(Received 14 February 1983; accepted for publication 18 February 1983)

On pages 112 and 113 the foil thicknesses were listed incorrectly. The foil thicknesses should read 19 and 38 μm. This lowers the estimates of $E_M$, $E_O$, and $\eta$ (page 113) by a factor of 2 for the thin foil and by a factor of 1.7 for the thick foil.
