Dynamic Infrastructure Sys

This course is an introductory course in the fundamentals of dynamics system theory applied to infrastructure systems including applications in modeling, motoring and controlling structural, transportation, hydraulic, and electrical grid systems. Linear systems are emphasized including continuous-time and discrete-time systems but elementary concepts in nonlinear systems are also presented. Additional topics include feedback control theory, system identification, and cyber-physical system architectures.

Num Model in Geotech Engr

The course will discuss the application of numerical methods and geotechnical constitutive laws to analyze problems in geotechnical engineering. The emphasis will be on the use of the Finite Element Method (FEM) in Geomechanics, but will also present the Discrete Element Method (DEM) and some new developments in numerical modeling.

Specifically the course will examine the importance of adequately modeling soil behavior. The finite element method will be presented and constitutive laws for geotechnical materials will be developed including linear elastic, nonlinear elastic, linear elastic-perfectly plastic and nonlinear elasto-plastic. The critical state framework for modeling soil behavior will be studied. Students will be introduced to and will use the finite element program PLAXIS to perform static analyses of earth structures and develop recommendations regarding realistic consulting projects.

Sustain Water Infrastr Sys Sustainable Water Infrastructure will provide an in-depth, practical, and interdisciplinary review of sustainable water infrastructure systems in urban and non-urban settings. This class is intended to provide students from various programs with a fundamental understanding of how water infrastructure systems work and how students will be involved with water infrastructure planning as professionals. The class will include a brief exploration of the history of water infrastructure throughout the world. Students will then learn about current and best practices regarding drinking water, wastewater, storm water, irrigation, and hydropower energy systems. The knowledge can be used in a variety of professional applications including site plan review, developing water system master plans, creating natural systems master plans, and developing capital improvement plans. Speakers and field trips will provide a first-hand glimpse of the major water infrastructure issues that planners, civil engineers, and natural resource managers deal with everyday. This course will be helpful to anyone interested in working as a public or private sector planner, civil engineer, natural resource manager, or landscape architect.

Electrical Engineering And Computer Science (EECS)

IT IS CRITICAL THAT STUDENTS ATTEND CLASSES FROM THE BEGINNING OF THE TERM. EVEN THOUGH STUDENTS MAY BE REGISTERED OFFICIALLY FOR A COURSE, THE ELECTRICAL ENGINEERING AND COMPUTER SCIENCE DEPARTMENT MAY GIVE AWAY A STUDENT'S PLACE IN A CLASS IF THEY DO NOT ATTEND THE FIRST WEEK OF LECTURES AND LABS/DISCUSSIONS (AS APPROPRIATE) FOR ANY EECS COURSES. AT THE SAME TIME, THE EECS DEPARTMENT IS NOT OBLIGATED TO WITHDRAW STUDENTS OFFICIALLY FROM THE COURSE, EVEN THOUGH THE STUDENT HAS BEEN INFORMED THAT HIS/HER PLACE IN A COURSE HAS BEEN TAKEN AWAY. STUDENTS ARE RESPONSIBLE FOR THE ACCURACY OF THEIR SCHEDULES AND MUST BE SURE THAT ALL DROPS ARE PROCESSED THROUGH THE REGISTRATION SYSTEM DURING THE NORMAL DROP/ADD PERIOD.

In this course student teams made up of technology students, students with interest in multimedia creation (art, design, culture etc.) and students with interest in wellness practices will create new mobile technologies that will help Remind, Teach, Improve Practices for the user. The technology students will develop "apps" (no coding experience needed but a desire to learn app coding is important). The "wellness" will create best practices for issues related to (examples) mental wellness, physical wellness, education issues for students in deprived environments, old age wellness, etc. The students in art, design, music, culture will create a multimedia campaign that the apps will use. Please contact Prof. Jasprit Singh (singh@umich.edu) or Dr. John Hickley (ncko@umich.edu) if you have questions.

In this course student teams made up of technology students, students with interest in multimedia creation (art, design, culture etc.) and students with interest in wellness practices will create new mobile technologies that will help Remind, Teach, Improve Practices for the user. The technology students will develop "apps" (no coding experience needed but a desire to learn app coding is important). The "wellness" will create best practices for issues related to (examples) mental wellness, physical wellness, education issues for students in deprived environments, old age wellness, etc. The students in art, design, music, culture will create a multimedia campaign that the apps will use. Please contact Prof. Jasprit Singh (singh@umich.edu) or Dr. John Hickley (ncko@umich.edu) if you have questions.

Technology Business Models

Many of the extraordinary technology entrepreneurs did more than just invent new products. They invented new business ecosystems. Bill Gates flipped the paradigm and made software more valuable than hardware. Ubiquitous smart phones enabled Jack Dorsey and Jim McKelvey of Square to expand the staid credit card payment industry into a simple process accessible to everyone. In this class students will learn about different technology business models and transforming technology into sustainable businesses.

Opportunity Space Exploration

This course will focus on practical strategies to help students explore potential "opportunity spaces" for new technologies. Specific areas of emphasis include finding and framing problems, developing representations of advanced technologies and user interactions, context scoping, divergent and convergent thinking, stakeholder research and design ethnography methods, and tools for creativity in idea generation. The strategies are focused on supporting entrepreneurs in successfully bringing innovations into the market by understanding the larger context and exploring diverse application options. The course will include reading literature on best practices and implementing the strategies in a team course project.

Systems Innovation

Technological progress enables economic growth, and technology based entrepreneurship is the link between technological breakthroughs and social value. This course explores general principles of technology-based entrepreneurship that will enhance the timing, impact, and success of entrepreneurial ventures.

Defect Assess of Marine Struct

3 credit hours - Engineering-Critical-Assessment (ECA) has become a powerful tool for providing quantitative evaluation of an in-operation marine structure or component's fitness for continued operation when a flaw or damage is detected. The product of an ECA assessment can be used to support a decision to run as is or implement proper remediation and/or monitoring techniques. ECA has also be increasingly used to support quality acceptance criteria during construction of offshore and marine structures by demonstrating fitness for purpose of any material grade deviation, fabrication and construction related imperfections, as well as quality inspection requirements. This course discusses basic mechanics principles associated with ECA based defect assessment methodologies with a focus on specific considerations for applications in offshore and marine structures.

Little or no swim experience? This course is for you. You'll start with entering the pool and getting comfortable. You'll progress to front crawl, back crawl, elementary backstroke, breaststroke, sidestroke, and butterfly. And you'll learn jumping in, treading, and water safety. Goal: one length of the pool. Goggles recommended. Attendance in at least one of the first two classes is mandatory for evaluation or you may lose your spot in class to those on a waitlist. No enrollments are accepted after the class meets a third time.

IT IS CRITICAL THAT STUDENTS ATTEND CLASSES FROM THE BEGINNING OF THE TERM. EVEN THOUGH STUDENTS MAY BE REGISTERED OFFICIALLY FOR A COURSE, DEPARTMENTS MAY GIVE AWAY A STUDENT'S PLACE IN A CLASS IF THEY DO NOT ATTEND: ---THE FIRST MEETING OF BIOLOGY, CHEMISTRY, AND PHYSICS LABORATORIES; ---EITHER OF THE FIRST TWO MEETINGS OF ENGLISH COURSES; ---THE FIRST TWO MEETINGS OF HISTORY 396 AND 397; ---EITHER OF THE FIRST TWO MEETINGS OF ANY COURSE OFFERED BY THE DEPARTMENT OF ROMANCE LANGUAGES; ---THE FIRST TWO MEETINGS OF COURSES IN OTHER SUBJECTS. AT THE SAME TIME, DEPARTMENTS ARE NOT OBLIGATED TO WITHDRAW STUDENTS OFFICIALLY FROM THE COURSE, EVEN THOUGH THE STUDENT HAS BEEN INFORMED THAT HIS/HER PLACE IN A COURSE HAS BEEN TAKEN AWAY. STUDENTS ARE RESPONSIBLE FOR THE ACCURACY OF THEIR SCHEDULES AND MUST BE SURE THAT ALL DROPS ARE PROCESSED THROUGH REGISTRATION SYSTEM DURING THE NORMAL DROP/ADD PERIOD.

History Department

History (HISTORY)

--IT IS CRITICAL THAT STUDENTS ATTEND CLASS FROM THE BEGINNING OF THE TERM. ALTHOUGH STUDENTS MAY BE OFFICIALLY REGISTERED FOR A COURSE, THE DEPARTMENT MAY DISENROLL ANY STUDENT NOT ATTENDING THE FIRST TWO COURSE MEETINGS. --DISCUSSION SECTIONS DO NOT MEET UNTIL AFTER FIRST LECTURE. --STUDENTS ARE ENCOURAGED TO USE THE WAITLIST FOR ANY CLOSED COURSE. STUDENTS SHOULD REGISTER ON THE WAITLIST ACCORDING TO PREFERRED SECTION AND ATTEND THE FIRST CLASS. UP TO THE FIRST DAY OF CLASS, OVERRIDES WILL BE GIVEN BY THE DEPARTMENT AS SPACE BECOMES AVAILABLE. STUDENTS ARE NOTIFIED AND GIVEN TWO DAYS TO USE THE OVERRIDE, AFTER WHICH THE SPOT MAY GO TO AN ALTERNATE STUDENT ON THE WAITLIST. ONCE CLASSES HAVE STARTED, STUDENTS (WAITLISTED OR NOT) MUST CONTACT THE INSTRUCTOR FOR AN OVERRIDE.

This is a course designed primarily for PIBS students. Undergraduate students are not eligible, and although we welcome masters and graduate students from other colleges (e.g. Engineering, Chemistry, Pharmacy, Dentistry, School of Public Health), there are expectations that students have a basic understanding of key biochemical/molecular biological concepts. Students from non-PIBS programs must contact the course director prior to registering in order to determine their eligibility.

This course is designed to enhance the information presented in CancBio 553, by being a much smaller class than 553, but taking a journal-based approach, led by the same lecturers as 553. This is a highly interactive course, which emphasizes the critical reading of relevant publications to supplement the material covered in CancBio 553.

Only PIBS Ph.D. students are eligible for this course, and all students must be taking CancBio553 concurrently; therefore, the course requirements for CancBio553 also are required for this course.

Cog Neuro of Consciousness				
The study of consciousness is considered a fundamental scientific and philosophical pursuit. How does information processing in the brain generate experience? How do we objectively capture what is, by definition, a subjective event? As philosopher Colin McGinn puts it, how do we get from the water of the brain to the wine of consciousness? I have recently started a Center for Consciousness Science at the UM Medical School to help address these very questions. As an educational activity and the Center (and as a NGP faculty), I am conducting a combined reading/lecture course (NS-704) this upcoming semester on ?The Cognitive Neuroscience of Consciousness.? The study of consciousness is sometimes decomposed into ?levels of consciousness? (awake vs. asleep vs. anesthetized vs. comatose) and ?states of consciousness? (assuming I am already conscious, why do I see a blue triangle rather than a red square?). We will explore both of these dimensions and likely have some visiting lecturers/discussants to help us along the way. The subject of consciousness motivated many of us to choose the field of neuroscience. I hope you will join me next month as we explore a fascinating question that has scientific, philosophical, clinical, and even existential implications. Even if you don?t want to formally sign up for the course, you are welcomed to attend and participate. What: NS704, The Cognitive Neuroscience of Consciousness Who: Neuroscience and psychology students (and other interested people) When: Fall semester, Wednesdays at Noon (pizza will be served!) Physical Expression							
In order to obtain a simple and truthful, honest performance we approach the craft of acting exploring two parallel tracks. 1. Reexamining the individual's approach to acting, to ensure that the acting process allows availability and does not initiate habitual patterns of tension. 2. Having an available body that allows and does not block the acting process. In short, you need body that is available to the acting process and an acting process that does not block the availability of the body.

meet together with RC 334.004 Artistic practice in prisons has occurred since the inception of prisons themselves, though popular thought tends not to connect the idea of the arts with that of criminal justice systems. This course surveys the history of performance in prisons through the examination of plays written by and about prisoners as well as narratives, which chronicle the process of creating theatre in prisons. More importantly, the course also requires all enrolled students to enter an adult prison once a week throughout the semester to lead a theatre workshop with prisoners. Students will be placed in pairs to facilitate workshops, and each workshop will hold a performance at the end of the semester. Students and prisoners together create social change through their performances, both by bringing two disparate communities (i.e. undergrads and prisoners) into meaningful interaction and also by using theatre to explore significant social issues.

IMPRO Theatre The class is based on Keith Johnstone's IMPRO System and IMPRO Storytelling. The techniques, exercises, formats and skills to be explored are derived from his work with Theatre Machine, and the implementation of Status Exercises, Fast-Food Stanislavsky, Life Games and Emotional Replay, among others, and turned into performance. Through structured improvisation, spontaneous creation, and utilizing the intuitive, uncensored responses from the participants, an emphasis is placed upon working with others toward clarity of expression and presentation. Developed emotionally, physically, intellectually and creatively, this artistic growth is cultivated in an atmosphere that is non-competitive, supportive and exhilarating, but challenging. Open to BFA performance & directing students, and BTA & InterArts students.

Image of the American Family Meets with RCHUMS 282.001 In this four credit drama course students will explore major American plays of the 20th century through the process of text analysis through performance. We will work on plays by major writers such as Arthur Miller, Tennessee Williams, Lorraine Hansberry, Sam Shepard and Tony Kushner. For each play we will discuss dramaturgical background, script and character analysis and put scenes on their feet for constructive critique. Written assignments will center on a journal which will include a series of actor's explorations of motivations and actions. Students will also be responsible for writing critiques of two productions. The course culminates in a public performance of a cutting of a major play, most likely Tony Kushner's "Angels in America." Principles of Comedy This course will explore the principles of performing comedy, as experienced throughout the dramatic canon, investigating the work of Commedia, Moliere, Noel Coward, and David Lindsay-Abaire. The course will also explore improvisation, status work, and stand-up. We will ask ourselves, are there special considerations when playing comedy as opposed to straight drama? Is there such a thing as comic technique? If so, what is it? What are the technical demands of comic timing, rhythm, builds, and the ability to give and take focus? And are there ways in

which we play comedy no differently than any other form of acting? We will also ask ourselves what makes a funny thing funny? Are there common threads through history? Are there universal comic elements that can be defined? We will pursue the course objectives through exercises, games, improvisations, discussions, readings, and group, solo and scene work.

Documentary Theatre This seminar explores the political and social ramifications of documentary theatre in the U.S. from the 1990s to the present. We will spend the first half of the semester studying interview techniques and reading examples of documentary theatre by playwrights such as Anna Deavere Smith, Heather Raffo, and Moises Kaufman and the Tectonic Theatre Project. In the second half of the semester, the students will investigate a local community of their choosing and create an interview-based performance as a final project. The class will perform this play for an invited audience at the end of the semester.
