

Thank you to our 2020 Reviewers

Michael Balikhin¹, Michael Hickey², Natalia Ganjushkina³, Viviane Pierrard⁴, Paul Song⁵, Qiugang Zong⁶

¹ University of Sheffield, ACSE, Sheffield, South Yorkshire, UK

² Department of Physical Sciences & Center for Space and Atmospheric Research, Embry-Riddle Aeronautical University, Daytona Beach, FL

³ Department of Climate and Space Sciences and Engineering, University of Michigan, Ann Arbor, MI

⁴ Belgisch Instituut voor Ruimte-Aeronomie, Brussels, Belgium

⁵ Space Science Laboratory, Department of Physics and Applied Physics, University of Massachusetts Lowell, Lowell, MA

⁶ Institute of Space Physics and Applied Technology, Peking University, Beijing, China

The peer reviewer process is indispensable for a scientific journal to safeguard the highest standards and scientific integrity. The voluntary work of reviewers is vital to the peer review process and to the very existence of scientific journals. This year has been very challenging for all of us because of the pandemic. The normal everyday operation of our organizations has been disrupted, resulting in significant changes to our workload. In many regions, the functioning of schools and child care facilities have been affected, resulting in extra workload for parents. In addition, throughout this year we also faced significant concerns about the wellbeing and health of our friends and families. In spite of all these challenges, many experts in the field have sacrificed their own time to perform comprehensive assessments of the originality, methodology, reasoning, and significance of results for manuscripts submitted to the Journal of Geophysical Research Space Physics for publication. The Editors of the Journal of Geophysical Research Space Physics want to express our tremendous and sincere gratitude to everyone who served as a reviewer for the journal in calendar year 2020.

Thank you to the 1,397 reviewers who submitted 3,722 peer reviews in the journal last year. Individuals in *italics* provided three or more reviews for JGR: Space Physics during the year.

Aa, Ercha
Abadi, Prayitno
Abdu, Mangalathayil

This is the author manuscript accepted for publication and has undergone full peer review but has not been through the copyediting, typesetting, pagination and proofreading process, which may lead to differences between this version and the [Version of Record](#). Please cite this article as [doi: 10.1029/2021JA029311](https://doi.org/10.1029/2021JA029311).
