Significant findings

- **CAL** range: 0-9mm
- **PD** range: 1-10mm
- **BOP**: 100%
- **Furcation Involvement:**
- **Vertical bone loss:**
- **Radiographic bone loss:**
- **Mobility:**

Patient # 8

- 24-year old, Caucasian male.
- Denies history of tobacco or drug use.
- Chief complaint: "my gums are bleeding".

IP CAL range: 1-7mm
PD range: 1-8mm
BOP : 67%

Furcation Involvement:
Radiographic bone loss:
Vertical bone loss:
Mobility:

Significant findings

- **PD** range: 1-8mm
- **BOP**: 67%
- **Furcation Involvement:**
- **Vertical bone loss:**
- **Radiographic bone loss:**
- **Mobility:**

Patient # 9

- 27-year old, Caucasian male.
- No history of any systemic disease.
- Denies history of tobacco or drug use
- Chief complaint: "I might have some mobile teeth"

IP CAL range: 2-20mm
PD range: 2-15mm
BOP : 100%

Furcation Involvement:
Radiographic bone loss:
Vertical bone loss:
Mobility:

Patient # 10

- 47-year old, Caucasian male.
- Cigarette smoking: 15/day.
- Denies history of tobacco or drug use
- Chief complaint: “I was told that I need treatment for my gum diseases.”

CAL range: 5-16mm
PD range: 1-15mm

Furcation Involvement:
Radiographic bone loss:
Vertical bone loss:
