

Supplemental Table 1. Outcomes of SARS-CoV-2 Positive Residents at 14 days

Outcome	SARS-CoV-2 Positive Patients (N=29)
Hospitalized – no. (%)	
Yes	11 (37.9)
No	18 (62.1)
Outcomes during hospitalization – no. (%) of hospitalized patients	
ICU stay	5 (45.5)
Mechanical Ventilation	1 (9.1)
Outcomes 14 days after positive test – no. (%) of all patients	
Remain at facility	15 (51.7)
Discharged (home or assisted living)	5 (17.2)
Remain hospitalized	2 (6.9)
Transferred to hospice	1 (3.4)
Deceased	6 (20.7)

Abbreviations: ICU, intensive care unit.

Supplemental Figure Legends

Supplemental Figure 1. Workflow diagram to implement point-prevalence SARS-CoV-2 batch testing of all asymptomatic residents in nursing homes (NH). This workflow required coordination between NH medical directors/administrators, local hospital leadership, hospital epidemiologist and hospital-based laboratory services. Lab indicates laboratory; STAT, immediately.

Supplemental Figure 1. COVID-19 Outbreak Batch Testing Pathway
