Realizing the Untapped Potential of VR/AR for Libraries

A RUSA Webinar
22 September 2021

Ken Varnum | University of Michigan
varnum@umich.edu | @varnum

A Bit About Me

- Senior Program Manager at the University of Michigan Library
- Previous experience at small academic, corporate, and special libraries
- Edited books focused on library technology
 - Top Technologies Every Librarian Needs to Know (2014)
 - Exploring Discovery (2016)
 - New Top Technologies Every Librarian Needs to Know (2019)
 - Beyond Reality: Augmented, Virtual, and Mixed Reality in the Library (2019)
- Editor of *Information Technology and Libraries*

Beyond Reality:

Augmented, Virtual, and Mixed Reality in the Library

Case studies about “Realities” in the Library

Plus a chapter on U.S. legal considerations

Topics today

- What libraries are doing today
- What we should keep in mind

DEFINITIONS

Definition: Reality

REALITY

The real-world services, tools, items, and interactions that humanity has grown up understanding, living in, and working with.

Definition: Augmented Reality (AR)

AUGMENTED REALITY

An enhanced version of reality created by the use of technology to overlay digital information on an image of something being viewed through a device (such as a smartphone camera)

EXAMPLES

Heads-up displays in cars, Pokémon Go, Layar, Google & Apple Translate tools

Definition: Virtual Reality (VR)

VIRTUAL REALITY

An artificial environment which is experienced through sensory stimuli (such as sights and sounds) provided by a computer and in which one's actions partially determine what happens in the environment

EXAMPLES

\$\$\$ Oculus (Rift or Quest), HTC Vive, Sony Playstation VR

¢¢ Google Cardboard

Mixed Reality: The Entire Continuum

The continuum of experience that extends from slightly augmented experiences to something completely virtual.

STARTING POINTS

Provide the Experience — Entry Level

Headset:

Google Cardboard & a smartphone

Content from lots of sources

I like the *NY Times* VR experiences,
but there are many.

https://www.vice.com/en_us/article/539epa/google-cardboard-mars-vr

Provide the Experience — Virtual Library in the Community

Put your library's local history into the community

Have a historical image collection?
Geotag it so that users can see what the street looked like “back then”

Add information about historical figures to places they lived, worked

https://www.vice.com/en_us/article/539epa/google-cardboard-mars-vr

Provide the Experience — High End

Headset: HTC Vive, Oculus Rift, etc.

Dedicated space (6' x 5')

Dedicated hardware

Virtual Meeting Space — We're Suddenly There

Anybody recognize this virtual world?

Way for library patrons to meet virtually -- job interviews, education

So many social norms for the majority of us to figure out

https://upload.wikimedia.org/wikipedia/commons/c/c6/Second_Life_11th_Birthday_Live_Drax_Files_Radio_Hour.jpg

CONSIDERATIONS

Practical Considerations

Budget

Space -- we will be back together one day

Training (library staff & library users)

Security

Staying up to date

VR can make some users motion sick; hasn't been completely solved

Social Considerations

Augmented, Virtual, Mixed Reality - this is all new

Digital divide could grow even greater

Common sense a great guide

Legal Considerations

A great deal about intellectual property law and virtual reality not yet decided (legally)

Many parallels to 2D image and print world

Who owns rights to one's digital avatar, digital creations?

What can be included in a created virtual space?

How do legal considerations change if the library is “publisher”?

**{ DYSTOPIA
or
UTOPIA }**

Dystopian or Utopian?

We've seen movie examples of virtual reality used for better and/or worse.

- *The Matrix*
- *Avatar*
- *Ready Player One*

As a species, we excel at taking technologies to extremes

Anything good (or bad) we do in the real world WILL happen in the virtual

People are people: any challenges you might have with library users in the real world will have a virtual

Extended Reality Is Here — It's Just Not Evenly Distributed. Yet.

However it shapes up, augmented & virtual reality are that: reality

A lot to figure out

But so many opportunities to take part and expand the library's presence

Thank You

Ken Varnum
