<tbody>
<tr>
<td><strong>Sociological Structure</strong></td>
<td><strong>The impact of social structures on human action</strong></td>
</tr>
<tr>
<td>- Social roles may privilege some as authorities</td>
<td>- <strong>Ownership of information systems impacts the processes of information creation and what information is made available</strong></td>
</tr>
<tr>
<td>- Social institutions exert influence over what is considered valid or factual</td>
<td>- <strong>Ownership of information systems is concentrated; even when information is produced by individuals, it may be owned by private corporations (e.g., on social media platforms, transfer of copyright agreements)</strong></td>
</tr>
<tr>
<td><strong>Socialization</strong></td>
<td><strong>The relationship between the self and society</strong></td>
</tr>
<tr>
<td>- Ideologies impact accepted authorities</td>
<td>- <strong>Creation of information as expressions of self and social belonging is monetized and monitored (e.g., social media)</strong></td>
</tr>
<tr>
<td>- &quot;Fake news&quot;</td>
<td>- <strong>Cultural contexts shapes perceptions of legitimate knowledge and questions</strong></td>

<td><strong>Stratification</strong></td>
<td><strong>The patterns and effects of social inequality</strong></td>
</tr>
<tr>
<td>- Institutions with authority to produce knowledge recreate social inequalities</td>
<td>- <strong>&quot;Profitable&quot; research outputs receive more value and resources</strong></td>
</tr>
<tr>
<td>- Certain forms of knowledge production are valued over others: e.g., low income students as lacking cultural capital, rather the institutional de-valuing of different cultures</td>
<td>- <strong>Corporate control and limits on information distribution and participation</strong></td>
</tr>
<tr>
<td><strong>Social Change and Social Reproduction</strong></td>
<td><strong>How social phenomena replicate and change</strong></td>
</tr>
<tr>
<td>- Scientific authority comes from approval by educational institutions; Academic success requires acceptance of certain &quot;truths&quot; about the social and natural world; Through young scholars, these &quot;truths&quot; persist</td>
<td>- <strong>&quot;Profitable&quot; research outputs receive more value and resources</strong></td>
</tr>
<tr>
<td>- Certain kinds of knowledge are reproduced; because scientists use existing theories for hypothesis building, methodological design, and interpretation, they will often fail to see what does not fit into these theories</td>
<td>- <strong>Corporate control and limits on information distribution and participation</strong></td>
</tr>

</table>

**Information Has Value**
- Commodity: economic/financial structures support/constrain info production
- Means for education: varying access, promotion of "correct" information
- Means to influence: role and impact of propaganda
- Ask questions like a sociologist
- Social assumptions vs. scientific evidence
- Verification process
- Expert knowledge is shaped by established scientific systems and processes
- Scholarly conversations are shaped by institutional structures: higher education, research firms, publishers, libraries, archives, and the WWW
- Search engines as gatekeepers to information
- Algorithms reflect the interests of their creators
- Perceptions of relevance are shaped by social position
- Cultural bias impacts design of search engines and classification systems

**Research as Inquiry**
- Iterative question asking, methods, analysis
- Participation in scholarly discourse relies on membership in communities of practice
- Citation practices, plagiarism
- Historical exclusion of subordinated social groups from scholarship
- Unequal access to literacy education
- Development of expert search strategies is a skill that takes education and experience

**Scholarship as Conversation**
- Sustained discourse, varied perspectives
- Scholarly conversations are shaped by institutional structures: higher education, research firms, publishers, libraries, archives, and the WWW
- Search engines as gatekeepers to information
- Algorithms reflect the interests of their creators
- Perceptions of relevance are shaped by social position
- Knowledge is not easy

**Searching as Strategic Exploration**
- Iterative evaluation of range of sources, mental flexibility
Find and Cite Three-to-Five Sources: Applying the Sociological Imagination to Critical Information Literacy

Presenters: Hailey Mooney, University of Michigan Library (haileym@umich.edu)
Paula Dempsey, University of Illinois at Chicago Library (dempseyp@uic.edu)

Challenge: Do you ever ask students to complete an assignment that includes a bibliography requirement? Literature research and writing is an opportunity to apply the sociological imagination to both the paper topic and to the process of discovering and selecting the information sources that will inform student work. However, this is often a missed opportunity: either information discovery is seen as ancillary to the assignment and not discussed, or library instruction may not meaningfully integrate sociological concepts.

Approach: The Sociological Information Literacy Framework

- Tool for identifying how to bring critical information literacy into the sociology classroom
- Reflectively locate, understand, and use information in support of lifelong learning goals for developing informed citizens with higher-order thinking skills
- Sociological Information Literacy is an understanding of how information and scholarship are created, published, disseminated, and used by individuals and organizations that is informed by sociological thinking and scholarship.
- The Sociological Information Literacy Framework takes the form of a crosswalk between two guiding documents:
  1. Sociological Literacy Framework
  2. Framework for Information Literacy for Higher Education

Next Steps: Peer review, revision, and putting it into practice!

- Review and endorsement of the Sociological Information Literacy Framework by the Association of College & Research Libraries and the American Sociological Association
- Making meaningful connections between sociological and information literacy will provide a foundation to enrich instructor-librarian collaboration in the classroom and strengthen overall student learning

Call for Peer Reviewers

The draft Sociological Information Literacy Framework is currently under development by the Anthropology & Sociology Section (ANSS) of the Association of College & Research Libraries (ACRL) as part of the Framework Companion Documents program, and is overseen by the ACRL Information Literacy Frameworks and Standards Committee (https://acrl.libguides.com/ILFSC). In order to create a robust, meaningful, and collaborative document representing the expertise of both librarians and sociologists, ANSS-ACRL seeks to gather peer reviewer input from sociology instructors, especially those active in the ASA Section on Teaching & Learning. The initial peer review and revision process is expected to take place during the 2018-19 academic year.

Please fill out the form at https://tinyurl.com/socinfolitreviewerscall to indicate your interest in volunteering as a peer reviewer.
