Objectives:

1. To gain understanding of how local anesthetic dose administered is tracked in the operating rooms, and how this process could be improved upon for patient safety
2. To reduce the risk of local anesthetic toxicity in the operating rooms
3. To promote communication between operating room providers and awareness of the dangers of local anesthetic systemic toxicity

GOALS:

1. To develop a protocol for local anesthetic dose tracking in the operating room
2. To implement and study this protocol

Assessments:

A written summary of the capstone experience

Distribution of Student's Time: 100 % Independent Study

Course Description:
