

the university of michigan **Today**

Vol. 5, No. 3, June 1973

Michigan TODAY is the only Michigan publication received regularly by 166,000 alumni, friends and faculty of the University

Goebel Among Those Honored at Commencement Ceremonies

Paul G. Goebel of Grand Rapids, Regent-Emeritus, devoted alumnus and the U-M's most prolific fund raiser, was awarded the honorary doctor of laws degree during the May 5 commencement exercises. The well-known engineering graduate and former All-American football player has spent the major part of his time during recent years traveling the nation, together with Fred Vogt, recruiting members for the Presidents Club. Over half of the 1,271 affiliates of that prestigious organization were enrolled through the Goebel-Vogt team. Goebel

also was national chairman for the very successful \$55 million capital campaign.

Other honorary degree recipients were Dr. Kingsley Dunham, director of the Institute of Geological Sciences of Great Britain, the commencement speaker; Jerome L. Goldman, president of Friede and Goldman, Inc., consulting naval architects; U. S. Senator Robert P. Griffin of Michigan, and Prof. Nathan P. Feinsinger, of the University of Wisconsin Law School, a noted labor arbitrator.

NEW AWARD—Mrs. R. W. Fleming (right) presents the first Alumnae Athena Award to Joan M. Goebel, M.D., of St. Louis, Mo. The honor is to be given each year by the Alumnae Council at its annual luncheon to the alumna who best exemplifies excellence in her chosen field, altruistic and humanitarian attributes, and public and community service.

Tuition Increases Necessary To Counter Projected Deficits

A tuition increase averaging six per cent in various categories for the 1973-74 year on the Ann Arbor campus has been authorized by the Regents.

The increase, according to Vice-President Allan F. Smith, is necessary to counter "the expected loss in fee income, the deficiency in the governor's recommendation for state appropriation, and the continued inflation throughout the economy." Student fee income without the increase, he noted,

would be "almost \$1.2 million below the estimate upon which the coming year's budget is based. This loss results largely from shifts from non-resident to resident status, with some shift between higher-fee-paying students and lower-fee-paying students."

The Ann Arbor campus requested an increase of nearly \$24 million in the state appropriation. The governor's recommendation was less than \$7.2 million.

University Grants Full Aid To Fourteen-Year-Old Student

Greg Wellman, 14-year-old University of Michigan student from Plymouth, Michigan, will receive the full financial aid he requires from the University for the 1973-74 academic year, according to Allan F. Smith, vice president for academic affairs.

Announcing the decision, Smith said, "The Office of Student Financial Aid is still analyzing needs of

thousands of students who will be notified of final decisions on financial assistance by mid-summer.

"However, because of the widespread interest in the situation involving Greg Wellman, an early evaluation has been made of his financial aid needs. Our analysis conforms with his request. The funds will be split—and this is common practice—between gift and loan monies.

"Our analysis is that the request made is appropriate and that Greg's financial needs for the coming school year will be fully met."

The Wellman family revealed that the assistance consisted of a \$1,000 University loan at 3% interest plus an \$800 grant-in-aid.

The situation first came to public notice April 22, when news reports indicated Greg Wellman would not receive financial assistance for the coming year. The University then reported that all applications for financial aid for 1973-74 were being reviewed, which is still the situation.

No commitments have been made to other students because the U-M still does not know what financial aid funds it will receive from state appropriations. In late April it was not known what federal funds would be available, but it now appears the University will receive some federal funding for financial aid next year.

Greg Wellman made special ar-

Two Michigan Benefactors Die This Spring

Regent-Emeritus **Frederick C. Matthaei, Sr.**, Michigan civic leader and philanthropist, died March 26. He was a 1914 graduate of the University and served as a Regent from 1960 to 1967.

Loyalty to his alma mater remained throughout his life and he was active in alumni activities and in University programs and projects. In addition to generous use of his time, he gave gifts of scholarships, was instrumental in the construction of the University Hospital Chapel, and contributed the land for the Botanical Gardens and the Radrick Farms Golf Course.

Speaking of the devoted alumnus, President R. W. Fleming said, "Fred Matthaei was among that select group of Michigan's sons whose life remained intertwined with growth and development of the University. He enjoyed the association, was nourished by it, and in turn gave of

Frederick C. Matthaei

himself so that others too might enjoy and benefit. His largesse was of mind and spirit as well as of land and material possessions."

★ ★ ★

One of the University's and the state of Michigan's greatest benefactors, **Charles Stewart Mott**, died this spring at the age of 97. Through his foundation Mott contributed millions of dollars annually to various community proj-

Charles S. Mott

ects, mostly in the fields of education and health.

In paying tribute to the philanthropist, President R. W. Fleming stated, "The University of Michigan—Flint campus was one of the dreams he caused to come true." The president also pointed to the C. S. Mott Children's Hospital at the U-M Medical Center as another "prominent reflection" of Mott's charity.

Canine Co-Therapist Helps Emotionally Disturbed Children

She has yet to make the cover of *Time*, but she has made *Good Housekeeping*, *Today's Health*, *The New York Times*, and *The London Daily Mail*, as well as having been invited to appear on the Mike Douglas TV show.

She is Skeezer, a mixed-breed dog who is more interested in being the nation's first "canine therapist" and who is doing a marvelous job in helping emotionally disturbed children at the U-M's Children's Psychiatric Hospital. Skeezer joined the staff as a "resident dog" in 1966 and soon appeared to recognize which young patients needed her special attention. She often spends the night with children who are lonely or afraid. The children are responsible for her feeding and bathing. One 11-year-old patient was allowed to take her through a local 4-H obedience course. She seemed to sense the child's need to achieve victory in himself, and the two proudly returned with a second-place ribbon.

A year after her arrival, Skeezer gave birth to a litter of nine puppies, an event that gave many of the children their first real insight

into normal life processes and helped build confidence in the Hospital's treatment programs. She didn't even ask for a maternity leave nor has she requested a sabbatical.

A book, *Skeezer: Dog With a Mission*, written by noted author Elizabeth Yates, was recently released. It tells the story of Skeezer and of her contribution to therapy programs at the hospital. Skeezer's fame continues to grow as evidenced by the volume of inquiries from psychiatric facilities from all over the nation.

She may yet become a cover girl.

SENSING A NEED — Skeezer seems to know intuitively when a child needs her special attention and affection.

Fleming Condemns Book Burning

A symbolic book burning was staged on the Diag by a group labeling themselves as Advocates for Medical Information. They claimed the blazing publications are health-damaging and contain criminally sexist material used to teach the psychological oppression of women. One book was a standard medical text used in the U-M and other medical schools.

An outraged President R. W.

Fleming issued the following statement on the burning:

"'Book burning' is with us again, and I have watched in horror the relative silence as a new set of censors, armed with a new cause, and surrounded by a new set of pleased faces, stands in the middle of a prestigious campus and burns various and sundry books because they are 'dangerous' or 'wrong' or 'sexist.'"

"The price of saying that this sort of conduct is unforgivable is, of course, personal vilification and abuse, but I do not propose to remain silent for that reason. No university worthy of the name can be indifferent to any groups of people, however well-intentioned, who think that the solution to their problem is to destroy literature with which they disagree.

"However labored the explanations, the ultimate fact remains the same—some self-designated group has taken upon itself the authority to tell the rest of us what we can read. The notion that the case at hand, 'symbolic' though it may be, is distinguishable from its long series of odious predecessors is an illusion of the worst sort.

"Speaking for myself, I do not wish to be recorded as having remained silent in the face of this totally repugnant conduct."

In A Few Words . . .

The American Council on Education reports that more than 91 per cent of this year's U-M freshman class, compared to 66 per cent nationally, ranked in the top quarter of their high school graduating class. . . . John K. Whitmore, professor of history and a specialist on 14th and 15th century Southeast Asia, who was recently in the Democratic Republic of Vietnam as a guest of the Ministry of Education, was the first U. S. academic specialist on the area to enter the North since before the war. . . . "Marcus Welby, M.D." (Robert Young) will be the main speaker at the June 8 commencement of the Medical School, by vote of the graduating M.D.'s. . . .

The 10 regular season college football games drawing the largest crowds in history have been played in Michigan Stadium, with the record being 104,016. . . . The Supreme Court prediction that the reduction of jury size will not affect the outcome of court cases will be tested by the staff of the U-M student publication *Journal of Law Reform* in a study funded by the American Bar Foundation. . . . Michigan's Big Ten wrestling champions averaged just under a B average in the classroom. . . .

Over 400 tons of "rock books" are housed in the Core Library of the geology department's Laboratory of Subsurface Geology, each of the rock cores representing to the trained geologist a chapter in the history of the earth. . . . Lewis A. Engman, a 1957 U-M graduate,

is the new chairman of the Federal Trade Commission. . . . The National Junior Olympics will be held at the U-M on August 15-17 with 700 boys and girls age 11-18 from throughout the U. S. competing. . . .

Kim Rowe's recent 47.2-second quarter mile not only broke Bob Ufer's 31-year-old record but was the fastest "440" in the world (on a D class track). . . . The director of women marines in the U.S. Marine Corps is Col. Margaret A. Brewer, a 1952 Michigan alumna. . . . To stimulate more interdisciplinary teaching, LSA has established Collegiate Professorships which will allow recipients for two years to choose a course of an interdisciplinary nature.

MICHIGAN YESTERDAY MICHIGAN TODAY

Michigan Historical Collections

Harris Hall was the pride of the block in this old scene looking West on Huron Street. It was built by the St. Andrews Episcopal Church in 1887 and remodeled for use by the School of Music in 1946.

The Campus Inn now towers over Harris Hall next door. It was built in 1967 on the site occupied by the frame houses in the earlier photo. The Michigan Band will move from Harris Hall to its own new William D. Revelli Band Hall this year.

U-M To Appeal Tuition Decision

University of Michigan Regents have approved filing an appeal of the May 9 Washtenaw County Circuit Court ruling on U-M non-resident tuition.

The appeal will be taken to the appropriate Michigan court. The Circuit Court decision struck down the University's residence provision that permitted students to acquire in-state status by residing in Michigan for a six-month period while not enrolled as a student.

The U.S. Supreme Court is expected to rule soon in similar cases in other states.

Because of a stay of proceedings which will be issued by the Court, the effect of the Circuit Court judgment will be to delay the judgment's effect and actions taken as a result until final disposition of the case on appeal.

The May 9 decision did not declare invalid the practice of charging a higher tuition for non-residents of the state. It ruled invalid only a portion of the regulations classifying students as residents or non-residents.

If the ruling is not overturned, thousands of out-of-state students could establish residence at a cost of millions of dollars to the University, including rebates to those enrolling since March 1, 1972, filing date of a lawsuit by six out-of-state students.

Greg Wellman Receives Aid

continued from page 1

arrangements to attend some classes on a non-credit basis during the fall 1972 semester. After admission to U-M in January as a regular student, he received a grant from the U-M College of Literature, Science, and the Arts (LSA) Scholarship Program and a loan from the Office of Student Financial Aid during the winter term.

Greg's mother Mary Ann is enrolled in the University's General Studies Program and she and Greg commute to Ann Arbor.

On April 24 Smith said, "The fact is that The University of Michigan has aid, both in the form of outright gifts for merit and high performance and aid in the form of gifts, loans, and work-study, based on need. All of the free gift money based upon performance or merit is competitive. In recent years the University has turned more and more of its aid resources into awards based upon need."

Smith previously indicated the U-M will have 6,000 or 7,000 undergraduate students whose financial aid analyses will indicate some degree of need next year.

"The fact is," he said, "that in a selective institution such as this, there is nothing inconsistent between a 'need' program and a 'merit' program. Most merit students, as in this case, have financial needs to permit them to be in school."

Summer Intern Program in Washington Provides Valuable Experience for Many

Imagine idealistic and energetic students, and University President Robben W. Fleming all in the same room discussing political affairs for a couple of hours. A potentially dangerous situation? Not at all. At the recent reception which President Fleming sponsored for people involved with the University's Summer Intern Program in Washington, this group had a most animated and friendly give-and-take dialogue.

Michigan's Summer Intern Program in Washington, in which students work in the nation's capital and learn first-hand how the government functions, is unique and exciting. From the standpoint of a former intern, the program provides undergraduates with what is probably the most constructive and lively experience they will have in college. In many ways, Michigan's program is also the best of its kind in the nation.

The program was created in 1970 by students Mike Posner and Betsy Levine, who believed that it would be invaluable for students

The author of this special report is Steve Marshall who served his Washington Internship with The Task Force on Drug Abuse, an independent public-interest group investigating the abuse of mood-altering drugs. Steve temporarily left college to continue his internship with the Task Force. Presently, he is on the staff of the University's Development Office, and plans to return to the University this fall to complete the B.A. degree.

to spend a summer in Washington, D.C., working in one of many possible positions.

With an enormous amount of work, and support from the University's administration and Alumni Association, the Intern Program became a reality.

By the end of this summer, almost 200 students will have served as interns in Washington. The program has provided financial aid for about half of the interns, since few of the Washington employers provide salaries and the cost of a summer in Washington is great. The program's ability to provide this support means the interns are selected solely on the basis of qualifications and not on their economic status.

The quality of jobs that the interns have held has been exceptionally high. Many have worked for senators and representatives from all parts of the United

States. Some have worked for executive agencies. (One intern ran her own project in the Department of Housing and Urban Development.) The media, such as *The New York Times*, have employed interns. Others have worked for public interest and lobby groups. Several students have obtained full-time jobs as a direct result of the program.

The Summer Intern Program in Washington is a great source of pride to all those who have been associated with it. That The University of Michigan has cultivated and encouraged this unusual program is a testimony to its excellence.

RECEPTION—President and Mrs. Fleming greet student interns and program administrators at the reception which the Flemings recently sponsored for the Summer Intern Program in Washington.

Alumni Association Expands Summer Camping Program

The Alumni Association's summer camp program for U-M families becomes more popular each year. A fourth location, Camp Michigan—East in the Berkshires at Becket, near Tanglewood, Mass., has been added this season.

The original, Camp Michigan, at Walloon Lake, is in its 11th year; Camp Michigan—West in

the High Sierra Mountains is operating for the fourth season; and Camp Michigan—Europe at Montana, Switzerland, held in conjunction with an Alumni Association tour, will be open for the second season.

The camping program is under the direction of William Stegath, director of field activities for the Alumni Association.

Diagonalis et Circumferentia

□ The new chamber music recital hall in the Frederick Stearns Building, a unit of the School of Music, has been named the Cady Music Room in honor of Calvin B. Cady. Cady was the first director of the music school when it opened in 1880. The hall, seating 75, is used by solo and small chamber ensemble performances.

□ Dan Farrell, former Michigan Tech star and for the past five years its assistant hockey coach, has been named to succeed Al Renfrew as head coach of Michigan hockey. Renfrew will become athletic ticket manager when Don Weir retires this summer. During Renfrew's 16 seasons, Michigan won five Big Ten titles and the national championship in 1964.

□ Prof. Roger C. Cramton will become dean of the Cornell University Law School July 1. He has been on leave from the U-M Law School serving with the U. S. Justice Department and more recently as a consultant to the American Bar Foundation for a series of studies on legal education in the U. S. Cramton is the ninth U-M law professor to become a law dean in the past ten years.

□ Faculty members of the U-M School of Dentistry, following extensive research and stringent testing, have developed an inexpensive new mouthguard for participants in contact sports. The fitted plastic covering, hardly noticeable when worn, not only

protects the teeth but prevents concussions by stopping the transmission of force through the jaw and skull. The mouthguards, custom-made from a cast of the upper teeth, are worn by U-M squad members and players in the Ann Arbor public schools.

□ The University of Michigan Choir of 150 voices, together with the Detroit Symphony Orchestra, will appear in New York's Carnegie Hall October 30 in a presentation of Carl Orff's "Carmina Burana."

SIXTY-FIFTH ANNIVERSARY—Oliver J. Todd of Palo Alto, Cal., a 1908 U-M alumnus, returned to the campus for commencement week activities during which he received the Distinguished Alumnus Award of the College of Engineering. Called China's "River Tamer," Mr. Todd had a notable engineering career in that country.

Michigan Football 73

SEPT. 15 Iowa
22 STANFORD
29 NAVY

OCT. 6 OREGON
13 Michigan State
20 WISCONSIN hc
27 Minnesota

NOV. 3 INDIANA
10 ILLINOIS
17 Purdue
24 OHIO STATE

Michigan's 1973 football schedule calls for games with two Pacific Eight teams, Navy, and all Big Ten rivals except Northwestern.

The Wolverines will have a chance to atone for their last-minute loss to Stanford in the 1972 Rose Bowl when the Cardinals appear in Michigan Stadium on September 22.

Coaching changes in the Big Ten may prove interesting. Should Michigan prepare for Purdue now as it did for Northwestern? Alex Agase, formerly at Evanston, now directs the Boilermakers. The Wildcats, whom the Wolverines do not meet, are coached by John Pont, formerly at Indiana, which now has Lee Corso up from Louisville as head man.

the Vital Margin

Annual-Giving Fund Reports Another Record-Setting Year

Gifts totaling \$4,709,296 were received by The University of Michigan Annual-Giving Fund during 1972 according to a report issued by Michael Radock, Vice President for University Relations and Development. This is an all-time high in response from alumni and friends of the University.

Several large bequests contributed to the total, which was an increase of 46 per cent over the \$3,209,089 in gifts received the previous year. The number of donors in 1972 reached 34,174, also a record high. Contributions for undesignated use showed a slight increase. During the most recent 10 years, the total received by the fund amounted to \$20,900,000.

Nationally, an estimated record total of \$2.02 billion was contributed by private sources to American colleges and universities last year, also a record high. This reflects an 8.6 per cent gain, as reported by the Council for Financial Aid to Education and based on a survey it conducts annually.

Annual Meeting

The 12th annual meeting of the Presidents Club will be held on the campus Friday and Saturday, September 21-22. The program will conclude with the Michigan-Stanford football game. Some 400 were in attendance last year.

Spaulding Gift Aids Students

Student scholarships and loans, an increasing concern of the administration, have been significantly augmented in the past and will be enhanced materially in the future through the generosity of the late Col. Thomas M. Spaulding and the late Mrs. Spaulding.

The Stephen Davis Tucker Memorial Fund, which is valued at \$1,013,026, is to receive an additional \$1,780,000 from the estate. Also for scholarship use is the Stephen Spaulding Scholarship Fund of \$7,804. A third fund, the Stephen Spaulding Memorial, for use by the libraries, is valued at \$20,694.

Col. Spaulding, U.S. Army, retired, died April 10, at the age of 91. He was graduated from The University of Michigan and later from West Point. He also received an honorary doctorate from the U-M. Mrs. Spaulding, the former Florence Tucker, died in 1967, and their son Stephen died during his junior year in college.

Included are donations from alumni, foundations, corporations, and other voluntary sources. The American business community gave \$223.2 million, its largest contribution ever.

The University of Michigan ranked third among public universities, behind California (university system) and Texas (university system), in the amount of private money received last year. The U-M ranked twelfth among all institutions after being in the top ten for several years. The Massachusetts Institute of Technology, the University of Chicago, and Michigan were replaced in the top ten by New York University, Cornell, and Princeton.

There's No Easier Way To Double Your Money

Your generous gift to The University of Michigan will be doubled if your employer is a participant in the extensive Matching Gift programs so prevalent across the nation. Listed below are the companies that matched employees gifts to the University last year. Thousands of dollars are lost to Michigan, however, because donors forget to include a matching gift form with their contributions. Please request the proper form from your employer. There is no easier way to double your gift, and the University will appreciate your thoughtfulness.
