TAXON

International Journal of Taxonomy, Phylogeny and Evolution

Electronic Supplement to

A molecular phylogeny and classification of the largely succulent and mainly African *Euphorbia* subg. *Athymalus* (Euphorbiaceae)

Jess A. Peirson, Peter V. Bruyns, Ricarda Riina, Jeffery J. Morawetz
& Paul E. Berry

Taxon 62: 1178–1199

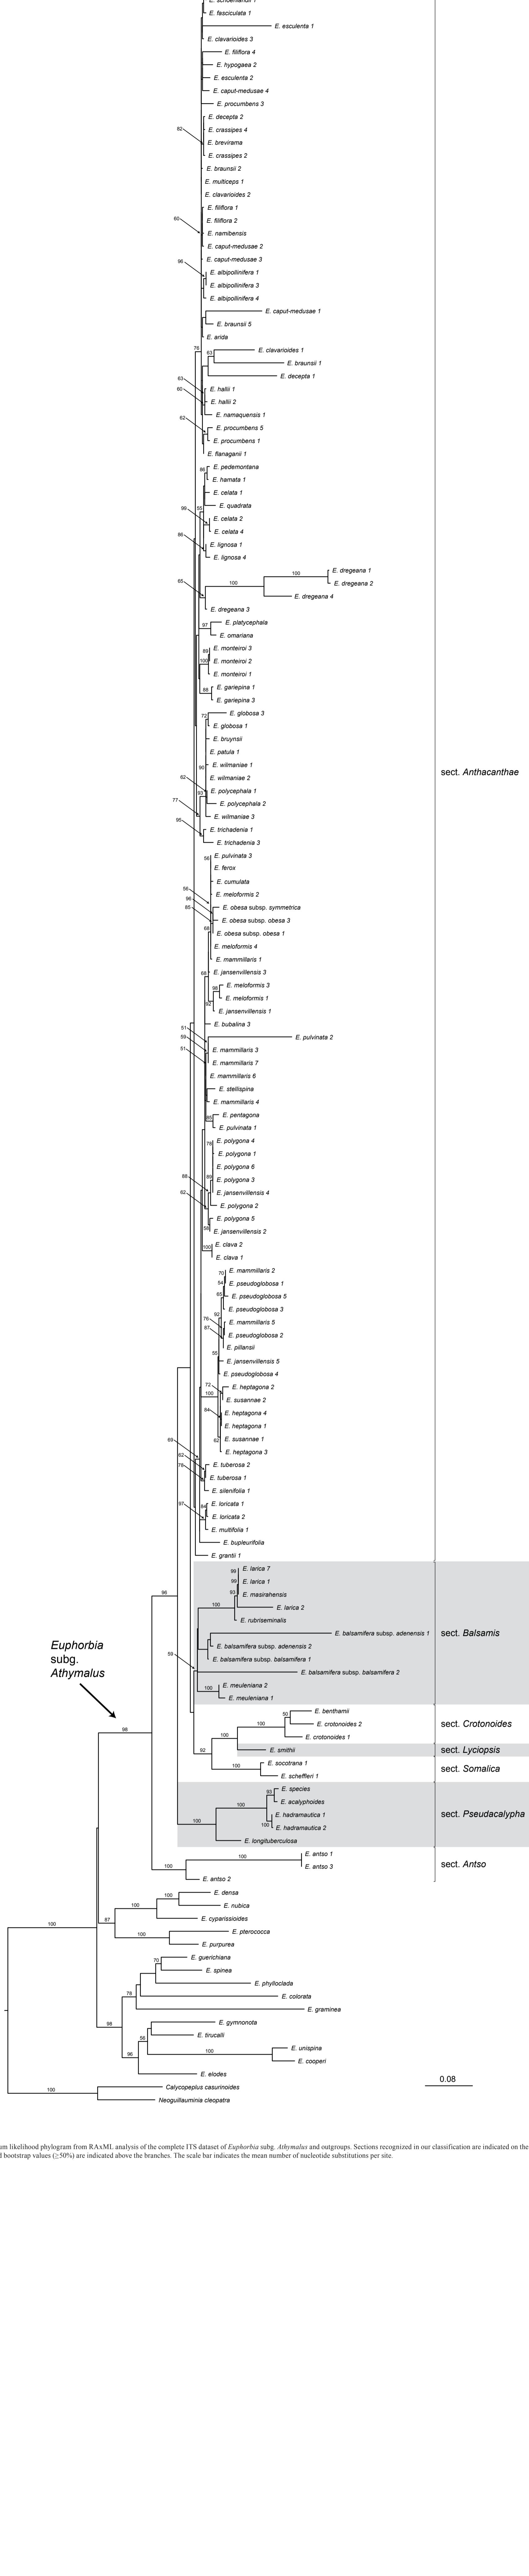

Fig. S1. Maximum likelihood phylogram from RAxML analysis of the complete ITS dataset of *Euphorbia* subg. *Athymalus* and outgroups. Sections recognized in our classification are indicated on the right. Maximum likelihood bootstrap values ($\geq 50\%$) are indicated above the branches. The scale bar indicates the mean number of nucleotide substitutions per site.

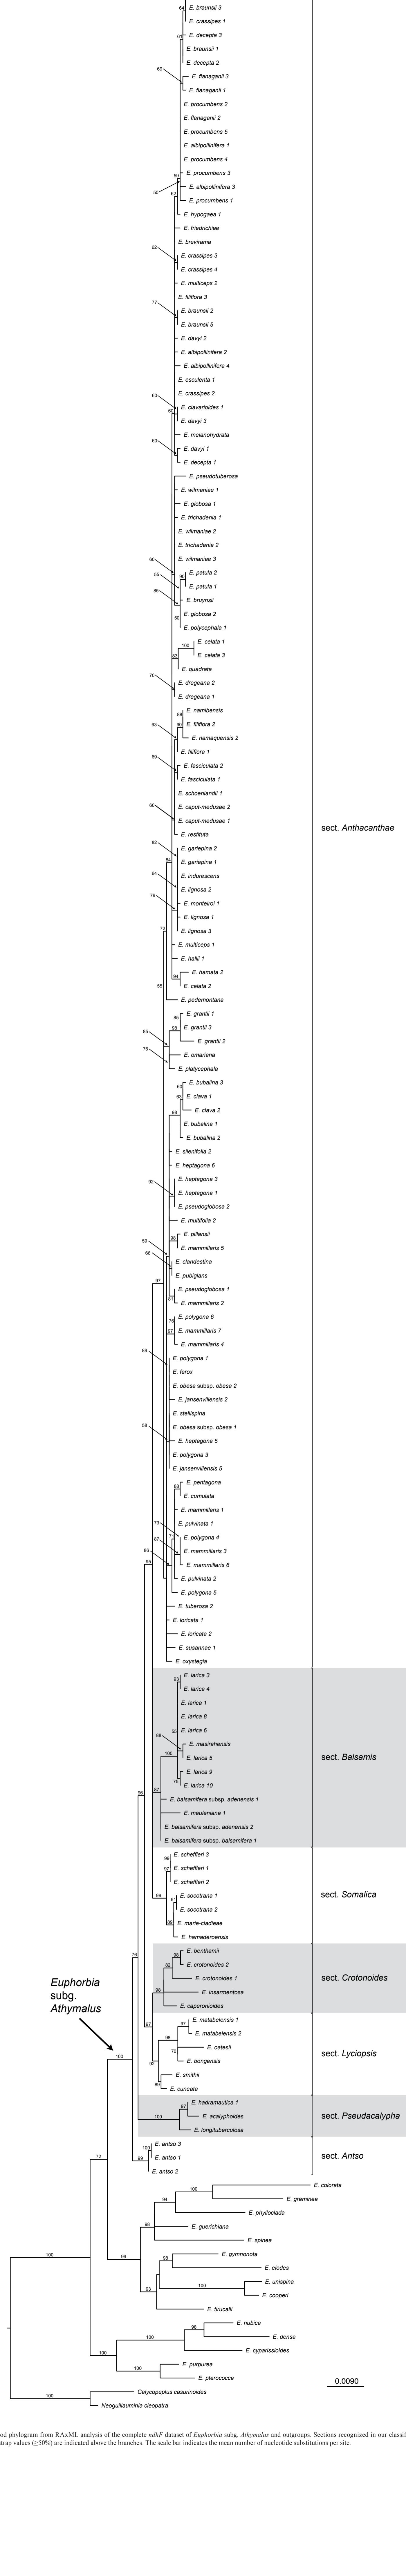

Fig. S2. Maximum likelihood phylogram from RaxML analysis of the complete *ndhF* dataset of *Euphorbia* subg. *Athymalus* and outgroups. Sections recognized in our classification are indicated on the right. Maximum likelihood bootstrap values ($\geq 50\%$) are indicated above the branches. The scale bar indicates the mean number of nucleotide substitutions per site.

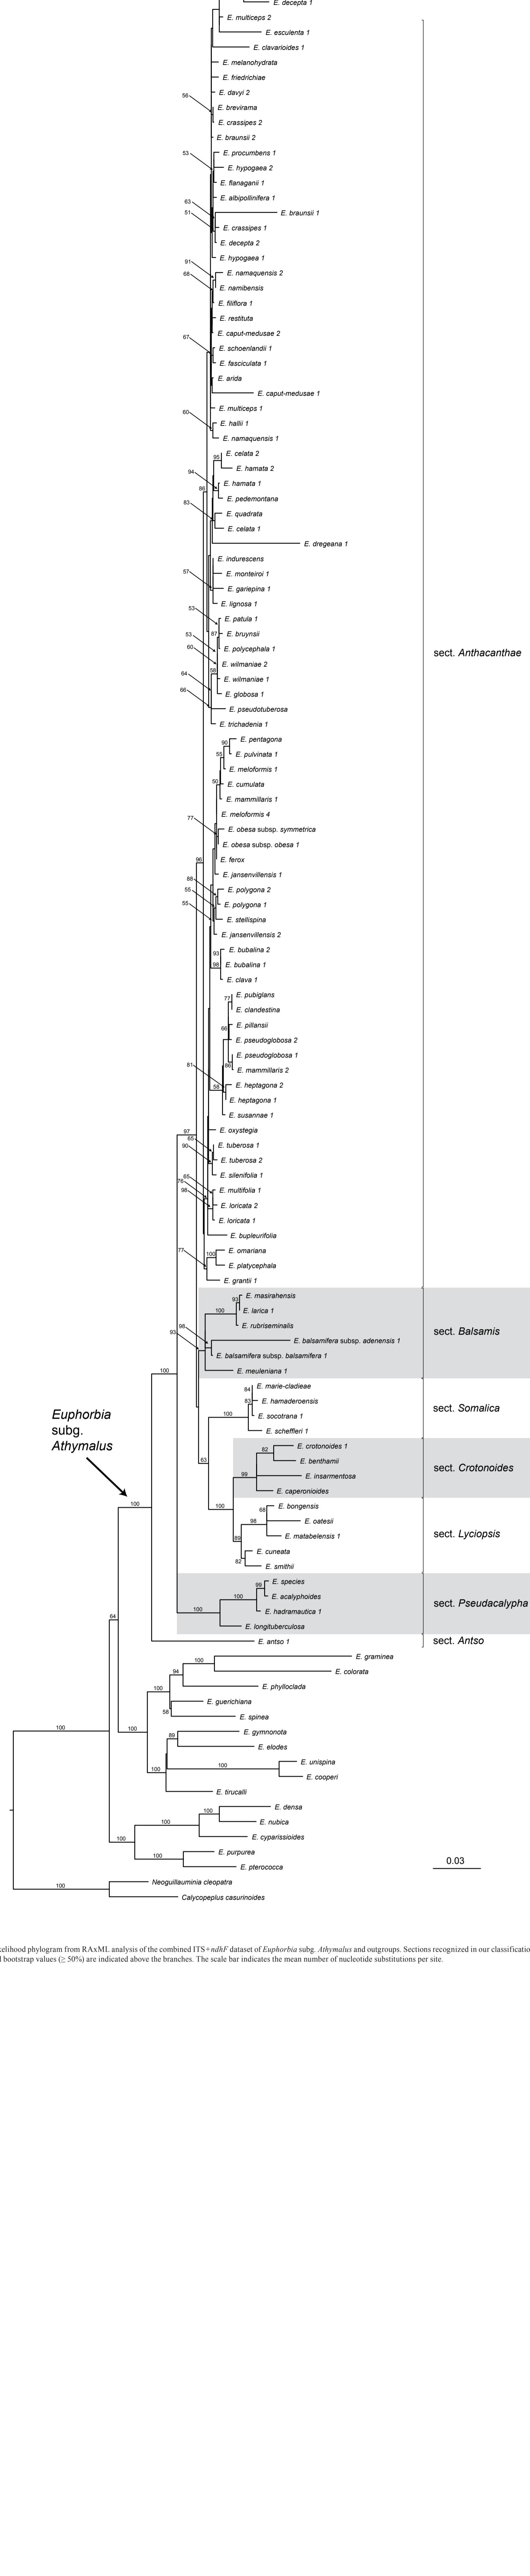

Fig. 53. Maximum likelihood phylogram from RAxML analysis of the combined ITS+ndhF dataset of *Euphorbia* subg. *Athymalus* and outgroups. Sections recognized in our classification are indicated on the right. Maximum likelihood bootstrap values ($\geq 50\%$) are indicated above the branches. The scale bar indicates the mean number of nucleotide substitutions per site.

Appendix S1. Information on taxa, sample origin, vouchers and their location (herbarium acronym), as well as GenBank accession numbers for ITS and *ndhF* sequences of samples included in the phylogenetic analyses. GenBank accession numbers for newly generated sequences are preceded by an asterisk. A region that was not sequenced for a particular sample is indicated by –.

Calycopeplus casuarinoides L.S. Sm., U.S.A. (cultivated), *V. Steinmann* 1407 (RSA), AF537580, JN249080; *Euphorbia acalyphoides* Hochst. ex Boiss. in DC, Kenya, W. Luke & al. TPR177 (MO), AF537576, AF538251; *Euphorbia albipollinifera* L.C. Leach 2, U.S.A. (cultivated), *R. Riina* 1610 (MA), *KF267274, *KF267330; *Euphorbia albipollinifera* L.C. Leach 2, U.S.A. (cultivated), *P. Berry* 7758 (MICH), –, *KF267332; *Euphorbia albipollinifera* L.C. Leach 3, Netherlands (cultivated), *R. Riina* 1611 (MA), JQ750870, JQ750761; *Euphorbia albipollinifera* L.C. Leach 4, Netherlands (cultivated), *R. Riina* 1612 (MA), *KF267275, *KF267331; *Euphorbia antso* Denis 1, Madagascar, B. Dorsey 105 (MICH), *KF267276, *KF267333; *Euphorbia antso* Denis 2, U.S.A. (cultivated), *V. Steinmann* 1473B (RSA), AF537579, AF538253; *Euphorbia antso* Denis 3, Madagascar, B. Dorsey 123 (MICH), *KF267277, *KF267334; *Euphorbia arida* N.E. Br., Netherlands (cultivated), *R. Riina* 1613 (MA), *KF267278, –; *Euphorbia balsamifera* subsp. *adenensis* (Deflers) Bally 1, Oman, J. Morawetz 325 (MICH), *KF267279, *KF267335; *Euphorbia balsamifera* subsp. *adenensis* (Deflers) Bally 2, U.S.A. (cultivated), *V. Steinmann* 1480 (RSA), AF537571, AF538250; *Euphorbia balsamifera* subsp. *balsamifera* Aiton 1, Spain, B. Dorsey 3 (MICH), JN250117, JN249107; *Euphorbia balsamifera* subsp. *balsamifera* Aiton 2, Spain, P. Lawant s.n. (BOL), JN207741, –; *Euphorbia benthamii* Hiern, Tanzania, J. Morawetz 479 (MICH), *KF267280, *KF267336; *Euphorbia bongensis* Kotschy & Peyr. ex Boiss., Netherlands (cultivated), *R. Riina* 1695a (MA), –, KC019860; *Euphorbia braunsi* N.E.
