JAPANESE AUTOMOTIVE SUPPLIER TRANSPLANT DIRECTORY

COMPILED BY BRETT C. SMITH

APRIL 1989

This is a list of automotive supplier manufacturing or assembly plants located in the United States that are either partially or entirely owned by Japanese companies. The directory was compiled by reviewing industry journals, local newspapers and by contacting various state and local government agencies. This information was then followed up by contacting the plants. To insure accuracy, a second contact was made with each company (unless noted).

Description of fields

This is a description of specific fields. Those fields that are self-explanatory (Company name, Phone number, Customers, Products produced, and Number of employees) have been omitted.

Contact

Plant manager was the position that was asked for, however some companies were unable to give that information. Most of those companies offered similar positions in place of a plant manager.

Parent corporations

In the case of joint ventures, when possible, the percent of each corporation's interest is given.

OEM/Aftermarket

The plants served either the original equipment market (OEM), the aftermarket, or both the OEM and the aftermarket.

Type of operation

The companies in this directory are either manufacturing plants, assembly plants or a combination of the two.

Finally, those companies which we were unable to contact a second time are noted by an asterisk (*). These are companies that we had either contacted or had information confirmed by other sources in the first round, but would not confirm the information in the second round of contacts

Listing of Plants

Japanese Transplant Employment Summary

This is a state by state listing of employment figures for the Japanese transplants. The figures are taken from the data reported by the companies. Because some of the companies were unable to release employment figures, this is not an exact total. Also, there are a few plants that are in their start-up phase and will be increasing their number of employees soon. These points, combined with the fact that there are a number of plants that are scheduled to open in 1989, lead us to believe that these figures are a very conservative estimate of the number of people employed in the components manufacturing and assembly portion of the automotive industry by the transplants.

<u>State</u>	<u>Facilities in State</u>	<u>Employees in State</u>
Alabama	3	2,150
Arkansas	1	180
California	9	2,997
Georgia	2	174
Iowa	2	347
Illinois	15	3,172
Indiana(b)	17	3,586
Kentucky	22	6,380
Michigan	21	7,326
Missouri	5	889
Mississippi	2	a
North Carolina	1	14
Nebraska	2	83
New York	1	900
Ohio	28	7,846
Oklahoma	1	450
South Carolina	1	275
Tennessee	10	6,028
Texas	4	530
<u>Virginia</u>	<u>1</u>	<u>a</u>
Totals	148	43,327

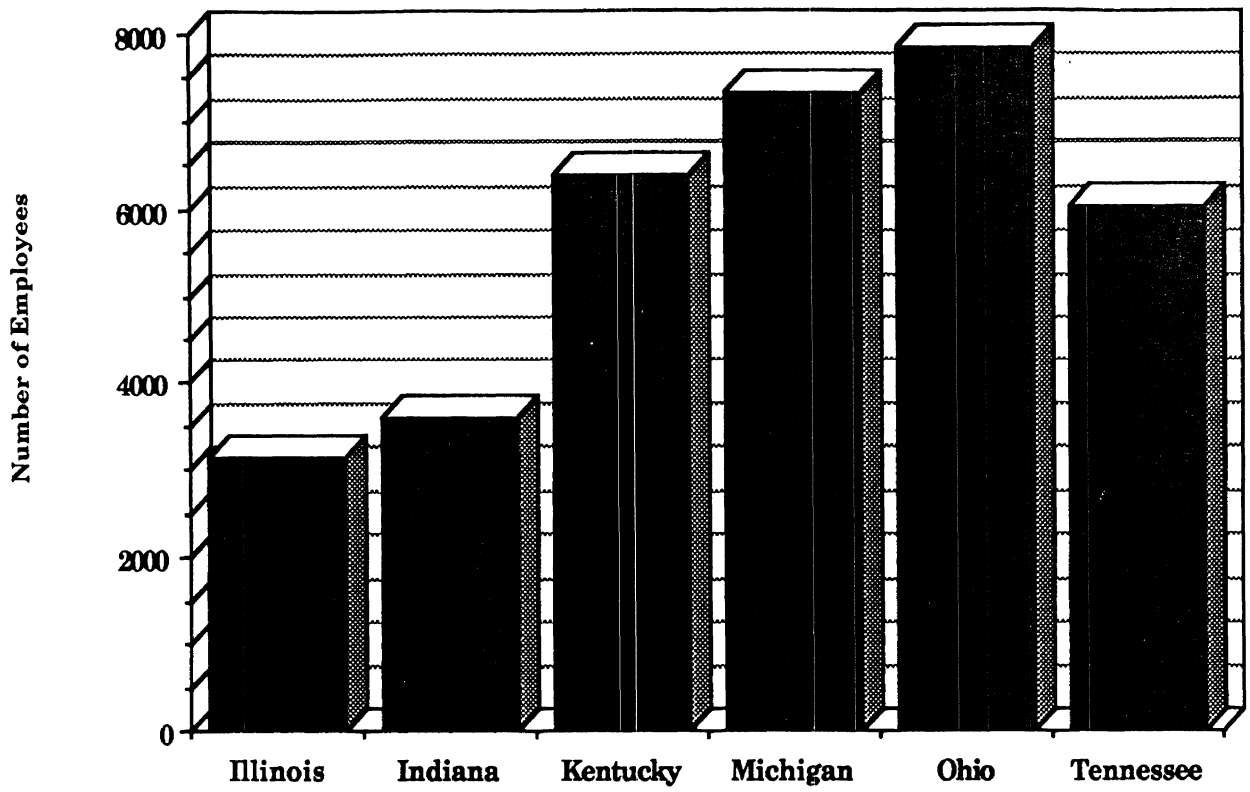

(a) Companies in these states did not report employment figures

(b) Includes the planned employment for the Subaru-Isuzu plant

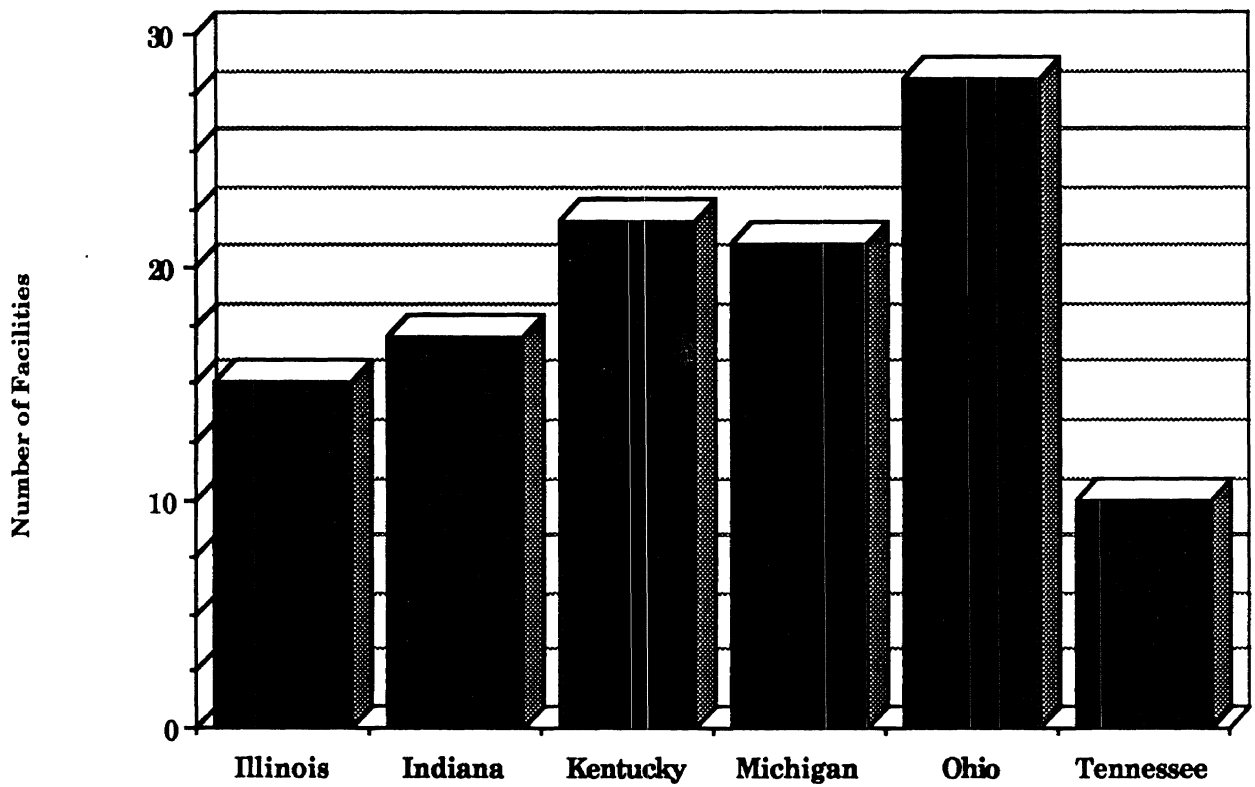

Note: Transplants which produce materials (steel, plastics, powdered metals, etc.) or capital tools for the auto industry are not included in these figures.
