASSES FROM THE BEGINNING OF THE TERM. EVEN THOUGH STUDENTS MAY BE REGISTERED OFFICIALLY FOR A COURSE, THE ELECTRICAL ENGINEERING AND COMPUTER SCIENCE DEPARTMENT MAY GIVE AWAY A STUDENT'S PLACE IN A CLASS IF THEY DO NOT ATTEND THE FIRST WEEK OF LECTURES AND LABS/DISCUSSIONS (AS APPROPRIATE) FOR ANY EECS COURSES. AT THE SAME TIME, THE EECS DEPARTMENT IS NOT OBLIGATED TO WITHDRAW STUDENTS OFFICIALLY FROM THE COURSE, EVEN THOUGH THE STUDENT HAS BEEN INFORMED THAT HIS/HER PLACE IN A COURSE HAS BEEN TAKEN AWAY. STUDENTS ARE RESPONSIBLE FOR THE ACCURACY OF THEIR SCHEDULES AND MUST BE SURE THAT ALL DROPS ARE PROCESSED THROUGH THE REGISTRATION SYSTEM DURING THE NORMAL DROP/ADD PERIOD.

Design Process Models							
Design Process Models --- Interaction and coordination of decisions based on multi-discipline design analyses is studied in the context of a newly developed artifact. Innovation and creativity are addressed as elements of the design process. Enterprise design decisions made on functionality and business criteria are analyzed within organizational, cultural and social models. Students propose and test novel analysis methods and design process models. Advisory prerequisite: DESC1 501 or Permission of Instructor

### Statistics (STATS)

---IT IS CRITICAL THAT STUDENTS ATTEND CLASSES FROM THE BEGINNING OF THE TERM. EVEN THOUGH STUDENTS MAY BE REGISTERED OFFICIALLY FOR A COURSE, THE DEPARTMENT MAY GIVE AWAY PLACES IN A COURSE IF STUDENTS DO NOT ATTEND THE FIRST TWO COURSE MEETINGS. ---ALL STUDENTS MUST TAKE ACTION THROUGH THE REGISTRATION SYSTEM TO MAKE SURE THAT THEIR OFFICIAL SCHEDULE OF COURSES MATCHES THE COURSES THEY ARE ATTENDING.

Improv/ Dance Composition							
This class is for beginning students to experience modern dance through the craft of choreography. We will explore the elements of dance composition--space, time, dynamic, and motivation-- through movement studies, improvisations, readings, discussions, performance viewings, and brief written assignments. The course will culminate in an informal concert for which the students will prepare final studies to perform for their peers. Students must currently have dance (Modern, Ballet, Jazz) experiences.

Combat Skills&Public Speaking							
1. The Rapier: This part of the course will include movement directives specific to the skills of historical swordplay from the Elizabethan era. This movement discipline focuses on "Action-Reaction-Completion" with emphasis on balance, partnering, timing and physical decision-making in heightened psychological states. The class will enhance the performer's spatial awareness and physical readiness for movement while concentrating on the performance of high complex kinetic actions in a relaxed and focused state. 2. The Wit: Effective communication and presentation skills will be studied. This course will include exercises that achieve poise and confidence in a public forum. Basic voice and speech techniques to improve articulation, range, flexibility and clarity will be explored, along with practice in the clear articulation of ideas (both formal and impromptu).

Agamemnon							
The women of Aescylus' Agamemnon are both praised and condemned for wielding power 'like a man.' Clytemnestra welcomes her husband back after a 10-year absence during which he sacrificed their daughter and brought home a concubine. The concubine, Cassandra, is cursed in that she can prophesy, but no one can understand her. In this course we will create a multimedia event in the Duderstadt video studio based on the classical play, through a series of media filters: blogs, talk shows, press conferences, late-night show musical guests that explores current ideas about women in politics in the wake of the last two election cycles.

Drawing In & Around Florence					
Course Description This class will be conducted in Florence Italy this spring, from June 27th to July 27th. A select group of students from the School of Art & Design will be traveling and working in the museums, piazzas and streets of Florence Italy. Florence is home to some of the world's greatest works of art. We will visit and work in the Uffizi Galleries, the Accademia, the Pitti Palace and Gardens and the Bargello museum just to name a few. We will be using the facilities of SACI (Studio Art Centers International) who will make available their apartments, studio's and courses in addition to the course offered by the Penny W. Stamps School of Art & Design. This course will focus on the techniques and methods related to drawing in an urban environment. The student will draw on location examining various ways of representing constructed space. We will begin our preparation for this course this semester in Ann Arbor. The students will be assigned drawings that will prepare them for the rigors of drawing on site in Florence Italy. We will complete our work in Florence this spring.

Course Description Traditional cooking methods in Sub-Saharan Africa are typically inefficient. Basic, hand built cook stoves can reduce firewood use by 50% improving forest health and reducing girl chores. Eco-Explorers will meet once a week during winter term in preparation for a 3 week June Design Build trip in Tanzania. Language and cultural preparation, test stove design build and design process documentation will be completed prior to the field component. The June trip will include a study tour to major wildlife park areas of Tanzania, a project site visit to a Peace Corps Volunteer and 2 weeks living with Masai families during the design / build process. Enrollment by application / permission of instructor.

Rethinking the Power of Art					
Course Description This course will explore the nature and perception of physical and mental disability in our society and the role that art can play in improving the lives of individuals. We will examine numerous issues through classroom lectures and workshops, and will gain greater understanding of work and education opportunities for people with disabilities through fieldtrips (Detroit, Ann Arbor Center for Independent Living, Work Skills Corporation). The early part of this course during the winter term in Ann Arbor will lay the groundwork for the second part of the course, a one-month trip to Japan for field studies.

Course Description Through intensive studio sessions, this course focuses on drawing from the live model, both clothed and unclothed. Students investigate ways the figure is used and referenced in the work of contemporary artists and explore strategies for using the figure in drawings that are creative and expressive in nature. The goals of this course include gaining a better understanding of the figure and its significant role in the history of art, improving figure drawing skills, and pursuing unique methods of personal expression through the use of the figure in drawing.

Sound & Story							
Course Description Connecting A&D students with fourth graders at the Bennett elementary school in Detroit through semester long art projects, this class is a combination of work with the children and contextual studies that address issues of urban schools and the radical transformation creative projects have on cognitive development. Working intensively in Detroit every week, students learn first hand some of the city's history and contemporary culture with field visits and projects. Planning for and reflecting on class projects, students develop close ties with the children and produce vibrant art that transforms the physical nature of the schools, and shared experiences across generations and cultures that transform the nature of connected creative work. **Five seats are reserved for non A&D undergraduates. ** Meeting times include travel to and from Detroit.

In the Classroom							
Course Description In this community engagement class we explore the medium of sound as a vehicle to gather, invent, shape and present stories. We'll work collaboratively with a group of students in Detroit to produce creative sound works including oral histories, radio plays, sound poetry, personal audio essays and more. Students in this course learn basic digital audio skills (recording, editing, mixing) which can be applied to sound design for video, animation, radio and multimedia stories. No previous technical experience required, just an open ear and a readiness to experiment and collaborate. The class will culminate in a podcast and/or exhibition. **This course is open to all undergraduates.

Course Description In this course sponsored by ArtsEngine, students explore the creative process through a structured sequence of exercises in four studio modules: sound, motion, visual images/objects, and verbal/symbolic language. Faculty from Art & Design (Elona Van Gent); Music, Theatre & Dance (Amy Chavasse); Architecture (Gregory Saldana); and Engineering (Herbert Winful) introduce a variety of creative strategies for generating problem solving ideas through hands-on projects. Weekly colloquia (Stephen Rush), discussions, and readings supplement projects. Grading is based upon attendance, class participation, a journal, four mini-projects, evidence of intellectual and creative process development, and a final culminating project. This course is appropriate for UM undergraduate students at all levels and in all disciplines. It is a fast paced, information-rich educational experience, offering insights that will make creativity and innovation an integral part of life and work.
