

Table S1 (Supplementary): Simulation results for assessing sensitivity to sample size and inter-arrival times. Sel = proportion of simulations in which schedule was selected as best at end of study; Assn = average proportion of participants assigned to schedule during study; boldface text corresponds to operating characteristics corresponding to schedule with true DLT closest to target DLT probability of 0.25.

		Sched 1		Sched 2		Sched 3		Sched 4		Sched 5		Sched 6
