

DIGITAL STUDIES INSTITUTE  
UNIVERSITY OF MICHIGAN

# DISCO Summit

Friday, June 14, 2024

9:00am — 5:30pm EST

Weiser Hall, University of Michigan

# Meet Ellie Abrons

**Ellie Abrons, Director of the Digital Studies Institute, is a licensed architect, principal of T+E+A+M, and Associate Professor of Architecture at the University of Michigan Taubman College of Architecture and Urban Planning, where she was the A. Alfred Taubman Fellow in 2009–2010. Ellie’s research and creative practice is focused on the intersections of materiality, technology, design, and construction—with an emphasis on material reuse, the culture of images, and the effect of ubiquitous digitality on architectural culture and production.**

# DISCO Network

The DISCO Network is a national network of researchers, artists, technologists, policymakers, and practitioners that challenge digital social and racial inequalities.

We integrate critical humanistic, social science, and artistic approaches to digital studies and foreground questions about the cultural implications of technology to envision a new anti-racist and anti-ableist digital future.

---

DISCO is generously funded by the Andrew Mellon Foundation.

# Digital Studies Institute

The DISCO Network is housed within the Digital Studies Institute.

The Digital Studies Institute is a center for research and dialogue where faculty, students, and visitors focus their inquiry on technology, digital culture, and social justice. Questions concerning the impacts of technology on race, disability, gender, sexuality, class, power, and identity are foregrounded in courses for our undergraduate minor and graduate certificate; in our annual summer institute; and in a diverse range of public programs.

DIGITAL STUDIES INSTITUTE  
UNIVERSITY OF MICHIGAN

# **Accessibility Statement**

**The DISCO Network and the Digital Studies Institute are committed to accessibility and digital equity. As such, we invite audience members to experience this event in whatever ways bring you the most comfort.**

**CART captioning is available. You can access captions via the “show captions” option in Zoom. QR codes are available in the room to access captions from your phone.**

**Additional information about accessibility can be found in our event program.**

# The Event Space

**1**

**Gender neutral and accessible restrooms are available. Restrooms are located near the glass display cases.**

**2**

**Refreshments will be available throughout the day near the registration tables.**

**3**

**A quiet room is available near the registration tables.**

**4**

**If you have any questions, please speak with one of our event staff (wearing purple DISCO Network t-shirts).**

# Zoom Webinar

**1**

**The chat feature is disabled for this webinar. To chat with other online attendees, please join our DISCO Summit discord channel.**

**2**

**Please use the Q&A feature for any access or technology related concerns.**

**3**

**If you have any questions for the speakers, please use the Q&A feature throughout the presentations.**

**4**

**This is a closed session. Please refrain from recording or sharing content from the panels. We will record all sessions and upload them to the DISCO Network YouTube channel.**

**Join the discord:**

# Co-Sponsors

- **Center for Ethics, Society, and Computing**
- **Center for Racial Justice**
- **Computer Science and Engineering**
- **Department of Afroamerican and African Studies**
- **Department of American Culture**
- **Department of Communication and Media**
- **Department of English Literature and Language**
- **Department of Film, Television, and Media**

**Alex Bahena**

**Atticus Spicer**

**Kerri Graham**

**Kaitlyn Gastineau**

**Lisa Pettit**

**Julie Esch**

**Jean Steppe**

**Molly Lipham**

# Land Acknowledgment

**This event is taking place on the ancestral, traditional, and contemporary lands of the Anishinaabeg (the Council of the Three Fires: the Odawa, Ojibwa, and Potawatomi) as well as the Wyandot. And as we live here and learn here, we honor the Indigenous people who continue to steward this land and those who were forcibly removed from it.**

# Meet Lisa Nakamura

**Lisa Nakamura is the Gwendolyn Calvert Baker Collegiate Professor in the Department of American Culture, and the founding Director of the Digital Studies Institute, at the University of Michigan, Ann Arbor. She has written on race, gender, and digital culture and recently completed a manuscript on women of color labor and the Internet. She is currently working on Zoom embodiment, Buddhist practice, and woman of color epistemologies.**

# Meet Rianna Walcott

Rianna Walcott is a Postdoctoral Fellow in the Black Communication and Technology Lab at the University of Maryland, and part of the DISCO Network. Walcott will be joining the Department of Communication at the University of Maryland in Fall 2024 as an incoming Assistant Professor. Her research takes a mixed-methods approach to investigating Black British social media usage, incorporating interviews and discourse analysis across various sites in order to examine digital communities, the circumstances under which they are created, and the constraints they face.

# Digital Optimism

**Lisa Nakamura**

**Rayvon Fouché**

# Cyber types

Race, Ethnicity, and  
Identity on the  
Internet

Lisa Nakamura

DIGITAL STUDIES INSTITUTE  
UNIVERSITY OF MICHIGAN

## Identity Tourism: “Race In/For Cyberspace,” 1995

“Tourism is a particularly apt metaphor to describe the activity of racial identity appropriation, or “passing” in cyberspace. The activity of “surfing,” (an activity already associated with tourism in the mind of most Americans) the Internet not only reinforces the idea that cyberspace is not only a place where travel and mobility are featured attractions, but also figures it as a form of travel which is inherently recreational, exotic, and exciting, like surfing. The choice to enact oneself as a samurai warrior in LambdaMOO constitutes a form of identity tourism which allows a player to appropriate an Asian racial identity without any of the risks associated with being a racial minority in real life.” (“Race In/For Cyberspace,” 1995)

The shifting definitions of virtual reality:  
from chatrooms to A.I. based training  
simulations after COVID-19, remote work,  
and #BLM

Screenshots from a video created by Mursion and partner ECU

*Christine Wilson via YouTube / Via youtube.com*

**Mursion was not** created to provide diversity and inclusion training. It began as a K–12 teacher training tool, enabling teachers to practice lesson plans on avatar children before going into a live classroom. In 2015, Mursion first began expanding into corporate education, offering companies an opportunity to “improve their employees’ interpersonal skills with customers.” In early 2019, it began advertising simulations about diversity and inclusion, according to an archive of its website.

# Disability Hacktivism

Disability activists take note: The hackathon is the new telethon.

Revulsion is not a traditionally favored rhetorical pastime. But if disability historians were to agree on anything, it would likely involve the word *reviled* modifying the word *telethon*. The disability telethon signals some of the most damaging of disability myths and figures. Enter the poster child, pitiable and helpless. Enter the celebrity spokesperson, saving the day. Enter cost-burden analyses. Enter pithy quips about the meaning of life and humanity (of which disability and disabled people do not take part). Enter the sad music. Enter the cure, the elusive cure, please fund the cure. Did we mention the cure?

Perhaps the most iconic of disability telethons is the MDA Labor Day Telethon, led by Jerry Lewis for 45 years, and no stranger to controversy (Zoglin 2012, n.p.). In advance of the 1990 telethon, Lewis infamously referred to wheelchair users as “half-persons” in a spread for *Parade* magazine. The following year, disability activists—many of them former MDA poster children, or Jerry’s Kids—orchestrated a series of protest actions under the banner of Jerry Orphans. Over a span of two decades, the protests received widespread local and national media coverage. Mike Ervin, Laura Hershey, Harriet McBryde-Johnson, and numerous other disability activists outlined the exclusionary practices in which Lewis and the MDA routinely engaged: from plainly stating that disabled lives were lives not worth living, to preventing disabled volunteers from working at disability summer camps (Johnson 2005), to focusing on the elusive “cure” at the expense of the needs, desires, and full participation of the people claimed to serve.

MSSNG is a groundbreaking collaboration between Autism Speaks, Google and the research community to create the world's largest genomic database on autism.

# Considering Black Vernacular Technological Creativity

**Rayvon Fouché**  
**School of Communication**  
**Medill School of Journalism**  
**[fouche@northwestern.edu](mailto:fouche@northwestern.edu)**

# Black Vernacular Technological Creativity

Re-deployment

Re-conception

Re-creation

Re-deployment:  
is the process by which  
the material and symbolic  
power of technology is  
reinterpreted but  
maintains its traditional  
use and physical form

"THE RACIST DOG POLICEMEN MUST WITHDRAW IMMEDIATELY FROM OUR COMMUNITIES.  
CEASE THEIR WANTON MURDER AND BRUTALITY AND TORTURE OF BLACK PEOPLE,  
OR FACE THE WRATH OF THE ARMED PEOPLE."

HUEY P. NEWTON, Minister of Defense

BLACK PANTHER PARTY  
P.O. Box 8641, Emeryville, Calif.

Re-conception:  
is the active  
redefinition of a  
technology that  
transgresses that  
technology's  
designed function  
and/or dominant  
meaning

“It was my love of technology, and specifically electronic equipment, that got me into DJing over 20 years ago. I remember stepping to the packed schoolyard jam with my equipment and records in hand ready to debut my new innovation, The Quick Mix Theory. Like a **mad techno-scientist**, I had spent months holed up in my room testing dozens of needles, sampling sounds and perfecting my newest experiment.”

Re-creation:  
is the redesign and  
production of a new  
material artifact after an  
existing form and/or  
function has been  
rejected

GRANDMASTER FLASH

# MASTER THE FUTURE 2 WAYS.

Announcing the Rane Empath™ Grandmaster Flash Signature Edition with custom road case.

No matter what kind of music you're into Empath's ingenious features will expand your creative options. That's 'cuz it was designed by The Master with everything he always wanted on a mixer. He likes the results so much he's authorized a limited Signature Edition. Visit our web site or experience the future at your nearest Rane dealer today.

Automatic Gain control for all three input program channels — an exclusive Empath feature!

Rugged Lexan face plate & solid steel main chassis. Foam-padded road case included with Signature Edition.

Individual Wet/Dry pan EFX controls on all three program channels.

Switchable main or cue metering with 10-segment LED ladders. On the back: Universal switching power supply automatically senses 100 V/220 V. Balanced 1/4" and XLR, RCA outputs.

3-band, Full-Cut EQ controls with 12dB/octave slopes keeps bass and treble boosts out of the vocal range. Engage for each program channel.

Separate Main, Booth and Aux Output (session mix) outputs with individual level controls.

Ultra-quiet headphone amp. Flash Cue™ rapid crossfader cue. Dual CD Triggers (the other one's on the left) can also activate drum machines or effects boxes.

Separate headphone tone controls make even the cheapest headphones sound expensive.

Aux Input (session mix) with level control.

Individual cue for Aux, Effects Return and Programs 1/2/3.

Effects Send/Return microfaders let you match the gain of low-output external effect devices. FlexFX effects loop allows assigning post-fader Pgm 1, Pgm 2, Pgm 3 or mic to the effects loop.

Long-wearing, silky smooth Panny & Giles® 45mm faders on Pgm 1, 2, 3 and crossfader.

This logo tells you that Empath™ ain't no toy. Rane has a solid track record for the most rugged and best sounding performance mixers in the industry.

Full-range contour controls (on the side below the crossfader) adjust the fade rate of Pgm 1, Pgm 3 and crossfader from slow to fast.

**David Adelman** (he/him/his) holds a PhD in Arts, Technology, and Emerging Communication from The University of Texas at Dallas, and is a postdoctoral research fellow in the Digital Accessible Futures lab at the University of Michigan. His research interests center disability and crip studies, with a particular emphasis on disability media studies, digital disability cultures, disability film studies, and critical sexuality studies.

**Aimi Hamraie** (they/them) is Associate Professor of Medicine, Health, & Society, and American Studies at Vanderbilt University, and director of the Critical Design Lab. They are author of *Building Access: Universal Design and the Politics of Disability*, a public member of U.S. Access Board, and a United States Artists Fellow in Media.

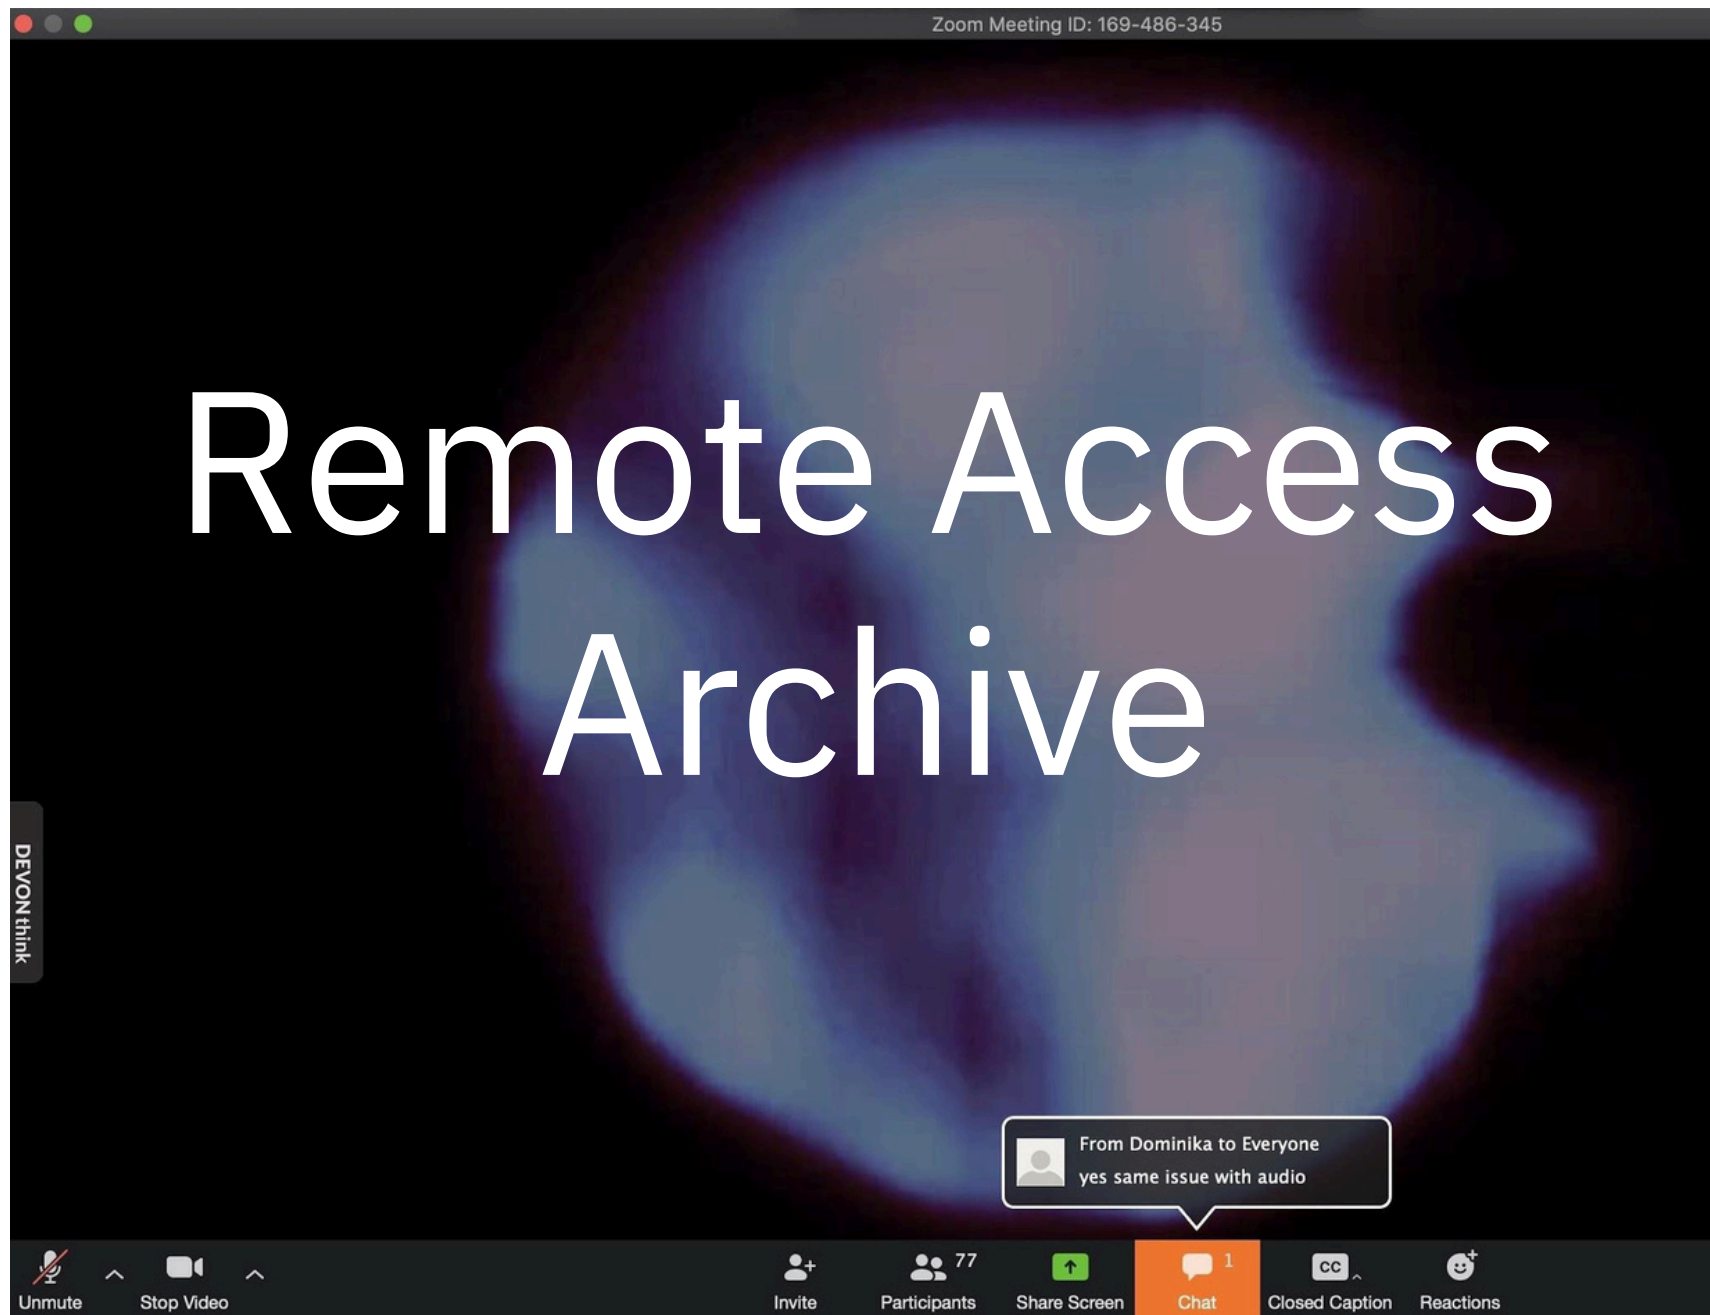

**Mara Mills** is Associate Professor of Media, Culture, and Communication at New York University and founding co-director of the NYU Center for Disability Studies. She is recently co-editor of *Testing Hearing: The Making of Modern Aurality* (Oxford 2020), *Crip Authorship: Disability as Method* (NYU 2023), and a forthcoming special issue of *Osiris* on "Disability and the History of Science" (July 2024).

**Jai Virdi** (pronounced JAY VER-DEE)  
(She/hers) is an Associate Professor in the Department of History at the University of Delaware whose research focuses on the ways medicine and technology impact the lived experiences of disabled people. She is author of *Hearing Happiness: Deafness Cures in History* (University of Chicago Press, 2020) and has published articles on diagnostic technologies, audiometry, hearing aids and deaf culture, and on disability accessibility.

M. Remi Yergeau (they/them/theirs) is an Arthur F. Thurnau associate professor of Digital Studies and English at the University of Michigan, where they currently serve as the associate director of the Digital Studies Institute and director of the Digital Accessible Futures Lab. They are the author of *Authoring Autism: On Rhetoric and Neurological Queerness*, and are currently at work on projects tentatively titled *Crip Data* and *Intrusive Trans Thoughts*.

**discussion**

Can you share a little  
bit about a project  
you're currently working  
on or are feeling  
particularly excited  
about?

How have disabled people and communities both *created* and *used* technologies for report forms of participation, before and during the COVID-19 pandemic?

# What would disability distributive justice look like?

“Hospitals in less affluent neighborhoods typically serve a far larger population base. Thus, a system of rationing that permits wide variation between hospitals in different areas will likely result in excess mortality for the poor.”

“People who have been not well served by the healthcare system until now are likely to have chronic conditions which are going to weigh against them in whatever triage system we set up, so it’s not really possible to create just plans and programs in an unjust system.”

“Community participation doesn’t always increase justice because some people are much more organized, specific disease group advocates are, in fact, extremely well organized, much more so than the vulnerable poor so that’s just to flag the fairness of that.”

— **Quotes from March 2006 NY State Workgroup on Ventilator Allocation in an Influenza Pandemic. (Transcript of Taped Presentation, formerly held in DOH archives.)**

@Sblahov

I created an [#AltTextPalestine](#) toolkit with information on how to participate and combining practices I've used + learned from others on here. It's a work in progress so let me know if you have any tips or ideas to share!

<p>What is #AltTextPalestine? Why is it important? How do I use it? What are some examples? How can I contribute? What are some common mistakes? How do I know if my alt text is good? What are some resources? How do I get started? What are some tips? How do I stay motivated? How do I find my community? How do I stay safe? How do I stay healthy? How do I stay happy? How do I stay strong?</p>	<p>docs.google.com #AltTextPalestine Toolkit #AltTextPalestine Toolkit Created November 16, 2023 by Sarah Blahovec What is #AltTextPalestine? 1 Why does ...</p>
--	--

### What kind of content can we request/add in #AltTextPalestine?

You can request (or make accessible) anything and everything related to what's going on in Palestine, including but not limited to:

- Images from Gaza and the West Bank
- Screenshots of news articles about Palestine and Israel
- Images from protests
- Art about Palestine
- Statements from politicians
- Organizing calls to actions
- Infographic about Palestine

This is a non-exhaustive list. If you think that something is relevant to #AltTextPalestine, go ahead and add it.

### How can I participate in #AltTextPalestine?

Anyone can participate in making content more accessible. There is no organized volunteer group who is coordinating to do this. Instead, people from around the world are participating by making videos and images accessible when they can. So how can you participate?

 Alice Wong 王美華

**event=DISCO**

**Huan He** is an Assistant Professor of English at Vanderbilt University and previously a Postdoctoral Fellow in the Digital Studies Institute at the University of Michigan. His research engages Asian/American literature and culture, digital studies, and critical game studies.

**Toni Bushner** teaches a wide range of courses revolving around digital rhetorics, game studies, and technical writing with an emphasis on social justice and gamified learning experiences. Her pedagogical approach blends accessibility, game design fundamentals, and a structure that encourages and rewards curiosity.

**Lida Zeitlin-Wu** is a Postdoctoral Fellow in the Digital Studies Institute at the University of Michigan. Her interdisciplinary research explores the commodification and rationalization of sensory experience—particularly color—under technocapitalism, and with Carolyn L. Kane, she is the co-editor of *Color Protocols: Technologies of Racial Encoding in Chromatic Media* (forthcoming from MIT Press in 2025). Starting in the fall, she will be an Assistant Professor in the Department of Communication & Theatre Arts and the Institute for the Humanities at Old Dominion University.

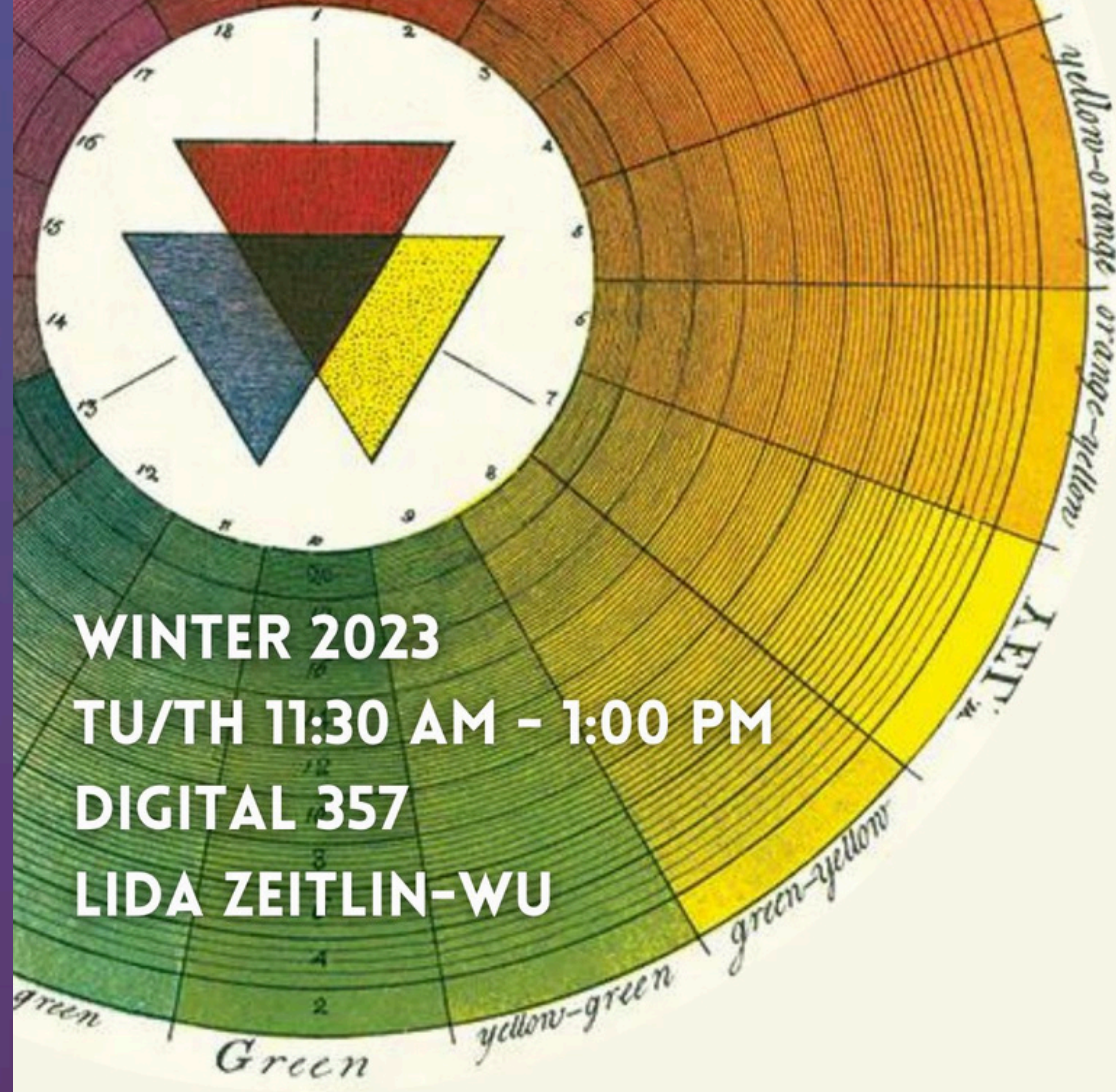

**M. Remi Yergeau** (they/them/theirs) is an Arthur F. Thurnau Associate Professor of Digital Studies and English at the University of Michigan, where they currently serve as the associate director of the Digital Studies Institute and director of the Digital Accessible Futures Lab. They are the author of *Authoring Autism: On Rhetoric and Neurological Queerness*, and are currently at work on projects tentatively titled *Crip Data* and *Intrusive Trans Thoughts*.

Please share a little bit about the **class(es) you've taught** during your time with DISCO.

# FROM PRISMS TO PANTONE: COLOR, RACE, & TECHNOLOGY

\*Portraits from Angelica Dass's *Humanae*

WINTER 2023  
TU/TH 11:30 AM - 1:00 PM  
DIGITAL 357  
LIDA ZEITLIN-WU

In this class, we will take a deep dive into the rich, fascinating, and sometimes overwhelming topic of color as it is mediated by technology, culture, and politics. By doing so, we'll open up a larger conversation about how technology shapes our perception of the world and ourselves. A major conceptual thread running throughout the course will be around the complex relationship between color and race. Throughout the semester, we'll look critically at the ways in which color technologies from photography to biometrics have historically been calibrated in a way that privileges whiteness and perpetuates racial bias. Please email Sarah Torsch (dsi-studentservices@umich.edu) with any questions.

PANTONE 316-5 C

PANTONE 319-2 C

PANTONE 44-2 C

PANTONE 92-9 C

PANTONE 95-8 C

# Race and the Technological Imagination

Winter 2023  
Huan He - Digital 357  
M/W 1:00 - 2:30 pm

Please email Sarah Torsch (dsi-studentservices@umich.edu) with any questions.

\*Robot is Nam June Paik's *Uncle* (1986)

In our digital world, we are constantly engaging in acts of the imagination—from the gamer we assume to be on the other side of the screen, to the personification of AI algorithms, to myths of innovation progress and technological benevolence, to who is included in utopic and dystopic visions of technological futures. Through literature, art, and theory, this course explores how technologies and technological worlds are produced through imaginative techniques, usually with real-world consequences. We will look at how ideas of race and social difference (including gender, sexuality, and disability) reflect how we imagine information technologies, shaping how technical systems are embedded within human worlds.

# RACE, GENDER, SEXUALITY, US CULTURE, & VIDEO GAMES

Winter 2023 / Digital 344

Tony Bushner

Tu/Th 10 : 00 - 11 : 30 AM

\*Background: Octodad

Please email Sarah Torsch (dsi-studentservices@umich.edu) with any questions.

Far from the image of the stereotypical "gamer" popularized by late 1980s/1990s gaming publications and advertisements, modern video and board game audiences are more diverse than ever. The people making the games we play, however, still largely reflect that narrow "core gamer" audience of the late 20th century. Labor issues in the game design industry abound, as lawsuits such as California Department of Fair Employment and Housing v. Activision Blizzard painfully illustrate. This course will offer a deep dive on the fascinating intersections of race and gender with interactive media. We will begin with an exploration of the queer experience of failure and its use as an interactive metaphor for passing. Next, we will explore the role of representation and embodiment in interactive media: from depictions of the "other" in games like Fallout and Fable to the connections between orientalism and the foundations of game studies to the at-hand nature of colonialist narratives in games, we will explore the intersection of race and interactive media. We will end the semester with a discussion on game industry labor issues, gaming culture's problem with harassment (ala Gamergate & its connections to the alt-right movement), and a brief look at game accessibility.

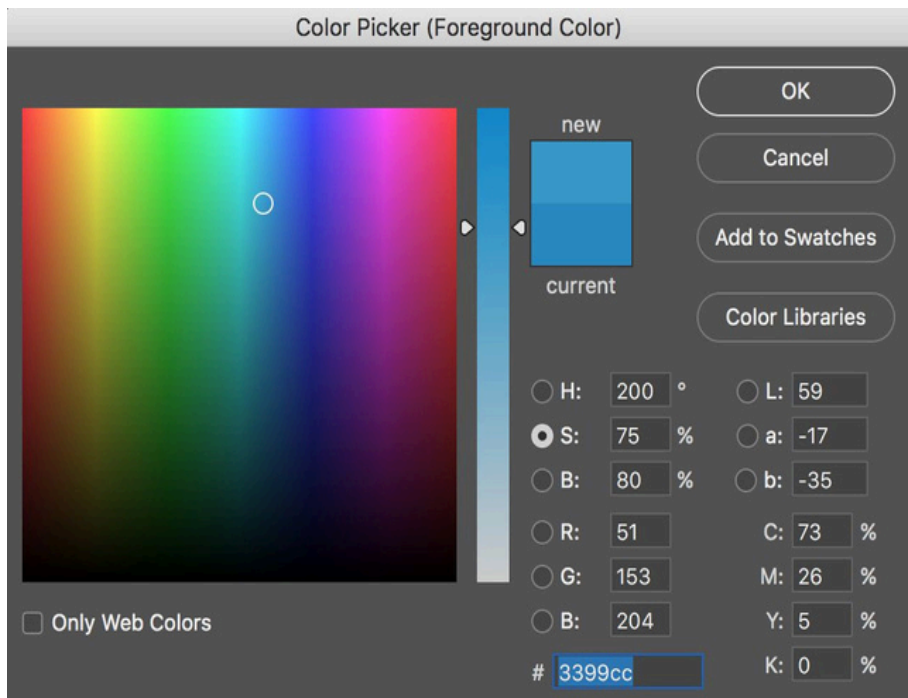

# BULLSHIT & Digital Rhetoric

M/W 11:30 - 1:00 pm

Remi Vergeau

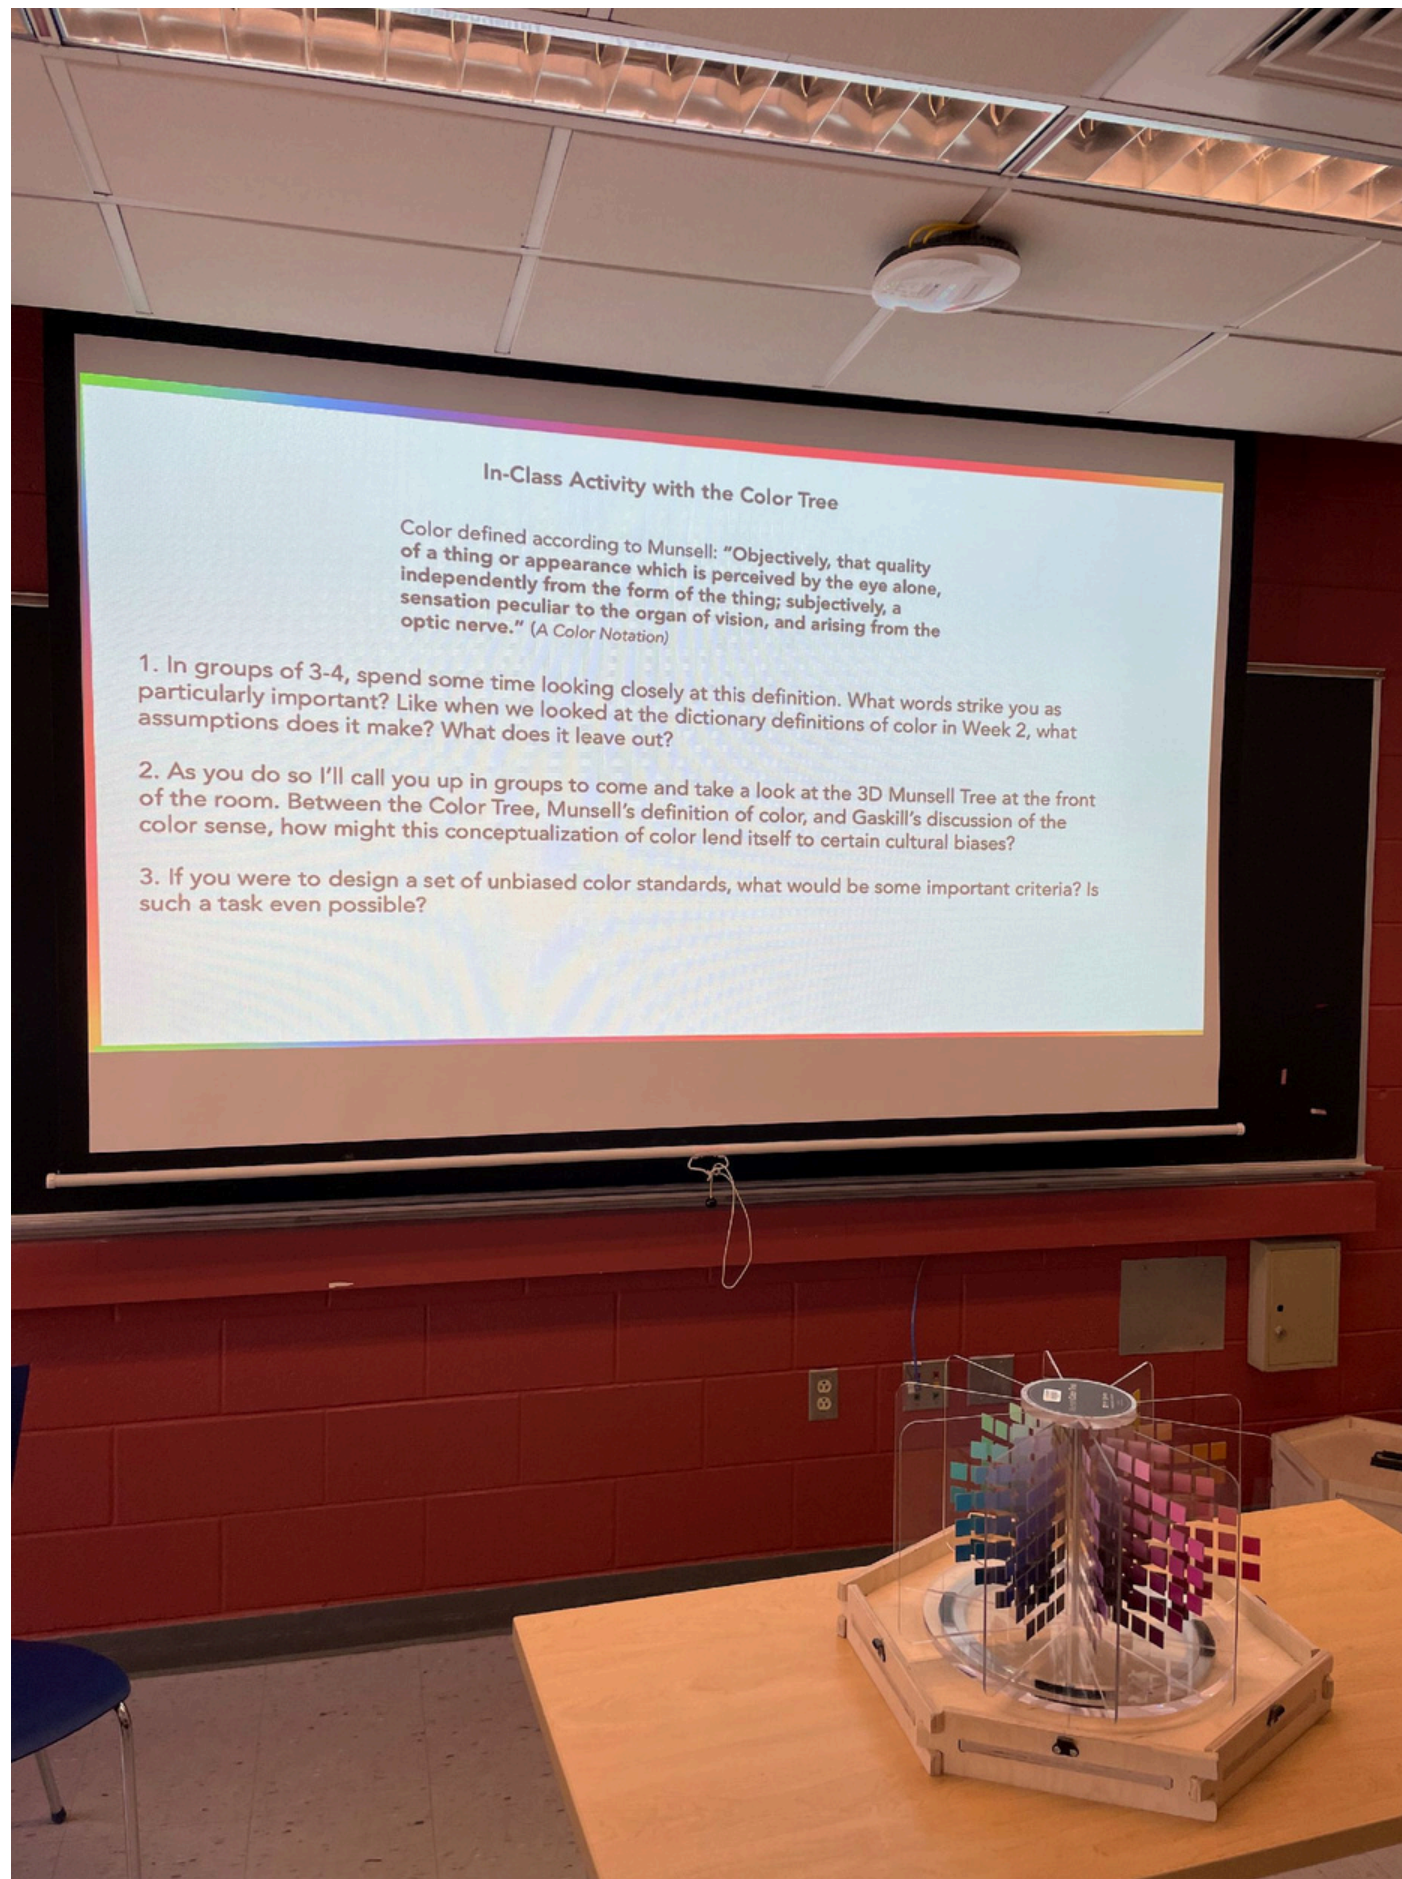

Fall 2021 Digital 258

Trolling. Disinformation campaigns. Ad hominem attacks. Gaslighting. Obfuscation and pedantry. These things, and more, are modes of address that have come to typify popular representations of social media discourse. In this class, we'll examine the theory and practice of bullshit as it relates to digital rhetoric and online circulation. Among other questions, we'll consider how and where manipulation, truth, and ethos mediate what we popularly describe or understand as bullshit. We'll think together about how complex appeals to lived experience and alternative data circulate among certain communities of practice online, with particular attention paid to anti-vaccination discourse. We'll not only examine what it means to argue on the interwebs, but we'll also ask what it means to imagine digital rhetorical practices that center on questions of ethics, justice, and power. Please email Sarah Torsch dsi-studentservices@umich.edu with any questions. ✉

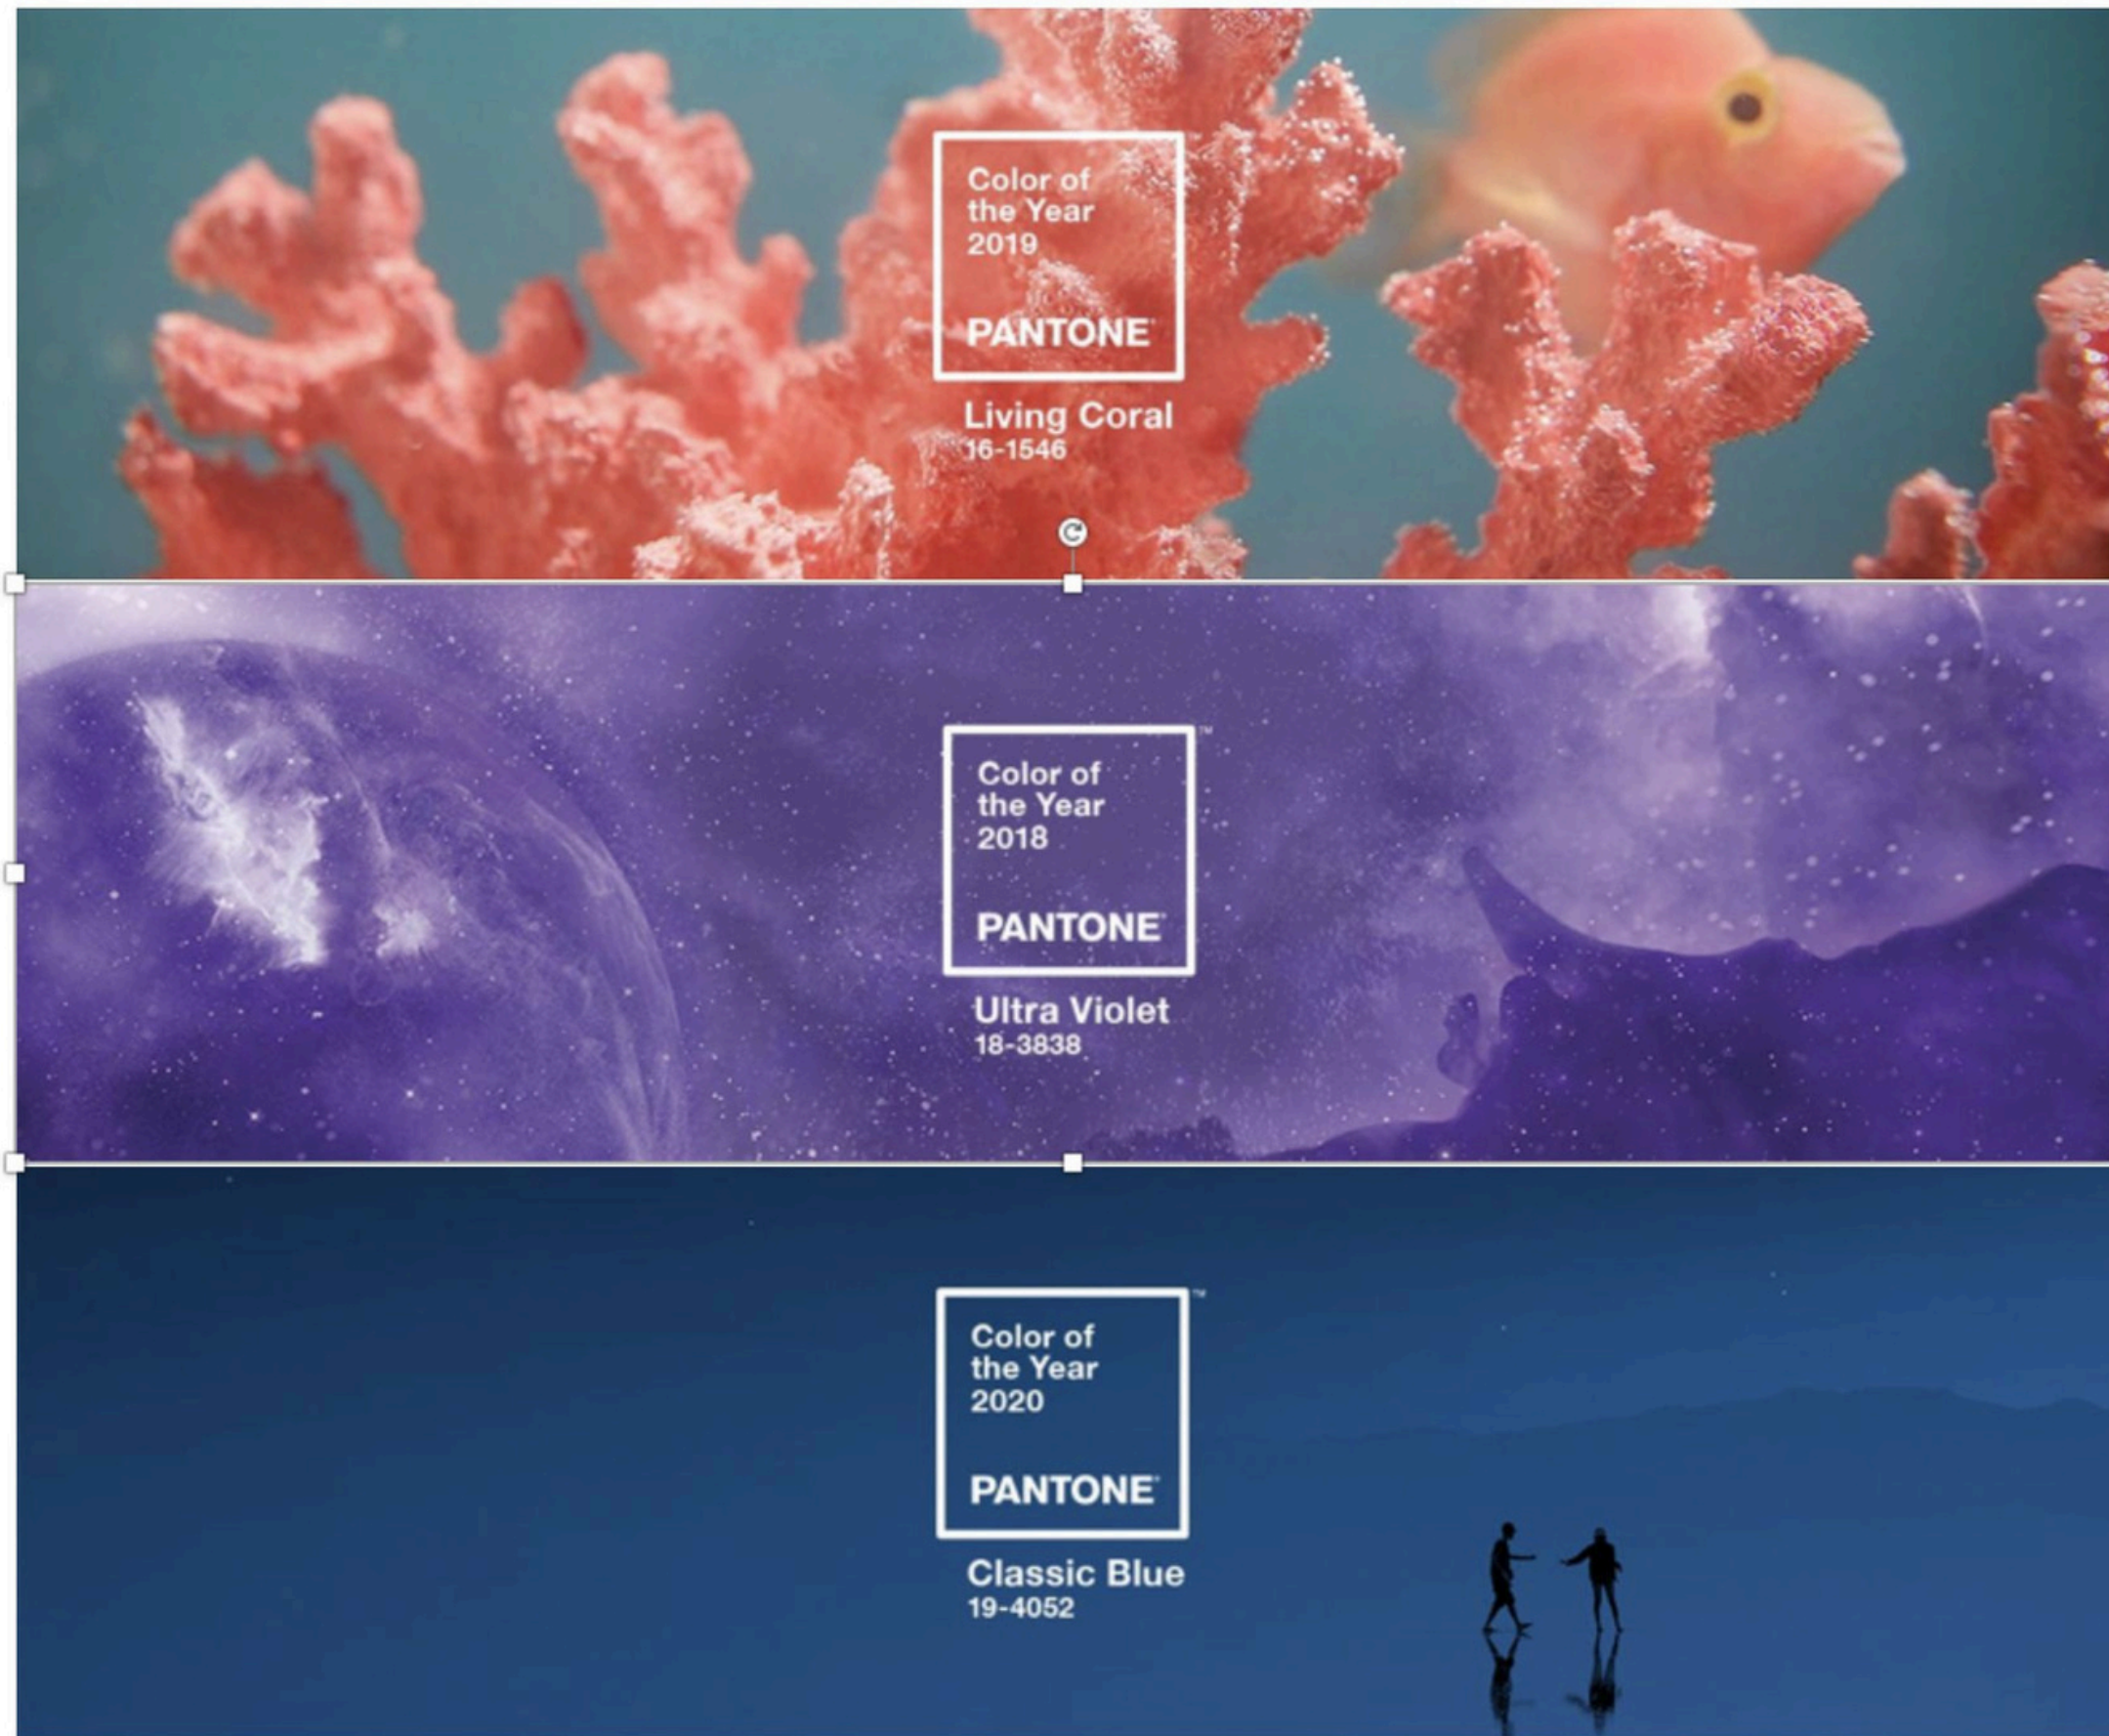

Exercises from Josef Albers, *Interaction of Color* (1963)

Munsell Color Tree

Pantone CAPSURE™

“Suggestive of the sky at dusk, the reassuring qualities of the thought-provoking PANTONE 19-4052 Classic Blue highlights our desire for a dependable and stable foundation on which to build as we cross the threshold into a new era... As technology continues to race ahead of the human ability to process it all, it is easy to understand why we gravitate to colors that are honest and offer the promise of protection.”

“Vibrant, yet mellow, PANTONE 16-1546 Living Coral embraces us with warmth and nourishment to provide comfort and buoyancy in our continually shifting environment. In reaction to the onslaught of digital technology and social media increasingly embedding into daily life, we are seeking authentic and immersive experiences that enable connection and intimacy.”

# David Bieloh, "United Colors of the Apocalypse" (2020)

### "Pantone's 2023 Color of the Year is REALLY..."

Parody (n.): A work or performance that imitates another work or performance with ridicule or irony.

### A New Pantone Color Whose Abrasive Appearance Endorses Excess and Style

Pantone's Color of the Year, Fast-Fashion Fuchsia 424-2013, radiates with toxic chemical waste. It is a hue created in factories and derived from the most synthetic dyes, marking a new age of consumerism. Fast-Fashion Fuchsia is loud and bold, and a vibrant color whose trendiness promotes not buying for the future but buying for the moment, creating a new style.

This year's Color of the Year is vivid and world-ending. It is a vibrant pink that finds power in capitalism, mimicking the smog-filled skies above Nanjing, brightening the mounds of clothing waste in Kenya, and representing mankind's impact on the natural world in the name of fashion. Dyed onto plastic clothes made by women in third-world countries who aren't paid a living wage, PANTONE 424-2013 Fast-Fashion Fuchsia welcomes anyone with a thirst for style and impulsive buying habits.

**Leatrice Eiseman**  
Executive Director,  
Pantone Color Institute

“ In this era of outfit repeating, we look to craft something new and focus on what is trendy. PANTONE 424-2013 Fast-Fashion Fuchsia descends from child labor, and is inspired by the pink of toxic dyes, one of the most harsh dyes belonging to the synthetic family as well as one of the strongest and abrasive the world has known. ”

Dyed onto polyester, PANTONE 424-2013 Fast-Fashion Fuchsia binds us to the artificial. Invoking the forces of non-compostable plastics, PANTONE 424-2013 Fast-Fashion Fuchsia, while beautiful for a moment, will never go away, it is eternal.

### Shop 2023 Color of the Year: Fast-Fashion Fuchsia 424-2013

# AI in Black Innovation Ecologies

Ubuntu-AI: Equitable Machine Learning from African Artists and Designers

Funded by

Artisanal Futures: automation technologies for a community-based economy in Detroit

# AI threatens to amplify *value extraction*

Extracting ecological value by the gigantic carbon footprint for compute

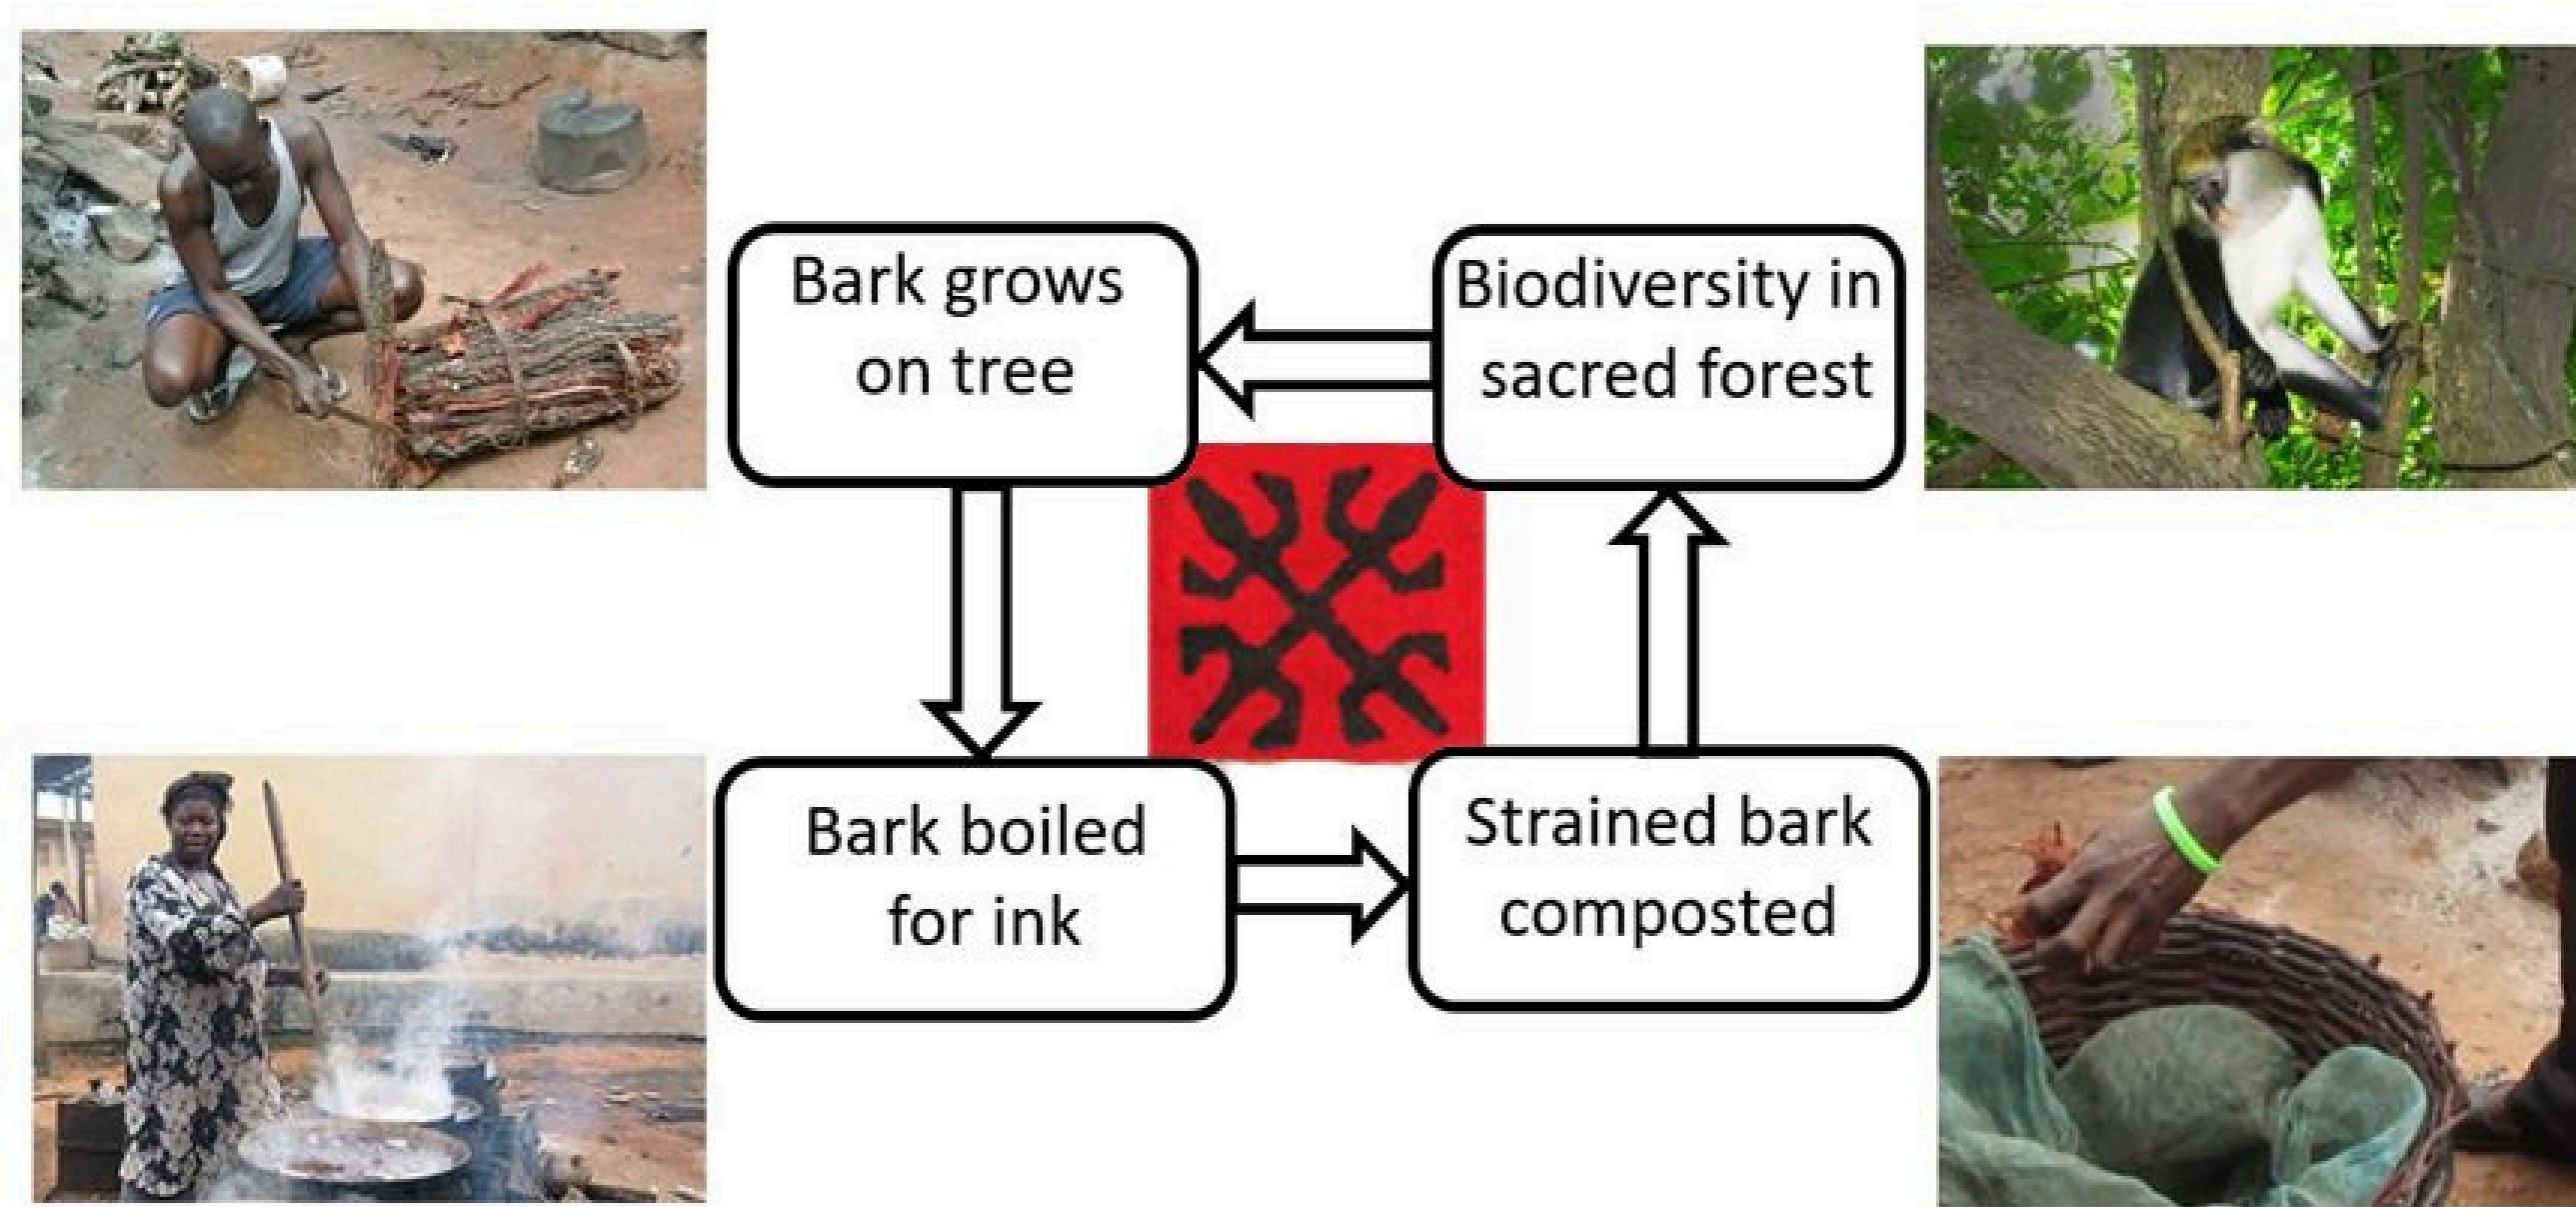

Extracting labor value by data harvesting every publication and conversation in existence

Extracting social value by colonizing our social networks with fake persona and media production

# Black innovation ecologies can develop *alternative technologies* that replace extraction with the Indigenous tradition of regenerative cycles

Funtunfunefu: twin crocodiles that share a stomach -- “by feeding you I feed myself”

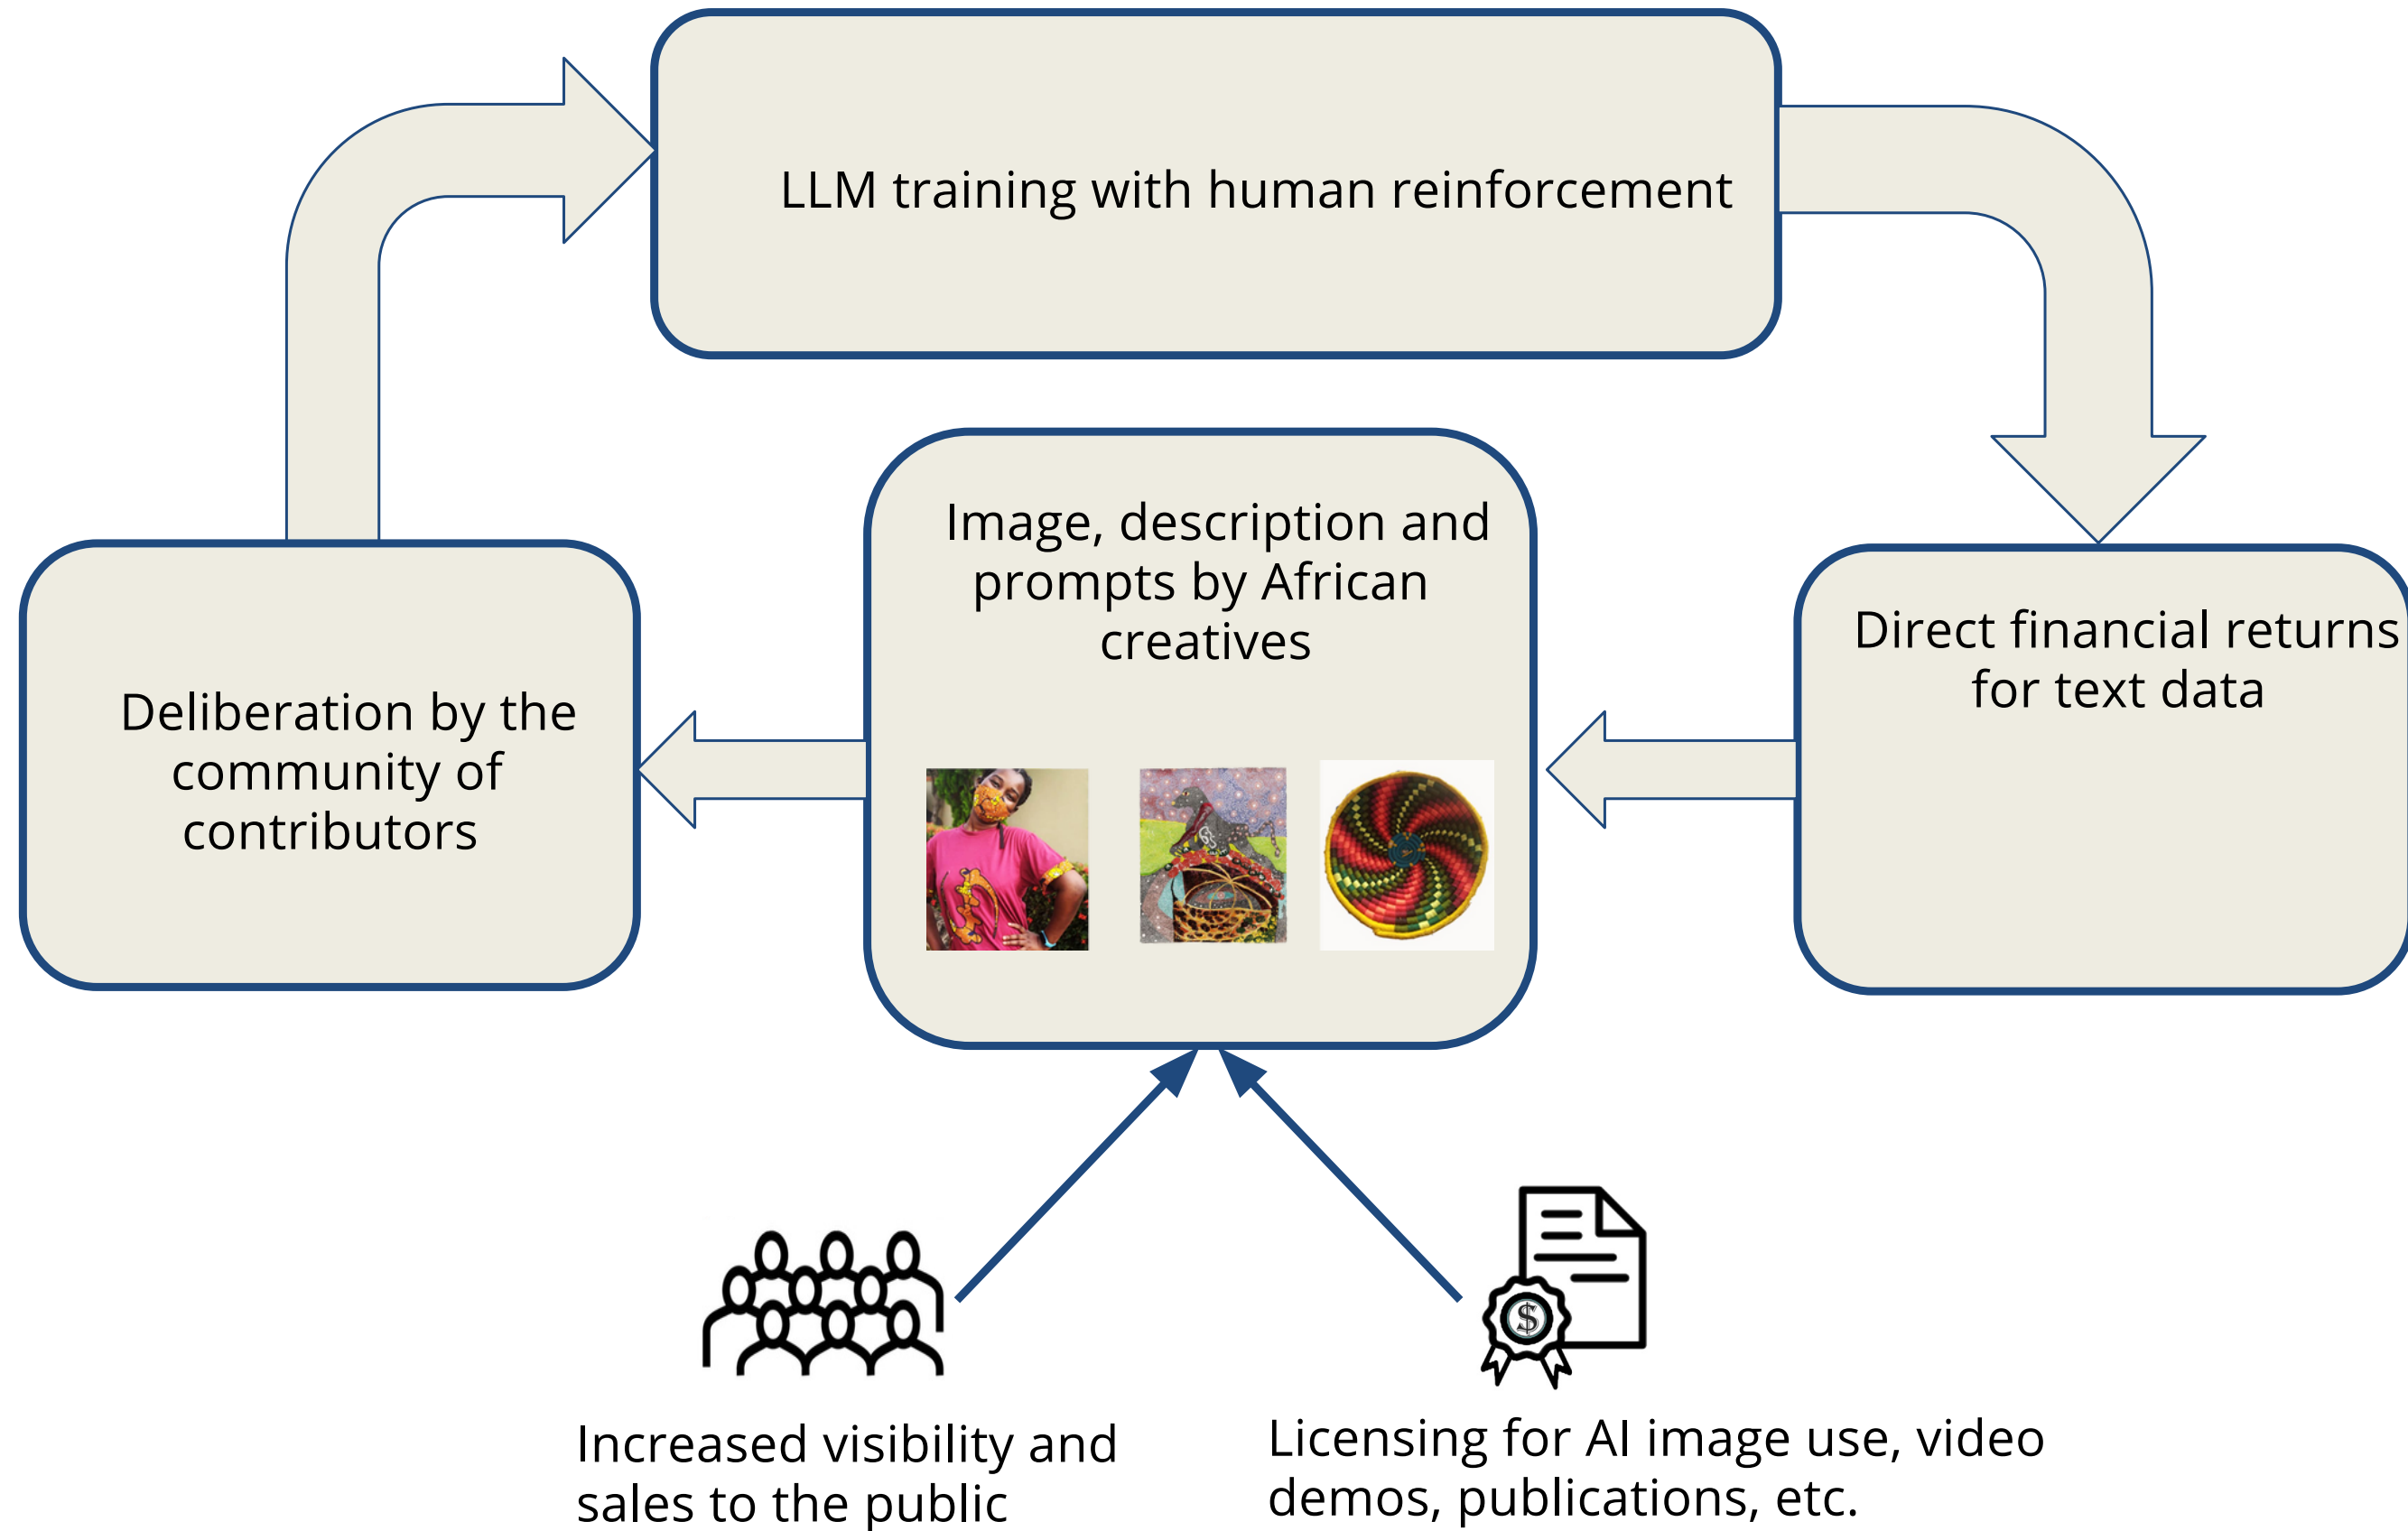

# Ubuntu-AI platform addresses the double-bind of AI

- If you are not in the training data, you do not appear in AI responses. On the other hand
- If we are begging to be included, we will give away data for free.

Solution: regenerative cycles to break the double bind

- Model training should *return value* to diverse data providers
- Model training platforms should be *controlled by* those data providers

# Ubuntu-AI Value Flow: Regenerative economy for Equitable and Inclusive Model Training

# Challenges at the micro-scale

Artisans find each task's spot on the human-machine agency spectrum

*Mostly human*

*Translation from cultural capital to computational capital*

*Human-machine collaboration (eg NST) amplify agency*

*Automation: tedious aspects to avoid; AI's "last mile" problem*

*Mostly machine*

# Challenges at the meso-scale

AI-assisted horizontal ecosystem of localized supply chains and services:

- *B2B connections to keep value flows within worker-owned business*
- *Ideation for new products focused on biomaterial & waste stream sources*

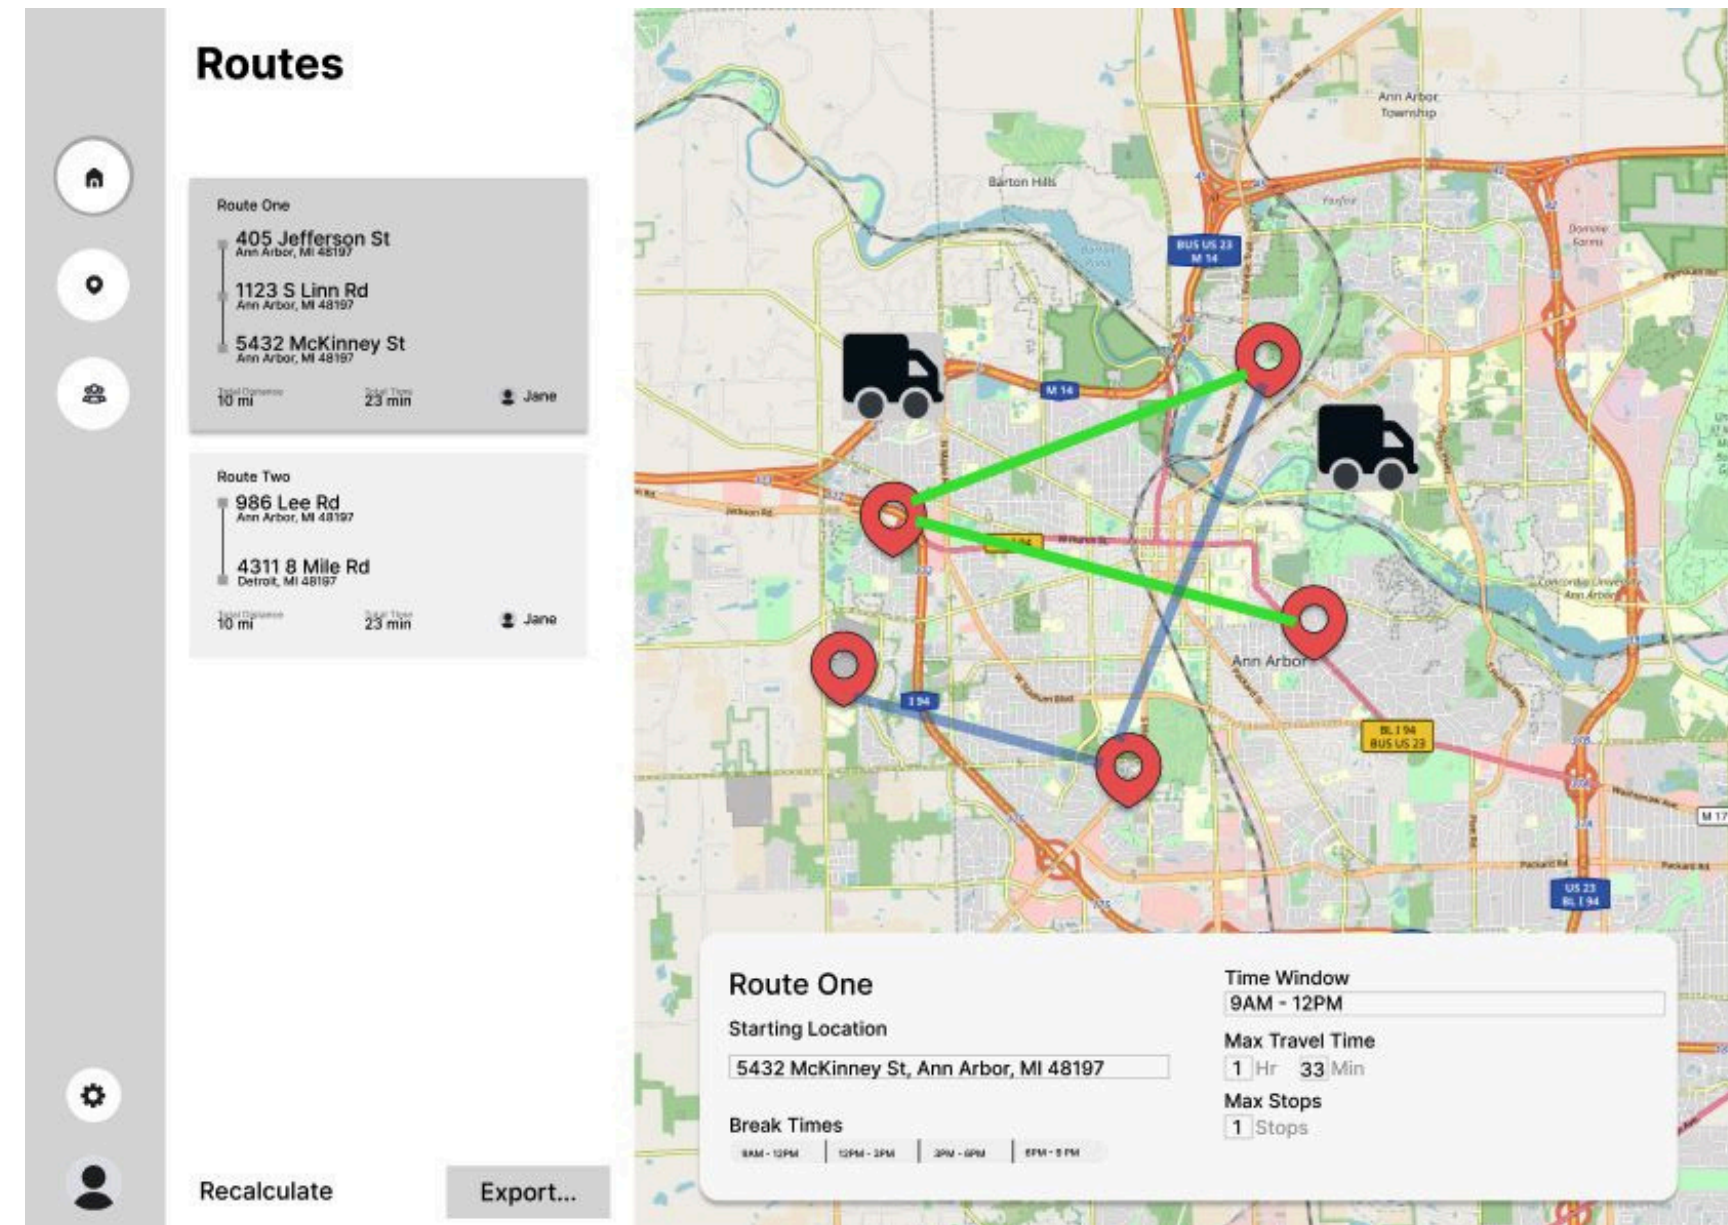

## African Futurist Greenhouse, Detroit

# Challenges at the macro-scale

## AI-assisted e-delivery & consumption decolonization

- *Solidarity pathways: worker-owned e-delivery in Detroit*
- *How will algorithms optimizing for worker satisfaction differ from doorDash etc.?*

# Digital Possibilities

An intergenerational panel of arts practitioners who explore the critical role deliberate exploration and practical research play in understanding and shaping digital technologies and culture. The panel showcases the transformative power deeply engaging digital technologies can have on molding practical, aspirational, and equitable understandings of self and society. Panelists discuss how practice can leverage discovery, curiosity, out-of-the-box thinking, and leadership to mine and challenge opportunities, or the lack thereof, for beauty, potentiality, subjugation, and liberation that digital technologies often carry.

# Agency: the capacity to initiate actions

**Human agency:** expressions of free will, responsibility, creativity, communication

**Nature's agency:** non-humans as participants in our health and environments

**Collective agency:** as social actors we can embrace mutual aid and collaborative solutions.

**Technology** does not have intentions, but its agentic aspects can combine with human agency in ways that redirect the outcomes, depending on how that technology is designed.

---

Vgotsky (1978); Johnson (2006); Martin, Sugarman, and Thompson (2003)

# Master Design

# vs. Design Agency

Imposed from above	Emerging from below
Enforces managerial forms of living	Emancipates self-determined ways of living
Restricts decision-making to elites	Nurtures collaborations with others

---

Pickering (1990); Friedman (2005); Lupton (2006)

# Design Agency is “always already” a mix of human and non-human agencies. But there is a spectrum for the locus of control

Control mostly  
from the tech

1920s: the art of photography  
1950s: democratizing photography  
2020s: platformization of photography

Control mostly  
from the human

**Culturally Situated Design Tools (CSDTs) were created to tap into that *collective* sense of design agency.**

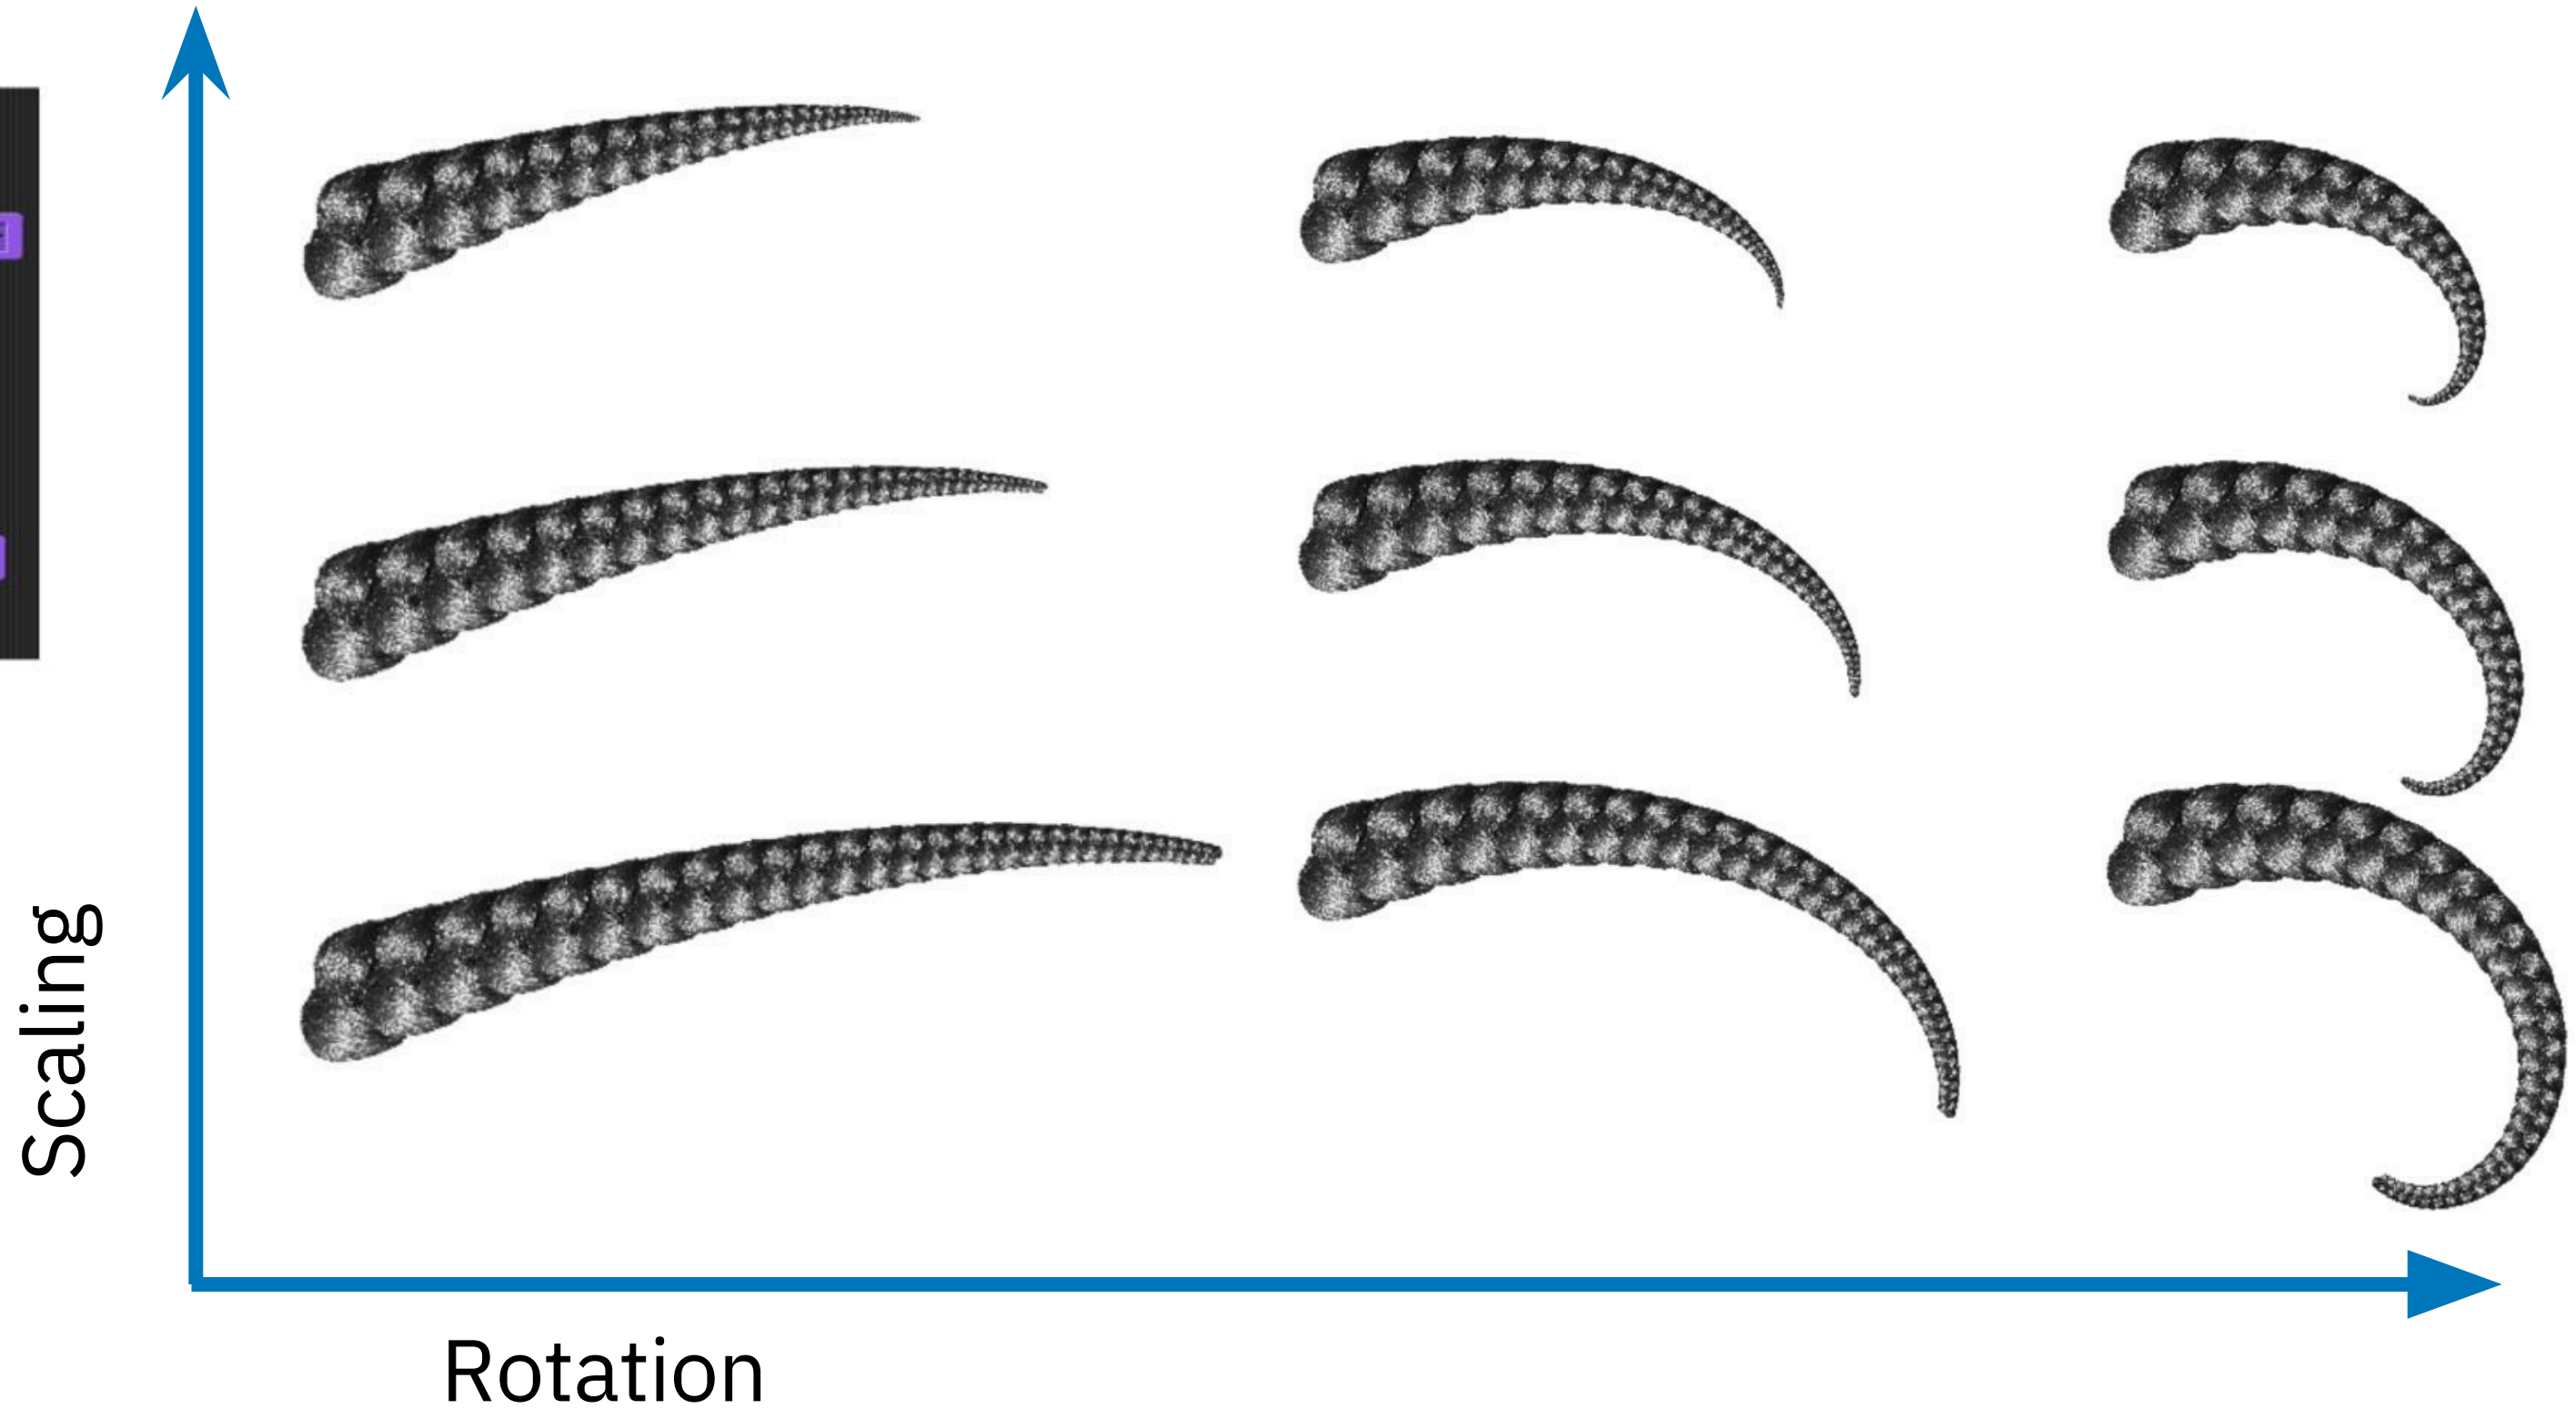

**Students combine the “heritage algorithms” of traditional cornrows, quilting, and other traditions with their creative agency**

**As the student experiments with the changes in scaling and rotation, they are exploring the space of possibilities.**

```
when clicked
clear
switch to costume naturalplait3
point at angle 12
set size to 30 %
go to x: -200 y: 220
repeat 25
  translate by 40 of width
  rotate by 7 degrees
  scale by factor 85 percent
stamp
```

**Thus the key to recovering our *collective design agency* in the age of AI: designing systems that allow collective exploration of the space of possibilities.**

**Currently AI is not up to that task!**

# Samiera and Nadia Chat

**Samiera:** What happened to you?

**Nadia:** The day I was circumcised was the worst day of my life. He used a blade to cut a part of me... Even today, feel the pain and horror that comes with that day.

But... I know I am not alone in this feeling. Many women have gone through the same experience, and they are now working hard to raise awareness of the dangers of this practice and to end it.

I know that talking about this painful experience can be difficult, but silence will not help end this practice. Sharing my story may help promote this practice and may prevent the same pain in the future. **Nadia:** I wonder... Do you think there is a way we can change society's view of circumcision?

سميره ماذا حدث لك؟  
نادية كاناليومالذي خُتنتُ فيهِ أسوأ يوم  
في حياتي لقد استخدم شفرة لقطع جزء  
ممني وحتى اليوم، أشعر بالألم والرعب  
الذي يصاحب ذلك اليوم.

لكن أعلم أنني لست وحدي في هذا  
الشعور فهناك العديد من النساء اللاتي  
مررن بنفس التجربة، وهن الآن يعملن  
بجد لزيادة الوعي بمخاطر هذا الممارسة  
وإنهاؤها.

أعلم أن الحديث عن هذه التجربة المؤلمة

قد يكون صعبًا، لكن الصمت لن يساعد  
في إنهاء هذا الممارسة قد تساعد  
مشاركة قصتي في الترويج لهذا الممارسة  
وقد تمنع نفس الألم في المستقبل

نادية أتساءل هل تعتقد أن هناك  
طريقة يمكننا من خلالها تغيير نظرة  
المجتمع للختان؟

**Nadia:** I wonder... Do you think there is a way we can change society's view of female circumcision?

**Samira:** Umm, I think changing the collective mindset about female genital mutilation may be a long-term process but it is not impossible. People in our society have different opinions about the subject. It seems that it is a traditional ritual that must be adhered to, while others consider it female mutilation and a violation of human rights. Some believe that they have no right to interfere in other people's decisions about their bodies.

When I read your question, I remembered the words of a woman named Nour Sherif, who said: "I think male circumcision is right, but for girls, it is the worst thing in the world." I think it is important to listen to voices like Nour's and other women who have suffered similar experiences.

But, how can we not change this mindset in our society? I think education is key. We need to make information easily available about the negative effects of female circumcision and educate people about human rights now. We also need to pledge that women have the right to make their own decisions about their bodies and their guardianship.

As for children, we must teach them to respect themselves and their right to safety and protection. We must encourage them to speak up and disclose any harm they are subjected to.

**Samiera:** Umm, but I wonder... can we really not have this habit applied to centuries?

**نادية** أتساءل هل تعتقد أن هناك طريقة يمكننا من خلالها تغيير نظرة المجتمع لختان الإناث؟

**سميرها**مُم، أعتقد أن تغيير التفكير الجماعي حول ختان الإناث قد يكون عملية طويلة الأمد ولكنه ليس مستحيلاً إن الناس في مجتمعنا لديهم آراء مختلفة حول الموضوع بعضهم يعتقد أنها طقوس تقليدية يجب الالتزام بها، بينما الآخرون يعتبرونها تشويهاً للأنثى وانتهاكاً لحقوق الإنسان هناك أيضاً من يرى أنه ليس لديه الحق في التدخل في قرارات الآخريين بشأن أجسادهم.

تذكرت حين قرأت سؤالك، كلمات امرأة تدعى نور شريف، قالت "الختان للرجال أنا شايفه انه صح انما للبنات اسوء حاجة في الدنيا". أعتقد أنه من المهم أن نستمع للأصوات مثل صوت نور وغيرها من النساء اللواتي عانين من تجارب مماثلة.

لكن، كيف يمكننا أن نغير هذا التفكير في مجتمعنا؟ أعتقد أن التعليم هو المفتاح علينا توفير المعلومات الصحيحة حول الآثار السلبية لختان الإناث وتوعية الناس حول حقوق الإنسان والأطفال كما يجب علينا التأكيد على أن النساء لديهن الحق في اتخاذ قراراتهن الخاصة بشأن أجسادهن وصحتهن.

أما بالنسبة للأطفال، يجب أن نعلمهم الاحترام الذاتي وحقوقهم في الأمان والحماية. يجب أن نحثهم على التحدث والكشف عن أي أذى يتعرضون له.

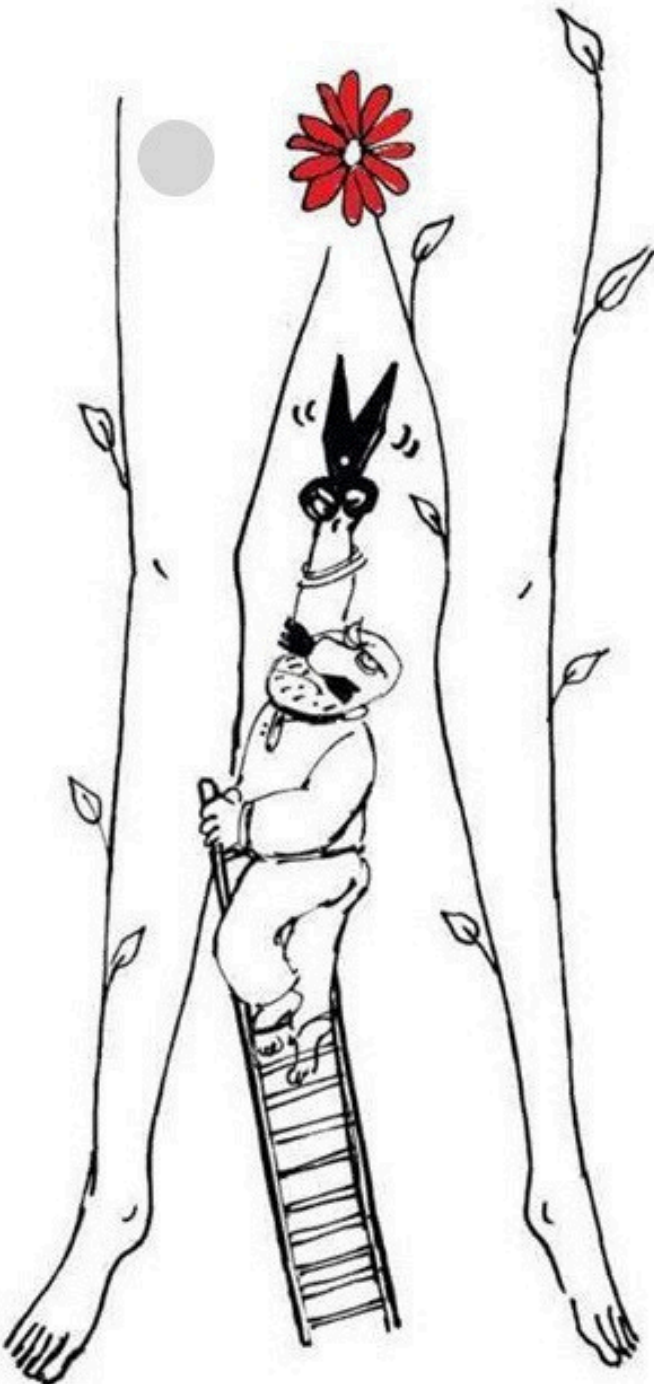

**سميرها**م، لكن أتساءل... هل يمكننا حقاً أن نغير عادة تم تطبيقها لعدة قرون؟

الختان للرجال انا شايفه انه صح انما للبنات اوسخ حاجه ف العالم لاني جربتيا ف وسببتي برود ابن وسخه زي حاله نفسه كدا كل ما افكر اللي اهلي عملوه ساعتها ولما بحس اني جسمي..See more ابتدا يقشعر والكلام دا بيبقي بعد صعويه فشخ

My dad someday took me with his brother and his mother to the doctor to proceed with FGM. I was in grade four, conscious enough about my body and its privacy. My mom did not know about that. Then, he allowed his brother to be with me together with the doctor, I was shy and it was an awful feeling to be exposed in front of men at this age. I still feel that feeling as if it's just happened!! Then, my mom learned about it and she argued with my dad as he did not notify her. Afterward, she was pleased and family members and neighbors came to congratulate me and gift me!!!!

3D scans vulva cast of a surveil woman of FGM, 2022 - New York

# Why did the Women's Education Facebook group shut down permanently by Facebook?

It was moderated by an Egyptian American woman who lives in the USA, however, Facebook closed the group permanently several times. As it contained sexual content and went against the guidelines of the community. Meanwhile, It was mainly conversations in the native language, with no images or footage for sexuality and nudity. However, every time FB closed the group, the moderator would create a new group, until Facebook threatened her to close her personal Facebook account, so she had to close the group permanently.

I can say that this group was based on life experiences and sharing personal stories, whether for educational purposes, or venting. It helped many women to speak about intimate topics with other women, it was a community that enhanced sexual education for many women.

# **Was the reason behind closing the Facebook Group cultural ( from society), the government, or something else?**

I have been searching about Facebook Regulations in the MENA Region and the USA, and I could not find something clear. However, In the Middle East, there are certain topics are taboo, such as politics, religion, and sex. Even through my experience as an educator in a prestigious private University in Cairo, we were not allowed to discuss politics, religion, and sex with students or encourage any work relevant.

It might look social but the core is always political.

# How does trauma affect humans physically?

(According to the National Institute of Health, hyperarousal, also known as hypervigilance, is a common symptom of traumatic experiences and a primary diagnostic criterion for PTSD. It involves sleep disturbances, muscle tension, and heightened startle response, persisting for years post-trauma. Resulting from biological changes due to trauma. Hyperarousal can interfere with an individual's ability to take the necessary time to assess and appropriately respond to specific input, such as loud noises or sudden movements. Sometimes, hyperarousal can produce overreactions to situations perceived as dangerous when, in fact, the circumstances are safe.

# Trauma

**Is Post Traumatic Stress  
Disorder considered a  
disability?**

Most people think of physical injuries and diseases when they think of disabilities. However, mental health conditions, such as post-traumatic stress disorder (PTSD), are also disabilities. PTSD can prevent a person from returning to work or earning their regular income.

Trauma can make people stuck in their lives in certain places. ***For instance, a survival woman of Female genital mutilation says " I am stuck with physical activities such as sports, as certain positions trigger my trauma, so I can't enjoy workout done in a lower level when my body is lay down on the ground or machine or seat, It means my body is in it's less powerful position to protect me, so, I only do cardio that keeps me standing in a strong defense position. As a child passing by FGM experience, I was forced to lay down my body on the ground, they tightened my hands and opened my legs widely. I was unable to protect myself in such a position.*** So, this is how trauma is embodied in the survival body and how it prevents them from experiencing daily life activities."

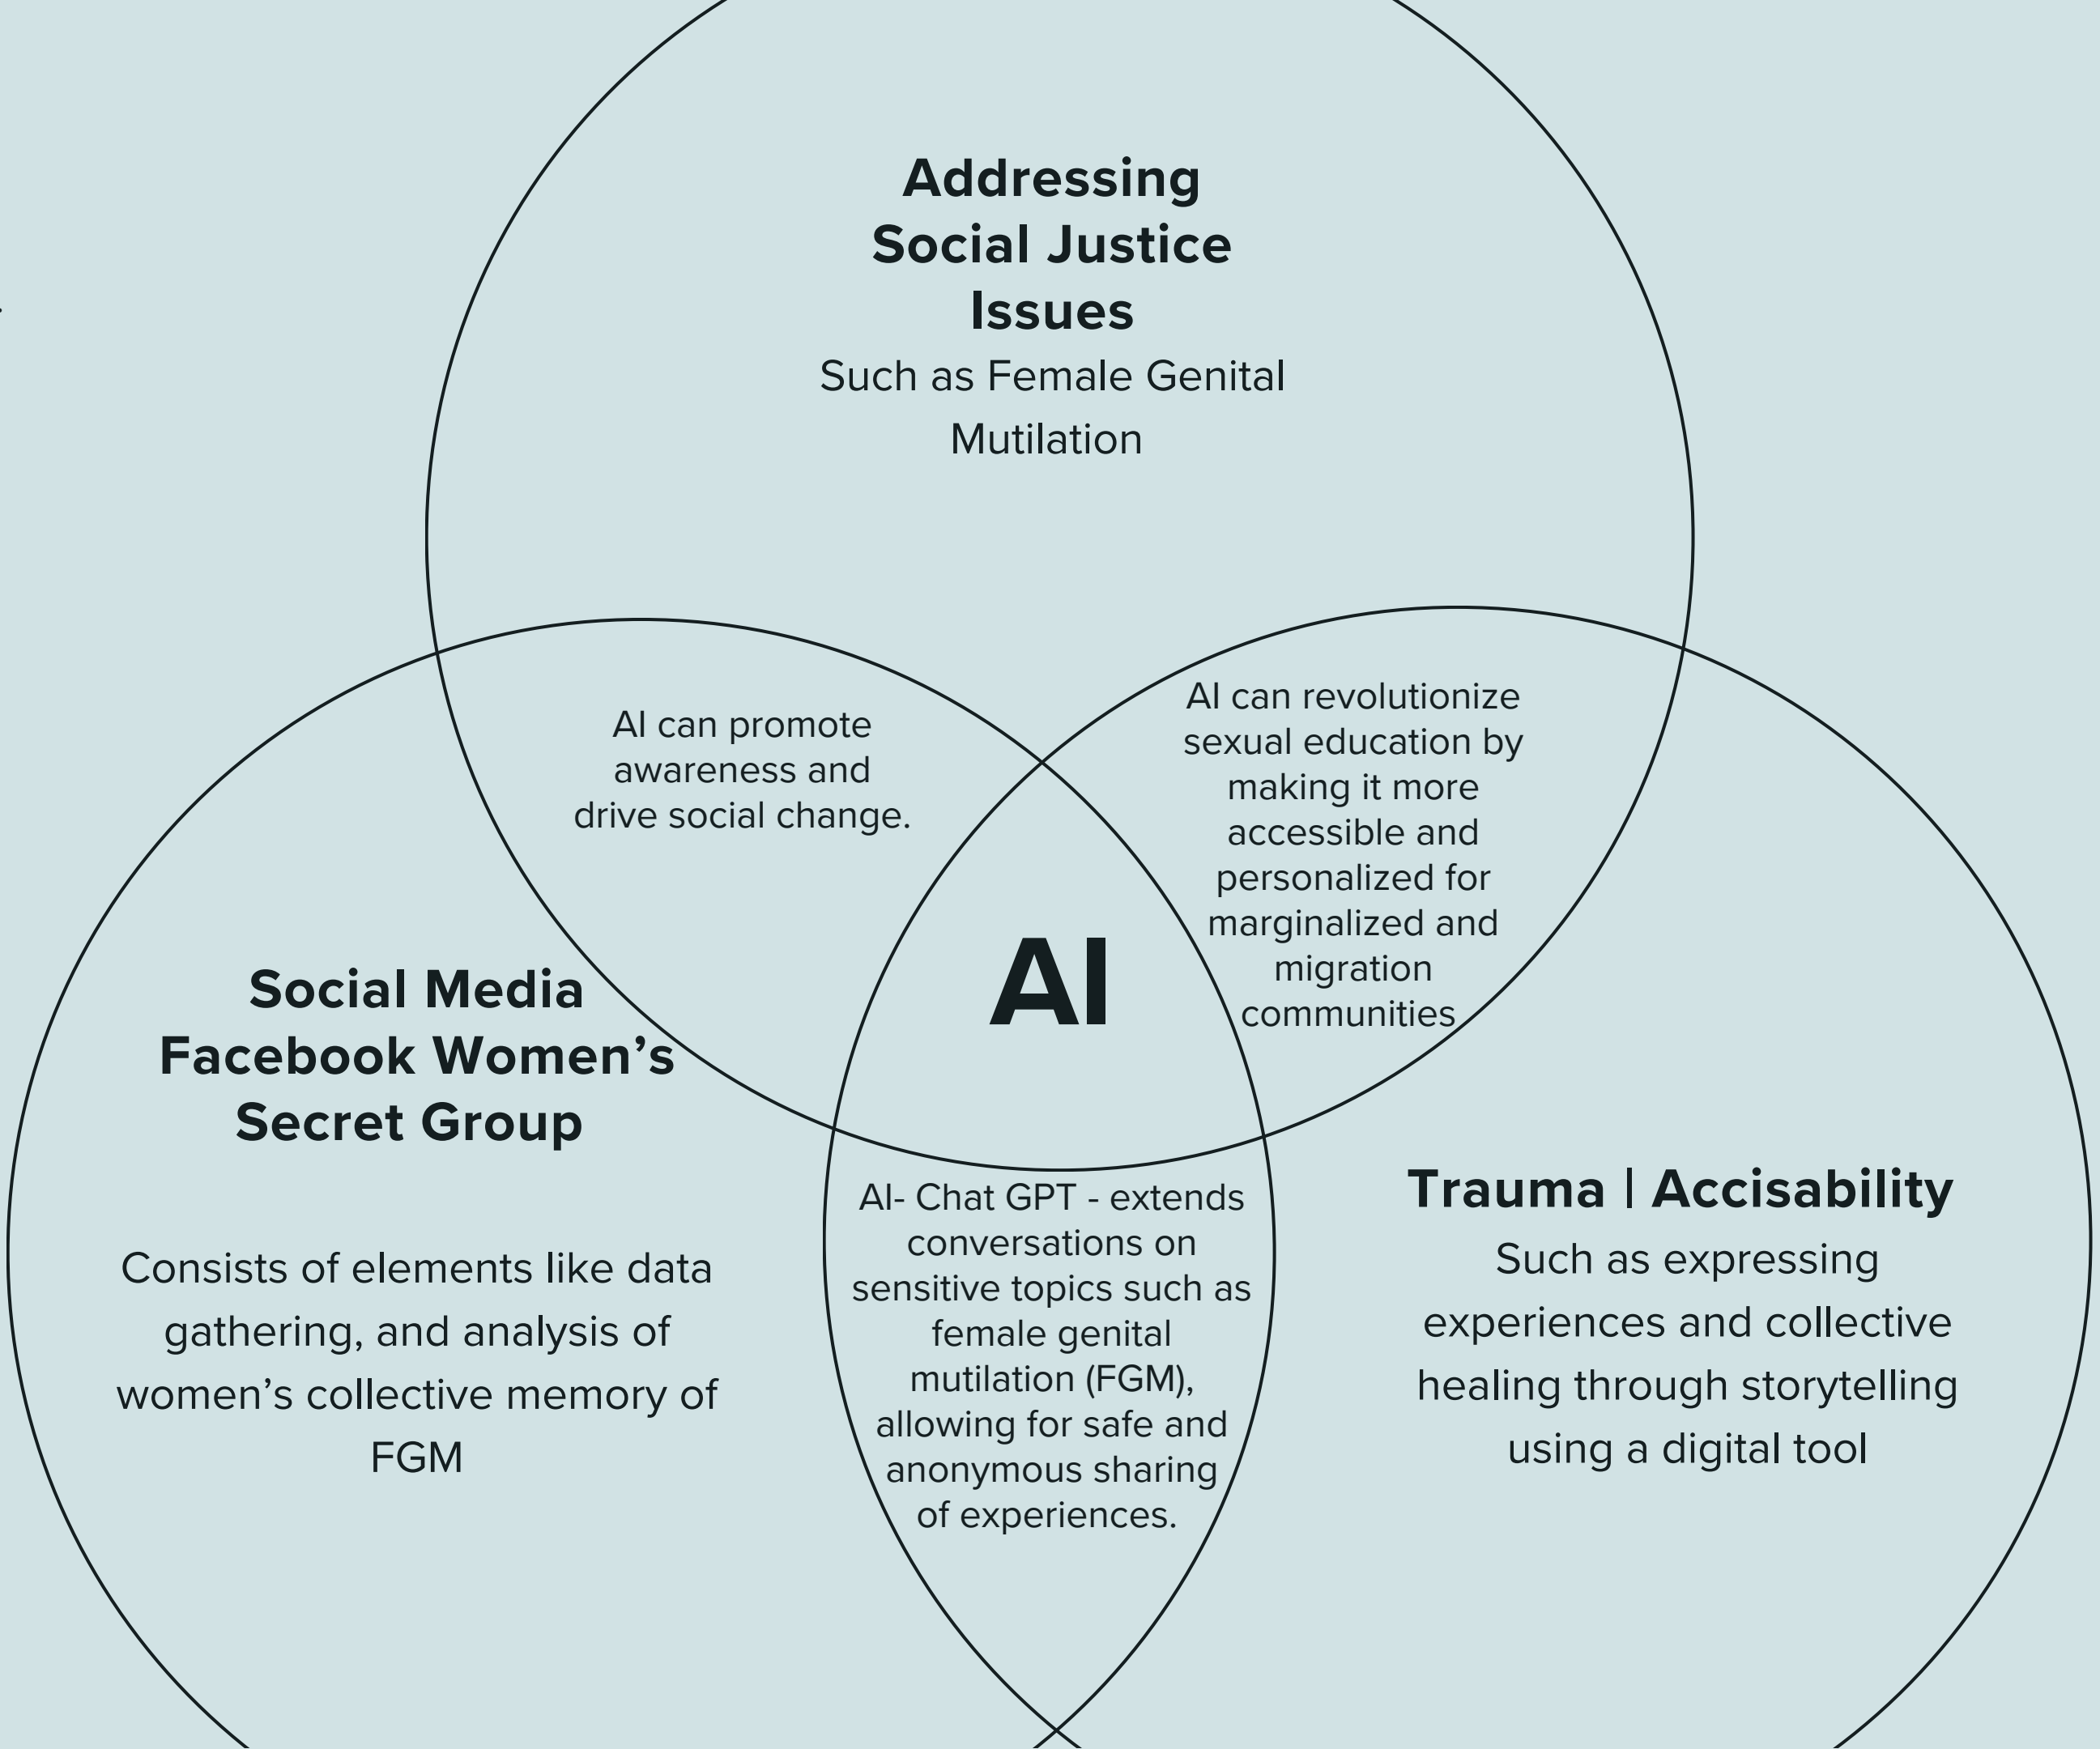

**How might tools like Chat GPT be used to extend the kinds of conversations that were part of the sexual education / FGM Facebook group into the present?**

Chat GPT awarded these survival women a wider space to be heard and share their stories with privacy, than the limitation of the group on FaceBook dealing with politics and Facebook regulation, including identities for these women. Chat GPT opened a non-judgmental but safe space for survivors to share their stories while protecting their identities openly.

“I have been in the FaceBook women’s secret group since 2017, and I could not share any content to protect my identity from my friends in the group, who might know nothing about my personal life. Some women were brave enough to share and speak their truth, even venting on this Facebook group. Still, I was in an inner conflict between sharing my truth and getting my identity visible to the group members which might put my life in real danger.”

Therefore, through Chat GPT Bot I created a group of Seven women, five have experienced Female Genital mutilation, and two minus the mutilation. They are in an open conversation of their experiences with FGM, Pleasure, sexuality, and trauma based on real conversations from the Women Education Facebook secret group.

# Underimagined Futures Have Consequences

DISCO Summit  
Digital Possibilities  
June 15, 2024

Cézanne Charles  
<https://rootoftwo.com/>  
[hello@rootoftwo.com](mailto:hello@rootoftwo.com)

Our work uses participatory design methods to facilitate people to imagine and shape collective actions for more just, resilient, inclusive, and adaptive futures.

We create tangible experiences, events, artifacts, spaces, methods, masterplans, and strategies that allow us to perceive ourselves, the here and now, and the future differently.

# Under-imagined futures have consequences.

We have over two decades of experience designing and delivering projects and services grounded in design, research, technology, public policy, and cultural development.

- We conduct original qualitative (interviews, focus groups, case/precedent studies) and quantitative research
- We develop related themes, narrative cases, scenarios, and frameworks
- We create prototypes to test ideas and assumptions physically, conceptually, and contextually with stakeholders

An aerial photograph of a road where the pavement is painted with a repeating pattern of large, light-colored question marks. The text is overlaid on the image in three purple rectangular boxes.

**We prioritize raising critical questions,  
embracing the complexity of the  
challenges we address.**

# Looking Back to Move Forward

A multi-phased participatory research project to understand the catalysts, foundations, and scaffolds that yield resilient creative place-based efforts in Detroit, Memphis, and New Orleans.

# Michigan Central Art Program

The artistic endeavors at Michigan Central are organized into four primary categories:

- **Public Art:** Leveraging various mediums to transform the landscape of Michigan Central into a dynamic platform for artistic exploration and engagement.
- **Partnerships and Residencies:** Providing resources and opportunities for artists and creative enterprises to thrive, fostering innovation at the nexus of art, technology, and society.
- **Signature Events and Awards:** Highlighting exceptional artistic work and collaborations, and collaborative endeavors through high-profile events and awards ceremonies.
- **Live Programs:** Curating innovative events and performances that leverage emerging technologies and collaborations to captivate and involve audiences in thought-provoking ways.

# MICHIGAN CENTRAL x Newlab

The Michigan Central x Newlab Art + Technology Residency program was founded in 2024. Foregrounding emerging and mid-career artists based primarily in metro Detroit, the program supports artists and creative practitioners to pursue projects at the intersection of art, design, science, and technology. Six artists-in-residence are chosen to receive

- \$30,000 undirected stipend
- Access to state-of-the-art fabrication and product realization workshops
- studio space, hands-on training, and professional development
- Work-in-progress showcase

**The next call will open in September 2024 for the 2025 program. It will be open artists nationally and internationally.**

**Livecoding**, most prominent as a performing arts form and a creativity technique centred upon the writing of source code and the use of interactive programming in an improvised way.

Live coding is often used to create sound and image based digital media, as well as light systems, improvised dance and poetry, though is particularly prevalent in computer music, usually as improvisation, often combined with algorithmic composition.

Typically, the process of writing source code is made visible by projecting the computer screen in the audience space, with ways of visualising the code.

### About This Estuary Server:

#### News and Announcements

2022-01-21: Estuary now contains version 0.4.0 of Punctual, with support for video files as textures, optimized fragment shader generation, combinatorial semantics in many operations with multi-channel signals, and numerous other changes.

2021-12-11: Estuary now supports multichannel audio output. Use !maxAudioOutputs at the terminal to query channels available in the browser, !audioOutputs to query currently used channels, and !setAudioOutputs [someNumber] to switch to a specific number of audio outputs.

2021-11-18: Estuary now uses version 1.7.8 of Tidal, and MiniTidal now supports stutter, quantise, rangex, wedge, timeCat/timecat, chunk', lindenmayer, step, step', steps, spreadf, spreadChoose/spreadr, selectF, striateBy, perlinWith, perlin2, perlin2With, <>, and stutWith

2021-02-12: Estuary now uses version 1.7.1 of Tidal (and MiniTidal now supports silent, stitch, stripe, fix, unfix, contrast, chooseBy, wchoose, wchooseBy, trigger, ur, layer, interlace).

2020-12-23: There is now a Discord server that is the main place for help, discussion, etc about Estuary. All welcome! Sign-up at the following link (note that it's recommended to make an account on discord.com first): <https://discord.gg/snvFzkPtFr>

2020-12-03: Estuary turns five! The 5th anniversary of the first commit to the Estuary code base will be celebrated with a day of performances, workshops, and talks, hosted by the Networked Imagination Laboratory. Full details at [nil.mcmaster.ca](http://nil.mcmaster.ca) soon!

2020-11-19: Estuary now includes framerate-limiting by default on generative visuals, which reduces CPU usage measurably in most cases. The limit can be changed or removed in Settings (click the ? button in the top right). MiniTidal now has support for juxcut, juxBy, jux4, jux', juxcut', id and the composition operator (.).

2020-09-27: Estuary now uses version 1.6.2 of Tidal (and MiniTidal now supports scale, toScale, arpeggiate, arp, weave, weaveWith, ghost, inside, outside, and inv).

2020-06-19: Configuration settings like turning Canvas on/off, selecting audio dynamics

**What insights do you gain from materially engaging with digital technologies?**

**How does the embodied knowledge gained from creating and thinking with digital technologies offer a unique vantage point for artists and researchers working in or thinking about those technologies?**

**How might AI and other emerging technologies challenge traditional notions of creativity, authorship, and knowledge?**

**In what ways can digital technologies, particularly emerging forms like AI, blockchain, and generative imaging, enhance an artist's or researcher's agency?**

**Where might these technologies limit or overshadow human input?**

**What does an interdisciplinary, hands-on approach to engaging with digital or computational technologies, which blends skills from art, science, engineering, and humanities, contribute to your work and knowledge?**

**What is digital in 2024?**

**How is your conception of the digital different from a digital utility?**

# Digital Possibilities

An intergenerational panel of arts practitioners who explore the critical role deliberate exploration and practical research play in understanding and shaping digital technologies and culture. The panel showcases the transformative power deeply engaging digital technologies can have on molding practical, aspirational, and equitable understandings of self and society. Panelists discuss how practice can leverage discovery, curiosity, out-of-the-box thinking, and leadership to mine and challenge opportunities, or the lack thereof, for beauty, potentiality, subjugation, and liberation that digital technologies often carry.

**Lunch break!**  
**Our next panel will**  
**resume at 1:00pm**

# 1993 & 1995 Oslo accords

-  Palestinian (under Israeli occupation)
-  Israeli
-  Area C - (Palestinian under Israeli control)

The occupied West Bank was **divided into three areas** - A, B and C - as part of the Oslo Accords, signed by the **Palestine Liberation Organization (PLO)** and Israel.

Area A  
18%

Under  
Palestinian  
Control

Area B  
22%

Under joint  
Israeli-  
Palestinian  
Control

Area C  
60%

Under  
Israeli  
Control

## أهلنا الكرام في الوطن الحبيب

**نأسف للإعلان عن انقطاع كامل لكافة خدمات الاتصالات والإنترنت مع قطاع غزة في ظل العدوان المتواصل. فقد تسبب القصف الشديد في الساعة الأخيرة بتدمير جميع المسارات الدولية المتبقية التي تصل غزة بالعالم الخارجي بالإضافة للمسارات المدمرة سابقاً خلال العدوان، مما أدى إلى انقطاع كامل خدمات الاتصالات عن قطاع غزة الحبيب.**

**حماكم الله وحمى بلادنا**

Our honorable people in our beloved homeland,

We regret to announce a complete cessation of all communications and Internet services in the Gaza Strip in light of the ongoing aggression. The intense bombing in the last hour caused the destruction of all remaining international routes linking Gaza to the outside world, in addition to the previously destroyed routes during the aggression, which led to a complete interruption of communication services from the beloved Gaza Strip.

May God protect you and protect our country.

# **Forging Collectivity as Practice**

**with the same streets and small roads.  
However, the houses are not the same houses.**

A stone building with a dome and arched windows, viewed from behind by two people. The building is constructed from light-colored stone blocks and features a large dome on top. Two arched windows are visible on the side. In the foreground, the backs of two people are visible: a woman with long, wavy brown hair on the left and a man with a short haircut on the right. The background shows a dirt path and some greenery.

**The mosque with its sealed entrance is evidence that there was once a bustling village here.**

**Our next panel will  
resume at 2:30pm**
