Vol. 2 No. 4 Fall 1970

A PUBLICATION OF THE OFFICE OF UNIVERSITY RELATIONS AND DEVELOPMENT

GROWING CAMPUS

The Michigan campus is keeping progressive in its facilities, as well as academically. Among the newer buildings are (1) Graduate Library, (2) Administration Building and Regents Plaza, (3) Power Center for the Performing Arts (exterior now up), (4) Buhl Research Center for Human Genetics, (5) Upjohn Center for Clinical Pharmacology, (6) Medical Science II, (7) C. S. Mott Childrens Hospital, (8) Towsley Center for Continuing Medical Education, (9) Chrysler Center for Continuing Engineering Education, and (10) Highway Safety Research Institute.

Fedele F. Fauri

Robert L. Knauss

VICE PRESIDENTS APPOINTED

Fedele F. Fauri, dean of The University of Michigan's School of Social Work since 1951, has become U-M Vice-President for State Relations and Planning.

U-M President R. W. Fleming said, "I'm delighted that Dean Fauri has agreed to take on this responsibility. His experience in Lansing, his extensive knowledge of the state, and his outstanding record as an educational administrator provide a fine background for the position."

Dean Fauri is past president of the American Public Welfare Association, the Council on Social Work Education, and the National Conference on Social Welfare. He also served as a consultant on public assistance to the U.S. House Ways and Means Committee in 1945-46, when he was Michigan Social Welfare Department director. In 1947, he went to Washington as senior specialist in social legislation for the Legislative Reference Service of the Library of Congress.

Robert L. Knauss, University professor of law, is the new Vice President for Student Services at the University. He succeeds Mrs. Barbara Newell, who has been acting vice-president since 1968.

Knauss has served as chairman of the Faculty Senate, the Faculty Assembly, and the Senate Advisory Committee on University Affairs since early this year. A graduate of the U-M Law School, Knauss became a member of its faculty in 1960. In 1966 he was chairman of an ad hoc committee which compiled a report on student affairs which became known as the "Knauss Report."

Carrying into his new assignment the endorsement of the Student Government Council, Vice President Knauss is responsible for the Health Service, Placement Service, University Housing, Office of Religious Affairs, Student Affairs Counseling Office, Office of Student Organizations, International Center, and Student Community Relations.

COLONEL FREDRICK E. DAVIDS HEADS U-M SAFETY

Colonel Fredrick E. Davids, Director of the Michigan State Police, will in October become director of safety at the University. In this newly created position he will coordinate existing safety and security programs and serve as liaison with local, state and national law enforcement agencies.

Davids, who at 56 has devoted 33 years to the State Police, emphasized in an interview that the University has no intention of creating a campus police force. He will report to President Fleming through James Brinkerhoff, director of University business operations,

whose contacts with the various police agencies will now be assumed by Colonel Davids. The University employs an outside guard service agency for building and fire security. This personnel is directed by Rolland J. (Barney) Gainsley, chief of the U-M security service and former chief of Ann Arbor police, who will be responsible to Davids. The latter is familiar with the unarmed guard personnel, each of whose members had been licensed by Davids as a responsibility of the Director of the State Police. In this capacity he also is state fire marshal and has during this time inspected all but the newest U-M buildings.

Davids anticipates his relations with the students to be friendly. He intends to meet with them and with members of the faculty soon after the start of the fall term to discuss his role on the campus. Davids has praised Gainsley, Ann Arbor Police Chief Walter E. Krasny, and Washtenaw County Sheriff Douglas J. Harvey, each of whom he has known and worked with for several years.

The new safety director, who has received three citations and two honorable mentions for meritorious service, is considered a great administrator by Brinkerhoff.

Gov. William G. Milliken, in a letter to Davids, said:

"I have come to rely on your cool and professional response to

ROTC Programs Restructured

ROTC programs continue at Michigan but in a form more compatible with other academic programs in the University.

The Regents "resolved that ROTC programs continue at the University of Michigan and, beginning with the freshman class of 1971, that credit towards a degree in the College of Literature, Science, and the Arts be given for the course hours outlined." The Regents approved an LS&A list of 12 courses, which are being taught by the University faculty and which award full degree credit in the ROTC programs.

(Continued on page 2)

(Continued on page 2)

Paul G. Goebel and President R. W. Fleming hold the trophy and \$5,000 award signifying first place in the American Alumni Council's national competition in alumni giving, presented to the University of Michigan by the United States Steel Foundation. More than 30,000 contributors earned the honor for the University.

ROTC Restructured

(Continued from page 1)

Other changes being put into effect include:

1. The Army, Navy, and Air Force ROTC units will be programs rather than departments.

2. The ROTC staff members will be recognized by their military titles, with professorial titles being granted to those officers who hold appointment in an academic department.

3. A new University-wide ROTC committee will be appointed by the Regents. The committee will be composed of student, faculty and administration members.

4. The University's individual schools and colleges will allow credit only for courses taught by instructors holding regular academic appointments.

The University recommendations for changes were similar to proposals made in the Benson Report, a study commissioned by the Pentagon.

DEAN CALLS SCHOOL TAX SYSTEM OBSOLETE

The property tax on homes must be reduced, and eventually eliminated as a basis for financing schools, Wilbur J. Cohen, dean of the University of Michigan School of Education, maintains.

Citing recent defeats of millage issues in Michigan and several other states as examples of the inadequacy of the property tax for financing education, Cohen predicts that the situation will get worse each year until new means of financing are invoked.

"The property tax was probably a very good one 300 years ago, or even 100 years ago, when the amount of land a person owned was a reasonable index of ability to pay," the former Secretary of Health, Education and Welfare concedes. "But now we face a situation in which the entire foundation of schooling is built on a tax structure which is entirely out of date."

Profs Recommend Land, Stocks And Condominiums

Two professors of the U-M Graduate School of Business Administration have in recent talks given predictions or suggestions in areas of the economy. Professor Karl G. Pearson, director of real estate education, discussed land in one appearance and condominiums in another. Ann Arbor Service Club members heard Thomas G. Geis, professor of finance, give opinions concerning the stock market.

Prof. Pearson: "If you have good land, hold it; if you don't have land, get some. Land holdings are your one best hedge against inflation."

The continued rise in land prices is inevitable considering the predicted mass migration to the suburbs, the space-demanding town house developments, airport expansions, projected expressways, growth in mobile home parks, new industrial areas, and the new town developments being planned with government guarantees.

"It is hard to generalize, but the facts show that many land investments are yielding 25 percent on their equity. Over and above this is the capital gain. Over the last 10 years land prices in general have soared by 95 per cent, three times the increase in the general price level. The demand for land in semi-rural areas will be especially strong."

Prof. Geis: The stock market will make a modest gain this fall. Optimism on the inflation front is indicated by the fact that the rise of wholesale prices has slowed down. As early as October there should be bullish developments which will be promptly read by investors, and common stock prices should move upward. "As productivity gains begin to appear later this year, and profit reports look more favorable, there will be a brisk return of the Dow-Jones average to the 800-plus level.

"As matters now stand, and in the absence of further U.S. involve-

ment in military actions, the Dow-Jones average should move above 1,000, that magic figure reached briefly in 1966."

Prof. Pearson: Condominiums are the only growing factor in the U.S. residential construction scene. Ownership of part of a building without the responsibilities involved with home ownership accounts for the move to condominium buying. In contrast to cooperative ownership the condominium owner has a distinct advantage. "If a family occupying a cooperative defaults, the other cooperative holders have to make good the default. If a condominium owner defaults, this becomes the problem of his mortgage lender, not that of the condominium owners.

"Vacation condominiums can now produce as high as \$100 a day in gross rentals during peak periods . . . The condominium owner enjoys tax deductions for mortgage interest and real property taxes. If his vacation condominium is used predominantly for the production of income, he can also deduct for maintenance, repairs, management fees, and depreciation.

"Condominiums can be attractive to widows with a lump sum of cash from their late husband's estate. They can invest this surplus cash in a condominium just as they do in a suburban home; have the financial advantage of a private home, rent free for life, and not be burdened with grass cutting, shoveling snow, and building maintenance."

Colonel Davids

(Continued from page 1)

violent and potentially violent incidents throughout the state. . . . The personal safety of the students, faculty, staff and visitors to this great university is of vital concern to all of the citizens of Michigan."

MICHIGAN YESTERDAY

April, 1924 Horsepower in front of Buildings and Grounds

U-M Students Protected By New Regulations

Federal, State and University regulations have been established or clarified in a series of pronouncements designed to assist students in carrying on an uninterrupted and orderly program toward their chosen goals in education. Following in summary form is recently distributed information:

● **Federal Aid Endangered**

Recipients of student financial assistance from Federal sources are reminded that legislation has been enacted requiring certain Federally funded financial aid to be withheld from university students who are convicted of certain acts of force, trespass, or disobedience of regulations.

● **Michigan Statutes Emphatic**

The current state appropriations act directs that no funds may be used for ". . . The education of students convicted of the offense of interference with normal operations of any public institution of higher education . . ." or "who possess any firearm or other dangerous weapon in any University . . . unless the firearm is registered with the institution." (The U-M has established a requirement of registration of any firearm possessed by officers,

administrators, faculty, employees or students on any University property.)

It is a condition of the appropriation "that a student who causes wilful damage to public property on a campus . . . and subject to all other legal penalties shall be expelled . . ."

House Bill No. 3800 provides:

A person is guilty of a misdemeanor, punishable by a fine of not more than \$500, or by incarceration in the county jail for not more than 30 days, or both:

When the chief administrative officer of a publicly owned and operated institution of higher education, or his designee, notifies the person that he is such officer or designee and that the person is in violation of the properly promulgated rules of the institution, and the person thereafter wilfully remains on the premises.

● **Interim Rules Set**

The Regents, recognizing the value of working in concert with faculty and student groups, have put into effect temporary disciplinary regulations pending the establishment of a more permanent judiciary. These may be superseded by adoption by the Regents of rules drafted by the University Council.

The following forms of conduct are prohibited:

Use of force or violence against, or interference with freedom of movement of any member or guest of the University community.

Disruption of a class or duly authorized University activity, including recruiting interviews.

Continued occupation of a University facility after being ordered to leave by the President or his agent.

Defacement, damage to, or theft of University property.

Engaging in any of the above forms of conduct will subject the violator to sanctions, which may include: warning, censure, probation, restitution, suspension or expulsion.

Charges of violation of these Interim Rules shall be filed in writing with the dean of the school or college in which the alleged violator is enrolled. The dean presents such charges to the University Attorney, who is responsible for any further procedures. Hearings shall be held before a hearing officer, not otherwise employed by the University. Extensive hearing regulations are provided to safeguard the accused, with provision for appeal to the Regents through the office of the President of the University.

Richard L. Kennedy

Kennedy Named

Richard L. Kennedy, formerly U-M director of state and community relations, has succeeded Herbert W. Hildebrandt as secretary of the University and assistant to the President.

Hildebrandt, who resigned after holding office since May, 1966, has assumed the directorship of alumni relations in the Graduate School of Business Administration and continues to teach in the speech department.

Noah's Ark Off Limits

A search for Noah's ark must, at least for an American expedition including a team of U-M geologists, await a more favorable Turkish government ruling.

Prof. William R. Farrand, head of the Quaternary Research Laboratory in the Institute of Science and Technology, and Glen B. Rutilla, graduate assistant in geology and mineralogy, are barred by a ban on a Ralph E. Lenton expedition organized by the Search Foundation of Washington, D.C.

"Security reasons" were given by Turkish officials for refusal to permit the group to investigate a glacier 3,000 feet below the peak of Mt. Ararat, on which the Bible says the ark landed after the flood. Several pieces of ancient hand-hewn wood had been dug from there last year.

Mt. Ararat is near the heavily fortified Turkish-Soviet border.

U-M Encourages Political Participation

There has been wide interest and confusion on many campuses across the nation in how to facilitate participation in the political process and campaigning without jeopardizing class work. In endorsing and encouraging participation, the U-M Senate Assembly, representative-legislative arm of the University faculty, compiled these resolutions, reported in brief:

That each school respond sympathetically to requests from its students for accommodations to participate in election activities.

Cooperation wherever possible by refraining from scheduling exami-

nations and special assignments during election week.

Establishment of a non-partisan information center and University-sponsored, non-partisan political workshops and candidate forums open to the public.

That departments and schools, under appropriate existing course descriptions, offer courses dealing with political activities.

That the assembly appoint a committee to introduce more permanent institutional changes to facilitate student and faculty participation in political activity in the future.

OMBUDSMEN?

The Student Affairs Counseling Office has been authorized to assist any student experiencing difficulties in using University resources. This may involve complaints of red tape or situations of perceived unfairness. The service is designed to "make the system work." David J. Patch, along with other professional staff in the Student Affairs Counseling Office, will meet with such persons and work with them until the issue is resolved.

MICHIGAN TODAY Horsepower Modernized

Report Minimizes Generation Gap

America's young men are not "generation gap" rebels who reject the values of their elders as well as the Vietnam war and military service, a University of Michigan study reveals.

In a preliminary report on a national survey of "Youth in Transition," researchers Jerome Johnston and Jerald G. Bachman, of the U-M Institute for Social Research, picture a much different youth orientation.

Two thousand boys about to graduate from high school in the spring of 1969 were sampled by Johnston and Bachman, who reveal, "The majority of young men in our sample do not fit the 'generation gap' stereotype of rebellious youth casting aside the values of their elders. In fact, the dominant position they express essentially supports the status quo.

"They are not strongly opposed to the war in Vietnam, nor are they anti-military or pacifist. They agree that it is important to fight the spread of communism. They see good citizenship primarily in terms of obedience to law and pride in country. For them military service provides an opportunity to serve the country and prove oneself a man."

The authors point out that though this describes a majority it is by no means accurate for all of them. "A substantial minority, some 20 per cent, dissent from the dominant position. They do not agree that the war in Vietnam is important to protect friendly countries, nor do they agree that the U.S. must be willing to run any risk of war which may be necessary to prevent the spread of Communism. They do not support the role of the military in this country, and they would serve the military only grudgingly."

These dissenters portray the broad range of opinion existing on these issues and Johnston and Bachman warn that they "remind us that description in terms of the majority position, while often necessary for clarity and simplicity, is nevertheless an oversimplification."

A "Vietnam War Dissent Index," compiled from a set of six attitude questions about the war, reveals 40 per cent of the boys clearly supported the government's Vietnam policy, while 20 per cent disagreed. The remainder could not be classified.

Noteworthy, the study also found that large numbers did not support pacifist or anti-war sentiments and viewed anti-war protests, even of a non-violent nature, as harmful. But again, there is a sizable minority who disagree with this position.

Don Canham, Don Lund, Dave Strack

New Athletic Administration

With the return of Don Lund, Michigan's intercollegiate athletic program is being administered by three U-M men, each of whom was a star athlete, an eminently successful coach, and a proven administrator.

Athletic Director Don Canham, who recently elevated Dave Strack from Business Manager to Associate Director, successfully lured Lund to return as Assistant Director. It is doubtful that such a trio can be matched anywhere in intercollegiate athletics. The reorganization was necessitated when Chalmers (Bump) Elliott resigned to become athletic director at the University of Iowa.

Strack, who coached Michigan teams to three consecutive Big Ten basketball titles, and Lund, coach of the 1962 national baseball champions, were teammates while undergraduates. Each won coach-of-the-year honors. Lund, a nine-letterman, has served as head of the Detroit Tigers farm system since leaving the University.

Michigan's varsity baseball park is now Ray L. Fisher Stadium. The veteran and popular retired coach was honored in dedication ceremonies attended by dignitaries, former players, and other friends between games of a double-header win over Purdue. Former Wolverines, representing almost every one of Fisher's 38 teams, watched former player Buck Giles (1924 and 1925) present a bronze medallion, which will be erected on the stands.

The Clements Library has acquired a collection of manuscripts that completes the library's source material on the 1782-83 peace negotiations that ended the American Revolution. The purchase was made possible by funds from an anonymous donor.

* * *

Two Michigan physics researchers, Associate Professor Arthur Rich and doctoral student John C. Wesley, have made one of the most accurate measurements in science history—defining the "g-factor" of the electron to within seven parts of a billion.

Football Schedule Changed

Long range planners are alerted to changes in the originally-announced 1971 football schedule. Michigan has, as have several other universities, contracted for an 11th game for a year hence. The Blue will open their 1971 season against Northwestern at Evanston. In scheduling the 11th game, permitted by the NCAA in a recent ruling, Athletic Director Don Canham changed three other dates with scheduled opponents.

Sept. 11 at Northwestern	Oct. 16 Illinois
Sept. 18 Virginia	Oct. 23 at Minnesota
Sept. 25 UCLA	Oct. 30 Indiana
Oct. 2 Navy	Nov. 6 Iowa
Oct. 9 at Michigan State	Nov. 13 at Purdue
	Nov. 20 Ohio State

'the Vital Margin'

A \$120,500 grant has been made by the W.K. Kellogg Foundation to the University's Bureau of Hospital Administration in the School of Public Health for a two-year study of the management of patient units in hospitals. The research will be conducted in several large hospitals chosen for their innovations in management. The study will concern itself with developing measurements for use by management of the quality of care provided in the hospital. Among subjects to be covered will be various new roles for the nurse which are being developed in different hospitals.

• • •

"Half of the total capital investment on this campus is not from state funds. That is extraordinary for a public university," U-M President R. W. Fleming related during a recent Board of Regents meeting.

As examples of campus structures built without public money, the President mentioned Hill Auditorium, the Burton Tower, the Rackham Building, and the Law Quadrangle.

• • •

Cazzie Russell, perhaps the finest basketball player ever to wear the Michigan uniform, returned to his alma mater last week.

Russell led his teammates, the champion New York Knicks, onto the U-M court in Crisler Arena for a game against the Detroit Pistons. Cazzie has been seen around Ann Arbor during the summer while participating in area golf tournaments.

Temple University Honors Revelli

Dr. William D. Revelli receives the honorary degree of Doctor of Music from Paul Russell Anderson, President of Temple University. Dr. Allen M. Garrett (center), assistant dean of Temple's College of Music, presented the popular Michigan director of bands, with the following citation: "An internationally acclaimed musician, conductor, educator and scholar, he has devoted his life to young people and their study

of music. He has served his university in music education in many areas of musicianship, among them, as founder and honorary life president of the College Band Conductors Association and as past president of the American Band Masters Association, and as conductor on international good will tours by The University of Michigan Symphony Band."
