16. Abstract  <p>This report provides documentation for UMTRI's file of Trucks Involved in Fatal Accidents (TIFA), 2007, including distributions of the code values for each variable in the file. The 2007 TIFA file is a census of all medium and heavy trucks involved in a fatal accident in the United States. The TIFA database provides coverage of all medium and heavy trucks recorded in the Fatality Analysis Reporting System (FARS) file. TIFA combines vehicle, accident, and occupant records from FARS with information about the physical configuration and operating authority of the truck from the TIFA survey.</p>

## Acknowledgments

The data documented in this report are the product of the dedicated efforts of many people. The project originated under the direction of Ken Campbell and Oliver Carsten. Daniel Blower directs the project currently. Robert Allen, Robert Pichler, and many interviewers made the accuracy of the data a matter of personal pride. The project would not have been possible without the willing cooperation of thousands of truck owners, operators, and police officers across the country.

The TIFA survey is conducted by the Center for National Truck and Bus Statistics at the University of Michigan Transportation Research Institute with support from the Federal Motor Carrier Safety Administration. The National Highway Traffic Safety Administration's National Center for Statistics and Analysis and FARS analysts in the states provided assistance in acquiring police reports from the respective states. We are sincerely grateful for their efforts.

## INTRODUCTION

### Overview

This report documents the January 14, 2010 version of the Trucks Involved in Fatal Accidents (TIFA) 2007 dataset. The report summarizes all the information in the computerized data file. The 2007 TIFA file contains records for all the medium and heavy trucks that were involved in a fatal accident in all 50 of the United States and the District of Columbia during calendar year 2007. Trucks with a gross vehicle weight rating of 10,000 pounds or less, primarily pickups, are excluded as nonsample, as are emergency vehicles and other non-trucks. All the vehicles described are from Version 02Jul09 of the Fatality Analysis Reporting System (FARS) file for 2007 accidents, developed by the National Highway Traffic Safety Administration (NHTSA).

The 2007 TIFA file is a census file, which means there is one record for each of the 5,049 medium and heavy trucks involved in a fatal accident in 2007. The codebook presents frequencies for the FARS variables and the TIFA survey variables for the actual number of cases in the file.

Missing data rates for TIFA survey variables are generally low. The range of missing data values is illustrated by the following examples. Cab style (variable 1003) could not be determined for 29 (0.6%) of the 5,049 cases. Vehicle configuration (variable 1048) is unknown for only 12 (0.2%) cases. Gross vehicle weight rating (variable 1050) could not be determined for 53 (1.0%) cases and hours driving (variable 1062) is unknown for 1,200 (23.8%) cases.

Trucks that were not in-transport at the time of the crash are included in this codebook in the Vehicles Not In-Transport (VNIT) section. (The data for the VNIT section are kept in a separate data file.) While we have tried to make variable numbering consistent from year to year, we have no control over changes made to the FARS variables. Thus, variable numbers and code values in the 2007 TIFA file are not fully consistent with the files for 1980 through 2006. Accordingly, the 2007 codebook should not be used as a guide to the earlier datasets.

The dataset includes virtually all the variables from the public version of the FARS file: the accident variables, the vehicle variables (for the truck), and the occupant variables (for the driver of the truck). A few cases had no occupant record because the vehicle was not occupied at the time of the accident. These cases have been padded with the appropriate missing data codes. All variables are at the vehicle level; that is, there is one record for each truck involved. In addition to the variables from FARS (variables 1 through 363), there is a set of variables (numbers 1001 through 1112) that contains the information from the TIFA survey form. The bulk of this information is produced by telephone interviews with the driver, owner, or some other involved party. Some of this information is transcribed from police reports collected from the states.

While the FARS file includes much information on the accident environment and events, information on the vehicles involved, particularly trucks, is limited. Details about the physical configuration of the trucks involved are supplied by the TIFA survey. (The survey form is reproduced in the appendix of this codebook.) The TIFA survey collects a detailed physical description of the truck. These data include the cab style of the power unit; gross vehicle weight

rating and gross combination weight rating; trailer type, cargo body style and cargo type; and the company type and operating authority of the operator of the vehicle. The combination of the FARS accident level variables with the physical detail of the TIFA survey produces the most detailed account of fatal truck accidents available.

### Sources of Information

The first step in the acquisition of the data to supplement FARS was to obtain, from the states, copies of the police reports on all fatal accidents involving at least one truck. While the format of these reports varies considerably from state to state, they all include the identities of the owner and the driver of the vehicles involved (though some states remove this information) and a description, sometimes very brief, of what occurred. These police reports were subsequently used in identifying the appropriate respondent to contact and in checking responses for accuracy.

Information was collected primarily by telephone interviews. The person or company contacted was, when possible, the owner of the vehicle as listed in the police report. If no contact could be made with the owner, an attempt was made to reach the driver. If neither the owner nor the driver could be reached, as much information as possible was collected from other parties, such as the police officer who investigated the accident or the tow truck operator if the vehicle was towed from the scene. Finally, if no knowledgeable respondent could be found, as much information as possible was coded from the police report. For these cases, variable 1063, which documents whether an interview was conducted, is coded "no," and variable 1064, police report, is coded "yes."

Editors carefully checked each completed interview. All modifications to the survey responses received from an interview are indicated in variables 1066 through 1075. Imputations made by the editors to fill in missing data elements are also indicated there. The numbers coded in these variables are the question numbers on the interview form (see appendix). Thus a "17" in variable 1067 indicates that the second item corrected or derived for that particular case was the response to question 17 on the interview form. There is no particular pattern to the order in which such modifications are indicated. Derivations were made when the editor was able to deduce a piece of information to fill in something missing on the interview form. For example, the type of operating authority was sometimes deduced from the name of the vehicle's owner and their business type.

### Number of Cases

Version 02Jul09 of the 2007 FARS file lists 5,131 vehicles (excluding fire trucks) involved in fatal accidents in the United States, that were identified as possible medium or heavy trucks. However, some of the selected vehicles were subsequently found to be light, rather than medium or heavy, trucks, and twelve cases were buses. In particular, a number of vehicles coded by FARS as trucks turned out to be pickups, emergency vehicles, or other light vehicles. Also, vehicles that did not conform to the rules for inclusion in FARS were designated nonsample. These included vehicles parked off the roadway (e.g., on the shoulder) or legally parked at the side of the road, or cases in which the fatality occurred prior to the crash (e.g., heart attacks). Altogether 82 cases were determined to be nonsample. Subtracting those 82 from the FARS file total of 5,131 cases leaves 5,049, which is the number of trucks involved in fatal accidents in 2007.

### Format of Codebook

The main body of the codebook provides frequency distributions of all variables and code levels in the TIFA 2007 data file (Motor Vehicles In-Transport). The VNIT section of the codebook documents the additional set of Survey variables collected for Motor Vehicles Not In-Transport (226 cases). For each variable, the codebook provides information about the variable, name, format, and type. “Variable” (such as V19) is the name of the variable in the SAS data file. “Name” (e.g. Route Signing) is the descriptive title corresponding to the FARS or TIFA variable. “Format” refers to the name of the SAS format that provides labels for specific code levels of the variable. “Type” describes the storage type of the variable. Data are stored either as Numeric or Char (character) data. “Length” is the SAS storage length in bytes for the variable.

### Obtaining Information from the Dataset

This report provides counts and distributions of the code values for each variable in the file. These tabulations are useful for understanding the variables available in the file, the completeness of the data, and the number of cases with any specific code value.

Many research questions require more detailed cross-classification of the data. In general, different types of trucks are used differently. In comparing the accident experience of straight trucks with that of tractor–semitrailers, for example, one might wish to examine the distributions of trip type and carrier type. While this dataset is not made available to the public by UMTRI, the staff of the Center for National Truck and Bus Statistics at UMTRI will be pleased to make the appropriate runs for outside users. Requests for consultation on and analysis of the data are welcome and may be addressed to Daniel Blower at (734) 764–0248. Finally, while every effort has been made to check the accuracy of the data, the file may contain errors not yet detected.

The following list shows the code values given above grouped by collision type.

Noncollision Event

- 01 = Overturn/rollover
- 02 = Fire/explosion
- 03 = Immersion
- 04 = Gas inhalation
- 05 = Fell/jumped from vehicle
- 06 = Injured in vehicle (other than cargo/equipment loss or shift)
- 07 = Other non-collision
- 16 = Thrown or falling object
- 44 = Pavement surface irregularity (pothole, grooved, grates)
- 47 = Vehicle occupant struck or run over by own vehicle
- 51 = Jackknife (causing injury or damage)
- 60 = Cargo/equipment loss or shift (causing injury or damage)

## Collision with Motor Vehicle

*Collision Involving Motor Vehicles In-Transport*

12 = Motor vehicle in-transport on same roadway

13 = Motor vehicle in-transport on different roadway

54 = Motor vehicle in-transport strikes or is struck by cargo, persons, or objects set-in-motion from/by another motor vehicle in-transport

*Collision Involving Motor Vehicles Not In-Transport*

14 = Parked motor vehicle or motor vehicle stopped off roadway

45 = Working motor vehicle (construction, maintenance or utility vehicle only)

55 = Other not in-transport motor vehicle

## Collision with Object Not Fixed

08 = Pedestrian

09 = Pedalcycle

10 = Railway train

11 = Live animal

15 = Nonmotorist on personal conveyance

18 = Other object (not fixed)

49 = Ridden animal or animal-drawn conveyance

## Collision with Fixed Object

17 = Boulder

19 = Building

20 = Impact attenuator/crash cushion

21 = Bridge pier or abutment

22 = Bridge parapet end

23 = Bridge rail

24 = Guardrail face

25 = Concrete traffic barrier

26 = Other traffic barrier

27 = Highway/traffic sign post/sign

28 = Overhead sign support/sign

29 = Luminaire/light support

30 = Utility pole

31 = Other post, other pole or other supports

32 = Culvert

33 = Curb

34 = Ditch

35 = Embankment – earth

36 = Embankment – rock, stone or concrete

37 = Embankment – material type unknown

38 = Fence

39 = Wall

2	0.0	99	Unknown

The following list shows the code values given above grouped by collision type.

Noncollision Event

- 01 = Overturn/rollover
- 02 = Fire/explosion
- 03 = Immersion
- 04 = Gas inhalation
- 05 = Fell/jumped from vehicle
- 06 = Injured in vehicle (other than cargo/equipment loss or shift)
- 07 = Other non-collision
- 16 = Thrown or falling object
- 44 = Pavement surface irregularity (pothole, grooved, grates)
- 47 = Vehicle occupant struck or run over by own vehicle

- 51 = Jackknife (causing injury or damage)
- 60 = Cargo/equipment loss or shift (causing injury or damage)

Collision With Motor Vehicle

*Collision Involving Motor Vehicles In-Transport*

- 12 = Motor vehicle in-transport on same roadway
- 13 = Motor vehicle in-transport on different roadway
- 54 = Motor vehicle in-transport strikes or is struck by cargo, persons, or objects set-in-motion from/by another motor vehicle in-transport

*Collision Involving Motor Vehicles Not In-Transport*

- 14 = Parked motor vehicle or motor vehicle stopped off roadway
- 45 = Working motor vehicle (construction, maintenance or utility vehicle only)
- 55 = Other not in-transport motor vehicle

Collision with Object Not Fixed

- 08 = Pedestrian
- 09 = Pedalcycle
- 10 = Railway train
- 11 = Live animal
- 15 = Nonmotorist on personal conveyance
- 18 = Other object (not fixed)
- 49 = Ridden animal or animal-drawn conveyance

Collision with Fixed Object

- 17 = Boulder
- 19 = Building
- 20 = Impact attenuator/crash cushion
- 21 = Bridge pier or abutment
- 22 = Bridge parapet end
- 23 = Bridge rail
- 24 = Guardrail face
- 25 = Concrete traffic barrier
- 26 = Other traffic barrier
- 27 = Highway/traffic sign post/sign
- 28 = Overhead sign support/sign
- 29 = Luminaire/light support
- 30 = Utility pole
- 31 = Other post, other pole or other supports
- 32 = Culvert
- 33 = Curb
- 34 = Ditch
- 35 = Embankment – earth

VEHICLE USE

Owner Name \_\_\_\_\_

Owner's Business Type \_\_\_\_\_

17. Operating Authority at the Time of the Accident

Within twelve months before the accident, did any of your trucks carry goods interstate (across state lines)?

- Yes  1
- No  2
- Personal use only  5
- Govt. owned  6
- Daily rental  7

127

At the time of the accident, were you operating:

- Private (carry own goods)  1
- For hire (carry other people's goods)  2
- Personal use only  5
- Govt. owned  6
- Daily rental  7

128

18. ITS/Collision Avoidance Systems or Devices

- Speed limiter/governor
- Headway detection/forward crash warning
- Side/object detection
- Lane departure warning
- Rollover warning
- Electronic stability control
- Power unit tracking
- Trailer tracking

19. Intended One-Way Trip Distance

Local < 51 miles

1

Over-the-Road

51 to 100 miles

2

101 to 150 miles

3

151 to 200 miles

4

201 to 500 miles

5

Greater than 500 miles

6

Unknown over-the-road trip distance

7

137

20. How was the driver compensated for this trip?

Percent of gross trip revenue

1

By hour

2

By mile

3

By hour & mile

4

By load

5

Other \_\_\_\_\_
