The authors would like to correct a remark in the above paper. On p. 336, after displayed equations (2.13), we remarked erroneously that these equations corrected an error in equation (3.3), p. 34, of [We] (notation as in our paper). This was a misreading of [We] on our part, which is correct as written. We thank Professor S. Webster for pointing this out, and apologize to him and the readers of *Inventiones mathematicae* for any inconvenience or confusion this may have caused. We were using more than equation (3.3) of [We] at this juncture. A clearer citation after equation (2.13) of our paper would be: "Equations (3.3) and (3.6) of [We], and further normalization give the last equation for ψ."
