

Flavoenzymes Involved in Pyrimidine Oxidation and Reduction

by

Lance W. Rider

A dissertation submitted in partial fulfillment
of the requirements for the degree of
Doctor of Philosophy
(Biological Chemistry)
in The University of Michigan
2009

Doctoral Committee:

Assistant Professor Bruce A. Palfey, Chair
Professor David P. Ballou
Professor Erik R.P. Zuiderweg
Associate Professor George A. Garcia
Assistant Professor Patrick J. O'Brien

To all those who've helped me.

Acknowledgements

I am indebted to a huge number of different people and cannot rightfully thank them all, and would not presume to do so in a mere few words. Without names I would like to thank all those whom have been my friends, my teachers, my confidants, and my monetary backers. All have been vitally necessary for the continuation and completion of this work.

Table of Contents

Dedication.....	ii
Acknowledgements.....	iii
List of Figures.....	vii
List of Tables.....	xi
Chapter	
1. Chemistry On the Pyrimidine Ring	
Introduction.....	1
Biosynthetic Origin.....	2
Catabolism.....	5
Ring Formation and Breakdown.....	6
Functional Group Conversion.....	9
Oxidation and Reduction of the Pyrimidine Ring.....	14
Activation by Attack at Carbon 6.....	20
Conclusions.....	26
References.....	30
2. Kinetics of Dihydrouridine Synthase from <i>Saccharomyces cerevisiae</i>	
Introduction.....	39
Materials and Methods.....	42
Results.....	50
Discussion.....	63
Conclusions.....	68
References.....	69

3.	Kinetics of the Dihydrouridine Synthase from <i>Thermotoga maritima</i>	
	Introduction.....	72
	Materials and Methods.....	74
	Results.....	83
	Discussion.....	97
	Conclusions.....	100
	References.....	102
4.	Kinetics of the Dihydroorotate Dehydrogenase from <i>Enterococcus faecalis</i>	
	Introduction.....	104
	Materials and Methods.....	106
	Results.....	109
	Discussion.....	130
	Conclusions.....	137
	References.....	138
5.	Dynamics and Structure of the Class 1A Dihydroorotate Dehydrogenase from <i>Enterococcus faecalis</i>	
	Introduction.....	139
	Materials and Methods.....	142
	Results and Discussion.....	148
	Conclusions.....	162

	References.....	163
6.	Conclusions and Future Directions	
	General Conclusions.....	165
	Dihydrouridine Synthases.....	167
	Future Directions Dihydrouridine Synthases.....	170
	Dihydroorotate Dehydrogenases.....	171
	Future Directions Dihydroorotate Dehydrogenases.....	172
	References.....	175

List of Figures

Figure

1.1 Pyrimidine Biosynthesis.....	2
1.2 Pyrimidine Catabolism.....	5
1.3 Ring Opening and Closing Reactions.....	7
1.4 Amination of Position 2.....	10
1.5 Thiolation of Positions 2 and 4.....	11
1.6 Deamination of Cytosine.....	13
1.7 Oxidation and Reduction of Carbons 5 and 6.....	19
1.8 Nucleophilic Activation of Pyrimidines.....	21
2.1 DUS 2 Catalytic Cycle.....	50
2.2 DUS 2 Reduction by NADPH.....	51
2.3 Oxidation of DUS 2 by pre-tRNA ^{Leu}	54
2.4 Oxidation of DUS 2 by modified tRNA ^{Leu}	56
2.5 Oxidation of the C117A mutant by modified tRNA ^{Leu}	57
2.6 Identification of tRNAs bound to DUS 2.....	58
2.7 Ligand Binding to DUS 2.....	59
2.8 Reduction of DUS 2 with <i>E. coli</i> tRNA.....	60
3.1 NADPH Binding to Oxidized <i>T. maritima</i> DUS.....	83
3.2 Reduction with NADPH.....	85
3.3 tRNA co-purifies with <i>T. maritima</i> DUS.....	87

3.4 Identifying 4-Thiouridine in tRNA.....	88
3.5 Identification of tRNAs bound to <i>T. maritima</i> DUS.....	89
3.6 Binding of tRNA ^{Tyr} to <i>T. maritima</i> DUS.....	90
3.7 Oxidation of <i>T. maritima</i> DUS by tRNA ^{Tyr}	91
3.8 Reduction of <i>T. maritima</i> DUS with <i>E. coli</i> tRNA.....	93
3.9 <i>T. maritima</i> Dihydrouridine Synthase Active Site Bound with Bicine.....	95
3.10 Domain Interface Residues in the Proteolyzed <i>T. maritima</i> Structure.....	96
4.1 Binding to Orotate.....	110
4.2 Stoichiometry of Orotate Binding.....	111
4.3 Dependence of Orotate Binding on pH.....	112
4.4 Binding to DHO.....	113
4.5 Binding to Fumarate.....	114
4.6 Binding to Succinate.....	115
4.7 Binding to 3,5-Dihydroxybenzoate.....	116
4.8 Binding to 3,4-Dihydroxybenzoate.....	117
4.9 Indications of Half-Sites Reactivity.....	118
4.10 Reduction of Oxidized enzyme with Dihydroorotate.....	119
4.11 Orotate Release.....	120
4.12 Dependence of Reduction on pH.....	122
4.13 Dependence of DHO Binding on pH.....	123

4.14 Oxidation of Reduced Enzyme with Fumarate.....	124
4.15 Dependence of Oxidation on pH.....	125
4.16 Dependence of Fumarate Binding on pH.....	126
4.17 Steady State Kinetics (DHO).....	127
4.18 Steady State Kinetics (Fumarate).....	127
4.19 Enzyme-Monitored Turnover.....	128
4.20 Catalytic Scheme of <i>E. faecalis</i> DHOD.....	130
4.21 Ligand Induced Half-Sites Reactivity Scheme.....	132
4.22 Preexisting Asymmetry Half-Sites Reactivity Scheme.....	133
5.1 Half-Sites-Reactivity of <i>E. faecalis</i> DHOD.....	140
5.2 Crystal Structure of the <i>E. faecalis</i> DHOD with Orotate.....	149
5.3 Crystal Structure of the <i>E. faecalis</i> DHOD with 3,5-Dihydroxybenzoate.....	150
5.4 Crystal Structure of the <i>E. faecalis</i> DHOD with Dihydroorotate.....	151
5.5 Crystal Structure of the <i>E. faecalis</i> DHOD with 3,4-Dihydroxybenzoate.....	152
5.6 Crystal Structure of the <i>E. faecalis</i> DHOD with L-Malate.....	153
5.7 Loop Mobility.....	154
5.8 Crystal Packing.....	155
5.9 Effects of Ligands on <i>E. faecalis</i> Solution Structure.....	157
5.10 Effects of Ligands on Leucine Residues.....	158
5.11 Effects of Ligands on Valine Residues.....	158
5.12 Assigned Residues Mapped onto <i>E. faecalis</i> Crystal Structure.....	160

6.1 Comparison of Dihydroorotate Dehydrogenase and Dihydrouridine Synthase Active Sites.....	166
---	-----

List of Tables

Table

3.1 A Summary of Dissociation Constants and Rate Constants.....	89
4.1 Ligand Binding to <i>E. faecalis</i>	135
4.2 Rate Constants for Oxidants of <i>E. faecalis</i>	135
5.1 Crystal Structure Data and Refinement Statistics.....	146
5.2 Residues Assigned via NMR.....	160
