

Assignment 2: Project sketch / concept piece.

This project asks you to sketch the concept, outline the design of, and/or build a 'democratic thing' – i.e. an object, system, process, installation, or performance that supports, extends, or reflects on democratic practice (of a deliberative, agonistic, pluralist, etc. sort). Your thing should come with: a one paragraph abstract; a description explaining the background and rationale of your thing, including a description of the democratic problem or limitation it is meant to address (4-5 pages double-spaced); and any supporting materials (sketches, photos, screenshots, models, etc.) you think useful to include. Teams of 2-3 are welcome but in no way required.
