Fostering Great Experiences for UX-Tasked Student Workers

Zoe Chao, Carrie Moran, and Rachel Vacek

Designing for Digital
March 5, 2018
▷ Zoe Chao @zoechao
User Experience Librarian, Penn State University

▷ Carrie Moran @digitalcarrie
Head of User Services/User Experience Librarian, California State University San Marcos

▷ Rachel Vacek @vacekrae
Head of Design and Discovery, University of Michigan
1. THREE DIFFERENT ENVIRONMENTS
CSU San Marcos
(and also the University of Central Florida)
Create the right environment
Building partnerships

★ Value their voices
★ Make use of their networks and experience as a student
★ Invite them to the table
How do we make the experience meaningful?
Create meaningful work

★ Let them make important decisions
★ Offer flexible schedules so they can incorporate their work into their already busy schedules
★ Give them options in the type of work they do - don’t give them grunt work
Create meaningful work

- Provide real projects with challenges to be solved
- Consider longer projects so they develop a sense of ownership
- Let them fail once in a while - it’s how we learn best
- Overcoming tough challenges can bring immense joy
How do we support our student workers?
Top motivation

★  Earning money
★  Gaining work experience
★  Developing skills
★  Building a resume

Survey responses

★  Positive feelings
★  No correlation to their majors
★  Not beyond “a token line on a resume”

Training begins with supervisors’ intentions.

Provide support (besides paycheck)

★ Clear expectations
★ Ongoing encouragement and engagement
★ Work experience
★ Applicable skills
★ Research opportunities
★ Emotional support
★ Diversity ("representation matters")
3. OVERCOMING CHALLENGES
Sometimes things don't go as planned.

★ Investment of your time
★ High turnover
★ Interest in work
★ Lacking soft skills
4. BENEFITS FOR STUDENT WORKERS
They will graduate...

★ Workplace skills
★ To put on a resume
★ Gain confidence
★ Learn about a different career path
★ Ongoing mentorship
★ Connections in the field
5.

BENEFITS FOR LIBRARIES
Their voice and perspective

★ Both users and service providers

★ Tips for recruitment and retention

★ Genuine responses from testers, peer-to-peer interaction

★ Reducing other students’ “library anxiety”

★ Their energy and personality
Examples

★ Photo elicitation

★ Cognitive mapping
[B]y understanding their contribution to the success of their student workers, [libraries] may be better equipped to communicate their overall value to the university community.

Thanks!

Any questions?
