Section 1
INTRODUCTION

The Data Center at the University of Michigan Transportation Research Institute (UMTRI) has been engaged in the collection and analysis of traffic-related data sets for more than a decade. As the number of available data sets grows, however, the problem of knowing what information is available to help answer important questions and where this information is located becomes more and more acute. This report is part of a program to alleviate this situation by presenting a cross-referenced listing of information elements contained in data sets for the Fatal Accident Reporting System (FARS) for the nine-year period 1975 - 1983. These data sets are available at the Data Center through ADAAS (the Automated Data Access and Analysis System).

FARS, a computerized data base maintained by the National Center for Statistics and Analysis (NCSA), contains information on fatal traffic accidents occurring in the fifty states and in the District of Columbia. Each case in FARS documents a motor-vehicle traffic accident that resulted in a fatal injury to at least one person. The basic data for FARS are provided by the state police agencies and are augmented and formatted by analysts in each state.

The data made available to UMTRI each year are formatted into three or four distinct data sets for use with the ADAAS, and a printed codebook is generated to document all the information elements and individual code values contained in the data. The characteristics of each of the available data sets in the nine-year period 1975 - 1983 are shown in Table 1.

Unfortunately, any growing system must change yearly to incorporate new ideas and to correct past problems. These changes often result in redefining variables (i.e., information elements), changing variable names, or changing variable numbers. Analysts who are interested in pursuing problems in a multi-year framework are consequently faced with the problem of locating the variable that they desire for each year and performing a separate operation to extract the results that they require.

Table 1
 Characteristics of FARS Data Sets
 1975 - 1983

DATA SET NAME	DATA KEY NAME	NO OF RECORDS	NO OF VAR	BOOK NUMBER
1975 Version 43C				
Accident	FARS75AC	39,631	52	80-5
Vehicle	FARS75VH	64,871	113	80-5
Person	FARS75PR	106,330	135	80-5
1976 Version 25A				
Accident	FARS76AC	40,218	52	79-3
Vehicle	FARS76VH	65,223	113	79-3
Person	FARS76PR	107,027	135	79-3
1977 Version 21A				
Accident	FARS77AC	42,677	52	79-4
Vehicle	FARS77VH	69,941	113	79-4
Person	FARS77PR	112,614	135	79-4
1978 Version 126				
Accident	FARS78AC	44,921	52	80-3
Vehicle	FARS78VH	73,724	101	80-3
Person	FARS78PR	116,866	123	80-3
1979 Version 91				
Accident	FARS79AC	45,704	53	80-4
Vehicle	FARS79VH	74,629	112	80-4
Person	FARS79PR	116,488	134	80-4
1980 Version Jul2981				
Accident	FARS80AC	45,271	41	81-4
Vehicle	FARS80VH	63,467	87	81-4
Person	FARS80PR	113,264	105	81-4
1981 Version Jul1282				
Accident	FARS81AC	43,980	43	82-7
Vehicle	FARS81VH	62,666	100	82-7
Person	FARS81PR	112,403	122	82-7
1982 Version Jun2283				
Accident	FARS82AC	38,899	47	83-9
Vehicle	FARS82VH	56,190	125	83-9
Person	FARS82PR	101,499	152	83-9
2 Veh Acc	FARS82TV	13,520	257	83-9
1983 Version 090784				
Accident	FARS83AC	37,971	47	84-7
Vehicle	FARS83VH	55,099	125	84-7
Person	FARS83PR	99,304	152	84-7
2 Veh Acc	FARS83TV	13,238	257	84-7

To alleviate this problem, Section 2 contains a cross-reference listing of all major words used in variable names for the nine-year period. For each listed word, the full name of the variable containing

that word is given. To use this variable with the UMTRI data system, the variable number, the data key used to access the appropriate data through ADAAS, and the number of the corresponding data set codebook are also given. Using this guide to look up the the word "RESTRAINT," for example, it can be determined that Variable 207 ("PASSIVE RESTRAINT") in the 1977 person file and Variable 312 ("AUTOMATIC RESTRAINT SYSTEM") might contain similar information.

Section 2
DICTIONARY CROSS REFERENCE

Tables 2 through 25 give the cross reference listing. A separate table is used for each letter beginning a word. The tables contain five entries:

- Item - The word to be searched for;
- Variable Name - The full name of the variable that contains the desired word;
- Var# - The number of the variable;
- Key - The ADAAS data set descriptor for the data set that contains the desired variable;
- Book - The number of the ADAAS codebook that documents the variable.
