

ICPSR

The Realities of Data Sharing

Research Standards in Criminology

Margaret Levenstein

August 30, 2020

Agenda

Introduction to ICPSR

NACJD, the National Archive of Criminal Justice Data

Resources for journals

Restricted data

- Access modalities

- Curation

Other resources to improve criminal justice research

- Bibliography

- Data Management Plans

- Consent Statement Guidance

- Pre-registration

ICPSR

Founded in 1962 by 22 universities, now consortium of ~800 institutions world-wide

Focus on social and behavioral science data, broadly defined

Current holdings

- 15,000 studies, quarter million files
- 1700 are *restricted studies*, almost always to protect confidentiality
- Bibliography of Data-related Literature with 92,000 citations

Data Stewardship: high quality, curated data in user-friendly formats

Data Protection: multiple strategies for safe research using sensitive data

Thematic Collections

Community

- [Nat'l Archive of Data on Arts and Culture](#)
- [Open Data Flint](#)

Criminal Justice

- [Nat'l Archive of Criminal Justice Data](#)
- [Firearm Safety Among Children and Teens](#)

Demography

- [Nat'l Archive of Computerized Data on Aging](#)
- [Data Sharing for Demographic Research](#)
- [Resource Center for Minority Data](#)
- [US Census Data Repository](#)
- [ResearchDataGov](#)

Education

- [Child and Family Data Archive](#)
- [Civic Learning, Engagement and Action Data Sharing](#)
- [Education Research Data Sharing Initiative](#)
- [Measures of Effective Teaching](#)
- [NCAA Student-Athlete Experiences](#)

Health/Wellness

- [Archive of Data on Disability to Enable Policy](#)
- [COVID-19 Data Repository](#)
- [Health and Medical Care Archive](#)
- [Nat'l Addiction and HIV Data Archive Program](#)

At-Risk Government Data [Data Lumos](#)

**The National Archive of
Criminal Justice Data**

About NACJD

Mission

To support research on crime and justice by facilitating the discovery and use of data

Audience

Criminal justice students and researchers, news organizations, other non-academic research institutions

Funding

Bureau of Justice Statistics (**BJS**)
National Institute of Justice (**NIJ**)
Office of Juvenile Justice and Delinquency Prevention (**OJJDP**)

ICPSR

NACJD by the Numbers

Over **10,322** research datasets
available for analysis

From January 1, 2020 - June 30, 2020:

NACJD released **22 NIJ**, **10 BJS**, and
5 OJJDP studies

16,944 unique NACJD data users
downloaded **252,640** data or
document files

About Our Data

- Official U.S. crime data
- Grantee data collections
 - NIJ and OJJDP mandate to share data with NACJD
- Topical areas:
 - Policing
 - Corrections
 - Court case processing
 - Juvenile delinquency
 - Guns and other weapons
 - Recidivism
 - Violence against women
 - Human trafficking and sex crimes
 - Drugs and alcohol
 - And more

Popular Data Collections

- National Crime Victimization Survey (NCVS)
- Uniform Crime Reporting Program (UCR) and National Incident-Based Reporting System (NIBRS)
- Federal Justice Statistics Program (FJSP)
- National Corrections Reporting Program (NCRP)
- National Intimate Partner and Sexual Violence Survey (NISVS)
- Project on Human Development in Chicago Neighborhoods (PHDCN)
- Pittsburgh Youth Study (PYS)

Accessing NACJD Data

- NACJD data are available without charge
- Many NACJD studies (over 1,100) are restricted access
- Restricted access is offered via secure download, Virtual Data Enclave (VDE), Physical Data Enclave (PDE)
- Prospective data users can navigate to the application by visiting the study home page of the data they are interested in

Research Resources

Learning Guides

- [Replicating Results from the National Crime Victimization Survey](#)
- [Law Enforcement Agency Identifiers Crosswalk](#)

Resource Guides

- Available for several popular data collections, including **UCR**, **NIBRS**, **NCRP**, **NCVS**, and **FJSP**
- Includes information needed to properly use and understand data

<https://www.icpsr.umich.edu/web/pages/NACJD/learning-data-guides.html>

(Data) sharing is caring

- Reproducibility
- Respect for study participants
- Minimize burden
- Increase impact
- Incremental knowledge building
- Trust and credibility

Sharing data

Resources for Journals

The screenshot displays the OPENICPSR website interface. At the top left is the logo 'OPENICPSR'. On the top right, there are links for 'Log In/Create Account', 'Find Data', 'Share Data', and 'Repositories', along with a search icon. Below the navigation bar, a dark blue banner contains the text 'Find and share social, behavioral, and health sciences research data.' A search bar in the center of the banner contains the word 'immigration' and a magnifying glass icon. The background of the banner features a glowing, abstract network of blue and purple lines. Below the banner, a row of logos is displayed: the American Economic Association, AERA, JEH, and NaNDA. A second row of logos includes the University of Michigan Institute for Social Research and Survey Research Center Panel Study of Income Dynamics, the COVID-19 Data Repository, and the ICPSR Student Data Sandbox. At the bottom of the browser window, two document tabs are visible: 'ICPSRRestrictedD...docx' and 'NACJD-Arnold.pptx'. A 'Show all' button is located in the bottom right corner of the browser window.

OpenICPSR: Data for reproducibility

Any researcher can deposit data and receive DOI immediately

- Available to share with journal prior to publication
- Data are not curated, but they are checked for confidentiality
- Data can be restricted or embargoed

Dedicated journal repositories

- Journal-branded
- Journal-specific criteria
- Work flow allows journal to approve deposit prior to data publication

Depositing data for curation: Data for re-use

Why Deposit Data With ICPSR?

ICPSR offers:

Free Data Deposits. There is no cost to deposit data into ICPSR.

Data Curation. ICPSR enhances and adds value to data by making them easier to use. We also describe data fully for Web discovery and protect respondent privacy.

Long-Term Preservation. ICPSR ensures long-term data availability.

Worldwide Dissemination. ICPSR offers data in the major statistical package formats and online analysis. Usage statistics are available on request.

User Support. ICPSR staff are available to answer questions about downloading and using data.

Levels of Access. ICPSR offers restricted access data services, and a secure data enclave.

Aggregation of Publications. ICPSR creates a [database of citations](#) based on analyses of your data. This database is harvested by social science indexes, such as the Web of Science, which also provides credit to the original investigator.

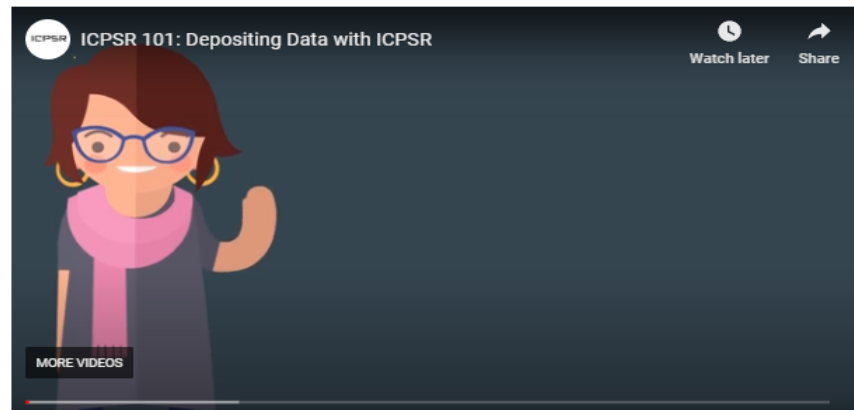

Data used for secondary analysis is published more widely than data not shared. Sharing data extends the research productivity of the primary

Start Deposit

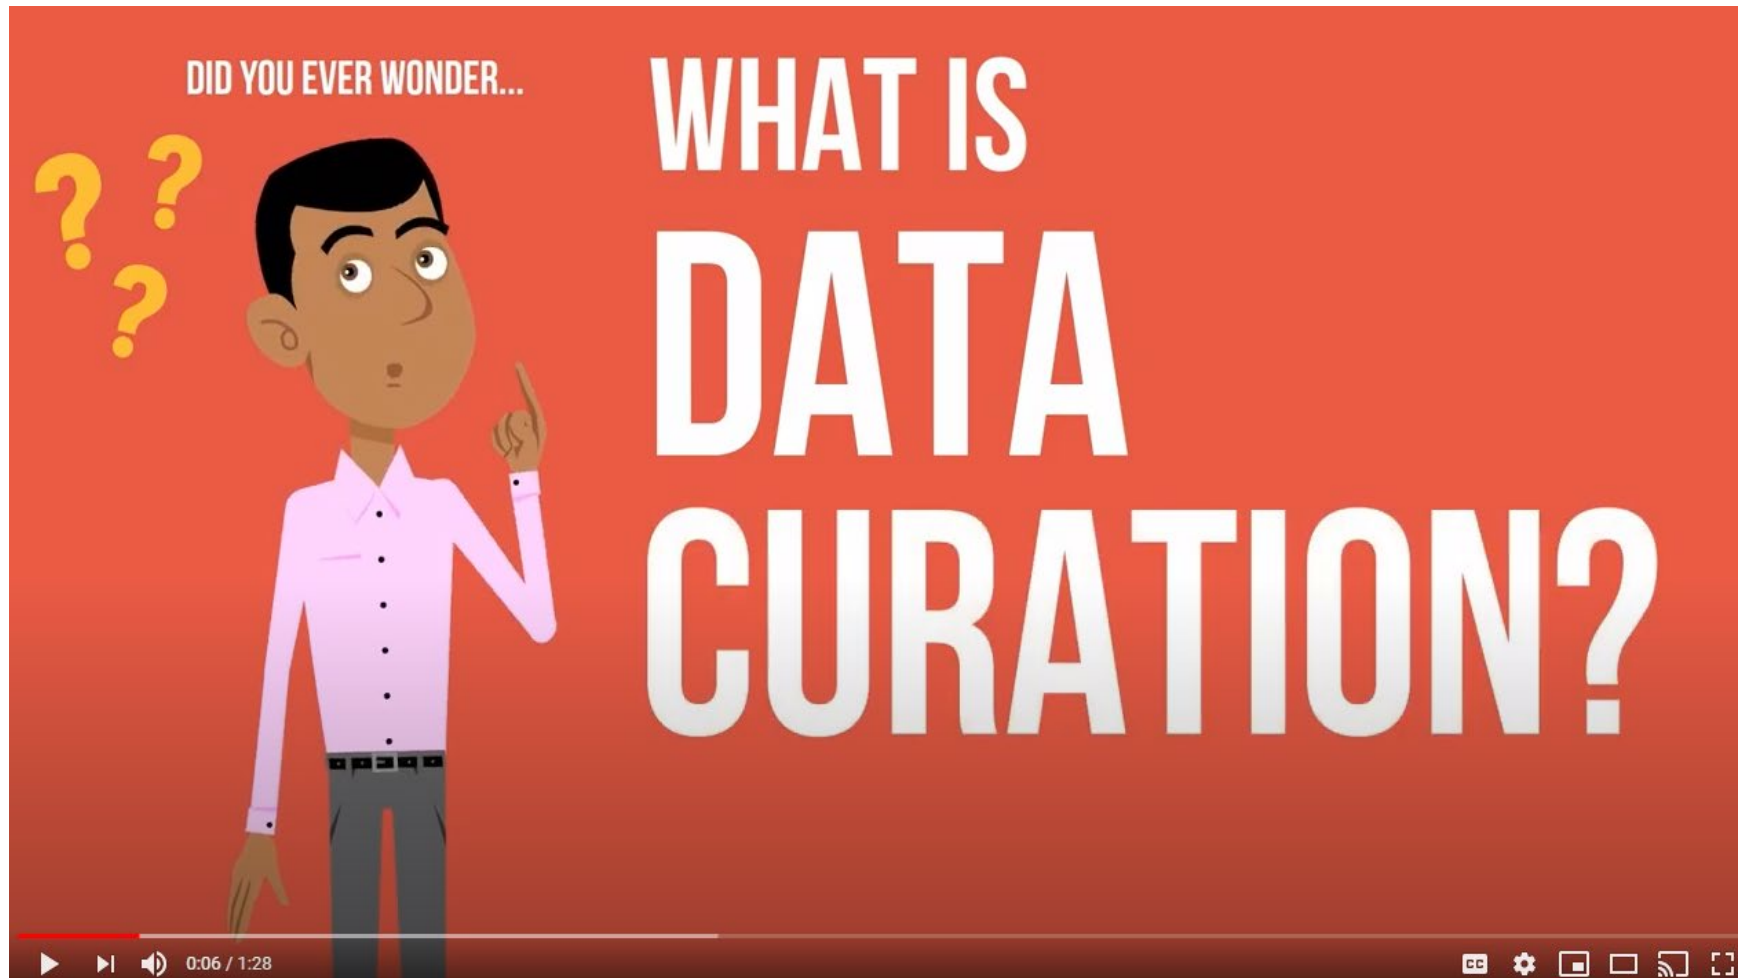

ICPSR welcomes and encourages deposits of digital data. Depositing data into ICPSR is free. Deposits are made using a secure data deposit form to describe the data collection and content.

PLEASE NOTE: If you receive an error message when logging in to make a deposit, please contact us (deposit@icpsr.umich.edu) and we will assist you.

Data quality matters

I can't share. My data's private

Why is the data private?

- Privately owned by third party, governed by NDA and/or RDUAs
- Researcher promised privacy to respondent/participant and/or IRB
- Data cover sensitive topic

Solutions

- Consent statements and RDUAs that permit sharing for reproducibility and research
- Share code, process for obtaining access
- Mask the data
- Restrict access
 - IRBs will often allow data sharing with restricted access, even when that was not explicitly permitted in research protocol

Recommended Informed Consent Language for Data Sharing

Language to Avoid

Promises in the informed consent can appear to limit an investigator's ability to share data with the research community. In reality, investigators can inform study participants that they are scientists with an obligation to protect confidentiality and still share the study data with the broad scientific community. Many effective means exist to create public-use data files or share restricted-use data files under controlled conditions. That is, data can be modified to reduce the risk of disclosure or shared with additional safeguards while preserving their value for science.

Model Language

Here are two model statements investigators may use in informed consents to describe protection of confidentiality that also allows data sharing.

Sample 1. Study staff will protect your personal information closely so no one will be able to connect your responses and any other information that identifies you. Federal or state laws may require us to show information to university or government officials (or sponsors), who are responsible for monitoring the safety of this study. Directly identifying information (e.g. names, addresses) will be safeguarded and maintained under controlled conditions. You will not be identified in any publication from this study.

Sample 2. The information in this study will be used only for research purposes and in ways that will not reveal who you are. Federal or state laws may require us to show information to university or government officials (or sponsors) who are responsible for monitoring the safety of this study. You will not be identified in any publication from this study.

Known Concerns and Recommended Alternatives

<https://www.icpsr.umich.edu/icpsrweb/content/data-management/confidentiality/conf-language.html>

Consent statements and sharing

Temptation is to promise that no one else will see the data

- Or even that the data will be destroyed
 - This is the direction GDPR has taken

Promise instead to create the most scientific impact while protecting confidentiality

- Separate and encrypt Personally Identifiable Information (PII)
- Restrict use to scientific and evidence-building purposes
- Never reveal information about individual or share with those who try to use to re-identify individuals

Safe data

Curation includes steps to create safe data

- Consistent with fitness for use

Criteria for evaluating data safety

- Living persons
- Vulnerable populations
- Expectations of privacy
- Data type and level
- Unit of analysis
- Sampling
- Longitudinal
- Availability
- Social relationships
- Geography
- Date specificity
- Sensitivity
- Small or distinct populations

Disclosure Risk Worksheet

Inter-university Consortium for Political and Social Research

<http://hdl.handle.net/2027.42/156095>

Downloaded from Deep Blue, University of Michigan's institutional repository

Methods for “anonymization”

- Aggregation
- Suppression
- Swapping
- Perturbation/noise infusion

Safe places

Secure online analysis

- Expensive to setup, but easy to access
- Requires confidence in automatic disclosure checks

Encrypted downloads

- Secure, local computing environments
- Training
- Restricted data use agreements
- Researchers do own disclosure review

Safe places

Virtual Data Enclave

- Secure, controlled computing environment
- Training
- Restricted data use agreements
- Third party disclosure review

Physical data enclave

- Secure, controlled physical and computing environment
- Training
- Restricted data use agreements
- Third party disclosure review

New resource!

ICPSR Student Data Sandbox

A special place for students to deposit their data for use by other students!
