PROVERBS AND PROVERBIAL ALLUSIONS IN HITTITE*

Gary Beckman, Yale University

The genius, wit, and spirit of a nation are discovered in its proverbs.

Francis Bacon

MESOPOTAMIAN proverbs have been discussed thoroughly by Edmund Gordon, W. G. Lambert, and Bendt Alster, but this speech genre has until now received scant attention from Hittitologists, possibly because of the scattered and uncertain nature of the relevant material in the Boğazköy archives. The term “proverb” itself is somewhat problematic—everyone knows what a proverb is, but students of proverbs have yet to agree upon a definition. Here I will simply state with Alster that proverbs are sayings of “popular currency which express common knowledge in brief and concise form.” For the scholar concerned with the texts of an extinct speech community, such as the Hittites, the chief difficulty lies in the determination of popular currency. In the absence of a folk among which to conduct research, there are four basic criteria by which to recognize proverbial material in a body of texts: (1) a saying is included in a collection; (2) a saying is explicitly cited as such; (3) a saying is found in the same shape in different texts, that is, it exhibits “bound form”; and (4) a saying, if interpreted literally, appears out of place in its context. For example, the English proverb “the leopard cannot change its spots” is most often employed in nonzoological discussions.

* In this instance, as so often, I have profited greatly from discussions with Professors H. G. Güterbock and Harry A. Hoffner, who also graciously allowed me to utilize the lexical resources of the Hittite Dictionary Project of the Oriental Institute of the University of Chicago. Professor Karla Taylor has been my guide to the literary-critical literature on proverbs, and Professors W. Randall Garr, Charles Carter, and Robert Falkowitz have made helpful comments. An earlier version of this paper was presented to the annual meeting of the American Oriental Society held in Seattle in March 1984.

Abbreviations used here are those listed in J. Friedrich and A. Kammenhuber, Hethitisches Wörterbuch, 2d ed. (Munich, 1975-), pp. 13–33.

2 H. Hoffner informs me that Albrecht Goetze delivered a paper on this topic to the annual meeting of the American Oriental Society in 1968. This work was unfortunately never published. See also the brief remarks of R. Werner, StBoT 4, 78.
4 Alster, Studies, p. 37.
5 Ibid., pp. 37 f.
Although the presence of trilingual Sumerian-Akkadian-Hittite tablets of “wisdom” character at Hattuša\(^6\) demonstrates that Hittite scribes were familiar with Mesopotamian proverb collections, we have uncovered no compendia of Hittite sayings. Thus the first criterion for proverb recognition fails us.

That the Hittites themselves were conscious of a genre of proverbs, however, is clear from a passage in the Prayer of Queen Puduḫepa to the Sun-Goddess of Arinna (CTH 384):

[1] Among humans one often speaks the proverb (memian)\(^7\) as follows: “A god is well disposed to a midwife.” I, Puduḫepa, am a midwife, (and since) I have devoted myself to your son, be well disposed to me, O Sun-Goddess of Arinna. my lady! Give to me what [I ask of you]; grant life to [Hattušili], your servant!\(^8\)

Thus Puduḫepa appeals to what “one often says among humans”—indicating a proverb according to the second criterion—in order to persuade the goddess to heed her plea.

It is probably the same queen who cites a further proverb in a letter to a son-in-law (CTH 180).\(^9\)

[2] Why does one speak [th]us: “The son-in-law whose wife has died remains in every sense a son-in-law”? You were my son-in-law, but you do not recognize [m]y relationship(?).\(^10\)

Here the quoted saying serves to underline the queen’s complaint about unfilial conduct.

\(^6\) CTH 315, 316, 814 (Akk. only). The first two compositions are also attested at Ugarit. H. Hoffner and H. Berman have identified \(KBo\) XII 128, assigned by \(E.\) LaRoche to \(CTH\) 389, as a probable Hittite column of a bilingual Akkadian-Hittite “wisdom” text (CTH 316). Hoffner’s collation, however, shows that it cannot be part of the same tablet as \(KBo\) XII 70 + \(KUB\) IV 3. On “wisdom” in general, see Excursus below.

\(^7\) This lexeme, whose basic sense is “utterance,” has a wide range of contextually defined meanings, as may be seen from a perusal of the passages quoted in \(CHD\) III, s.v. (forthcoming).

There can be little doubt that the two sayings already adduced are genuine proverbs, in fact the only definite examples known from Hittite texts. But we enter the realm of uncertainty when reduced to the final two criteria mentioned earlier, those of “bound form” and of disharmony with the literal context. First, the Hittite corpus is not so large that we have the luxury of accepting only sayings attested in similar form in two or more contexts as proverbs. Second, not all proverbs employ metaphor and thereby lift themselves from the literal, as shown by Puduñepa’s remarks on family responsibility. Finally, it is no simple matter to distinguish nonce usages of vivid or figurative language from traditional collocations, that is, proverbs.

We may skirt these difficulties and continue our inquiry by considering the situation of the creative literary individual in Hittite society. Since he did not address himself to a sophisticated audience eager for novelty, but rather to scribal colleagues educated in a system founded on instruction by rote copying, to illiterate princes via other scribes, or to the ever conservative divine world, his creativity naturally took the form of innovation with traditional material. That is, while an author of any period must set his own contribution within the generic and linguistic conventions of his society, thereby participating in the evolution of these forms, the degree to which the traditional dominates the individual is particularly great in the “cuneiform civilizations.”

Therefore, although we may be unable to determine with certainty whether a given expression of Hittite “common knowledge” is proverbial or an example of creativity, the water in either case is drawn from the same well, Hittite tradition.

I proceed, therefore, with a selection of passages which seem to contain proverbs, and no great harm will have been done if I am mistaken in this or that instance.

In his Arzawa treaties (CTH 68, etc.), Muršili II prefaces an admonition against hasty action upon idle gossip with the pessimistic comment that

[3] Since humanity is depraved, rumors constantly circulate.

An admonitory function is also served by the inclusion in the Instructions for Temple Personnel (CTH 264) of a bit of wisdom. Let those responsible for the property of the deity be tempted to appropriate something for themselves, they should bear in mind that

[4] The will of the gods is severe! It does not hasten to seize, but when it does seize, it does not let go again! (11)

12 Note the Hittite preference for addressing a deity in his or her “native” language, even when that language was no longer well understood by the Hittite worshipers, as in the case of Hattic and Palaeic in the empire period.
13 The anthropological literature on this subject is vast. For an introduction, see J. Goody, *The Domestication of the Savage Mind* (Cambridge, 1977), and idem, ed., *Literacy in Traditional Societies* (Cambridge, 1968).
14 Possible Hittite proverbial material identified by other writers but not treated here includes KBo 1 10 + KUB 111 72. 7–8 (S. Falkowitzi, *The Sumerian Rhetoric Collections* [forthcoming], sub comment on LC 3.17), KBo 111 1 rev. 8 f. (HW 2.108), KUB XIII 33 ii 12, KUB XIII 35 iv 19 f., KUB XI 88 iv 13 (all STBoT 4, 78), and KUB XI 1 rev. 1 (C. Kühne, “Bemerkungen zu kürzlich edierten hethitischen Texten,” *ZA* 62 [1972]: 237).
15 KBo V 13 iv 8 f.:
8. nam-ma an-iu-uš-aš-tar-ra ku-šu mar-la-aš-ša-an an-nu-šu A-WA-TE₄₄₃₅₆₇₈
9. kat-ta-an ṣid-da-a-š-kī-pu-zi

Cf. J. Friedrich, *SV* 1 134 f., and see CHD III 196 for a listing of parallel passages.

16 KUB XIII 4 ii 22 ff.:
22. DINGIR MES-aš-ma ZI[(I-an-za da-aš-su)]-yṣ₄₅₆₇₈ nu e-ip-pu-u-wa-an-zī UL nu-un-tar-nu-zī
23. e-ip-zi[(ma kwi-e-d)]-ṣa-ni me-e-ba-ni nu nam-ma ar-ṣa
24. UL tar-na-a₄
Apparent proverbs are among the elements of popular speech recorded in the “transcripts” of peculation inquests, which constitute a valuable source of late Hittite vernacular usage. Unable to account properly for animals in his charge, the official Ukkura admits to lax bookkeeping and carelessness but adds (CTH 293):

[5] This one disappears, and that one’s still here!18

That is, while confessing to a certain incompetence, this Hittite bureaucrat seeks to dispel suspicions of venality by employing a saying reminiscent of English “Now you see it, now you don’t,” and “Here today and gone tomorrow.” Comparable is a remark from a fragmentary inquest record (CTH 294):

[6] [Something] is on hand, (but) something (else) is not on hand.19

In a historical text from the Old Hittite period (CTH 13), the speaker, probably Ḥattušili I,20 makes use of a proverb:

[7] May [they take] away my teeth [. . .] with (the wood of) the apple(-tree), if I have mixed fat into the clay!21

The sense of this self-imprecation is admittedly obscure, but the appearance in three other contexts (KUB XXXV 145 rev. 18; KUB XLIV 4 + KBo XIII 241 rev. 28 f.; and 1308/u i 3 f.) of language identical to that of our apodosis makes it clear that traditional material is involved.22

Similarly, in prayers (CTH 378 and 381), Muršili II and Muwatalli appeal to divine compassion by means of the same ornithological observation:

[8] (When) a bird takes refuge in its nest,23 the nest preserves its life (var.; and it lives).24

The god should likewise be the salvation of his servant. The use of quite similar language by the two rulers in separate compositions again supports the interpretation of the imagery as proverbial.

Restorations are from KUB XIII 5 ii 30–32 and KUB XIII 6 ii 14–16: cf. E. Sturtevant and G. Bechtel, Chrest 152 f.

17 On this characteristic of these documents, see Werner, StBeT 4, 77–79.

18 KUB XIII 35 iv 45 f.: 45. . . . mar-ta-ri-wa-ra-at-kán
46. nu-wa-ra-at-kán a-ást
Lit., “It disappears and it remains.” See StBeT 4, 14 f., 19, and cf. Güterbock, Cor. ling 67.

19 KUB XI 88 iii 9:
[ku-ir-kit] I.GÁL ku-ir-kit-pá-n NU.1.GÁL
See StBeT 4, 22 f., 26 (utilized as Bo 4867).

21 KBo III 46 ii 12 f.: 12. [. . . mu-mu-kán(?)] ša-am-šu-wa-an-za pa-ku-tššma-us
13. [. . . du-an-dži(?)] ma-an wa-ar-kán û-li-ni-i an-da i-mi-e-nu-un
See Kempinski and Košak, pp. 89 and 92 f.

24 Muršili (CTH 378)—KUB XIV 8 rev. 22:
MUŠEN-ih-za-kán (tap-ta-ap-pa-an) EĞIR-qa e-ip-zi na-an (tap-ta-ap-pa-at hu-ur[i]-nu-zi)25
Muwatalli (CTH 381)—KUB VI 45 iii 40:
MUŠEN-za (tap-ta-ap-pa-an) EĞIR-qa e-ip-zi na-ašt T1-šš-zi26
and dupl. KUB VI 46 iv 9 f.:
A final example along these lines is from the Bilingual Edict of Ḫattušili I (CTH 6), where courtiers are enjoined:

[9a] Let your clan be [united] like that of the wetna-;\(^{25}\)

which is to be compared to, and mutually restored from, a passage in Ḫattušili's shorter edict (CTH 5):

[9b] Let [y]our clan, that of my servants, be united like that of the wolf\(^{26}\)

Although it is no longer held that wetna- is the Hittite reading of the Sumerogram \textit{UR.BAR.RA}, “wolf,”\(^{27}\) the term must nonetheless designate some beast. Therefore, we encounter here the same concept in the two passages, i.e., the body of the king’s followers should be as cohesive as a hunting group of carnivores.

Animal imagery such as this is frequently employed in Hittite texts, and in many instances it is seemingly proverbial. In the historical introduction to the Akkadian-language Sūnašūra Treaty (CTH 41), there is a discussion of the shifting allegiances of the land of Kizzuwatna. Once under Hittite domination, Kizzuwatna had gone over to the king of Mitanni, who boasted to his Hittite rival:

[10] Now, finally, the cattle have chosen their stable. They have definitely come to my country!

But upon recovery of this area, Šuppiluliuma could throw this back in the face of the Hurrian:

\textit{Now (the people of) Kizzuwatna are Hittite cattle and have chosen their stable}\(^{28}\)

More frequent than the quotation of a complete saying is the allusion to proverbial material, to widely held conceptions about the qualities, behavior, or origins of common objects, plants, and animals.\(^{29}\) In particular, the characteristic Hittite genre of analogic...
magic\textsuperscript{30} is based upon this store. A typical example (\textit{CTH} 395) includes these analogies:

[11] As a small (piece) escapes the grinding stone, may the offerant likewise escape the mouth of the god Agni; as the rear wheel does not catch up to the front, may the evil day likewise not catch up to the offerant!\textsuperscript{31}

From the Laws (\textit{CTH} 291) comes a probable reference to an animal proverb. In § 37 we read:

[12] If someone elopes with a woman, and a rescuer goes after them—if two or three men die, there is no legal compensation. “You have become a wolf!”\textsuperscript{32}

That is, through his crime the offender has set himself apart from the human community and its norms and sanctions.\textsuperscript{33} The exclamation is introduced here abruptly,\textsuperscript{34} without a verb of speech, as befits proverbial material according to the fourth criterion listed earlier.

An animal reference also appears in a complaint made by Ḫattušili III in an Akkadian-language letter to an Assyrian king (\textit{CTH} 173):

[13] Why do the men of Turiya snuff at(?) the gift of me, the lion\textsuperscript{35}

This allegation of ingratitude should be compared to the English saying “Don’t look a gift horse in the mouth.” While Goetze’s suggestion that this remark “alludes to a

\textsuperscript{30} See Goetze, \textit{Kleinasiens} 156–58, and also my comments in \textit{SIBoT} 29, 17 f.

\textsuperscript{31} \textit{KBo} VI 14 ii 20 ff.:

\textsuperscript{32} \textit{ARA}-za-kâni \textit{GIM-an} kap-pi-ši \textit{iš-pâr-ti-i-e-i-iz-zi}

\textsuperscript{33} \textit{EN.SISIKUR-kâni} \textit{A-ar-ni KA×U-za QA-TAM-MA iš-pâr-ti-id-du}

\textsuperscript{34} \textit{IGI-zi-an GIM-an} \textit{Bu-kir-i EGR-zi-ši an-da \textit{U-UL}}

\textsuperscript{35} \textit{u-e-mi-ya-zi i-da-ru-uš-ša UD.KAM-az}

\textsuperscript{36} \textit{EN.SISIKUR li-e KAR-zi}

\textsuperscript{37} Cf. Hoffner, \textit{Al.Heth} 134 f.

\textsuperscript{38} \textit{KBo} VI 2 + (see B. Hrozny, \textit{CH}, pl. 5, and cf. Güterbock, review of Friedrich, \textit{Die hethitischen Gesetze} [Leiden, 1959], \textit{JCS} 15 [1961]: 68) ii 10 ff.:

\textsuperscript{39} \textit{tak-ku \textit{SAL-na-an ku-ši-ki pit-ti-nu-uz-zi n(u-ši)-kâni} \textit{Sa-ar-di-i-eš a-ap-pa-an an-da pa-a-az-\textit{zi}}

\textsuperscript{40} \textit{tak-ku 3 LÜ.MEŠ na-ša-ma 2 LÜ.MEŠ \textit{a((k-kân-zi))} \textit{Sa-ar-ni-i-zu-\textit{li NU.GA-LI}}}

\textsuperscript{41} \textit{zi-i-k-\textit{wa UR.BARRA-aš ki-š-\textit{tu-aš}}}

\textsuperscript{42} H. Otten and V. Souček, \textit{SIBoT} 8, 94, read \textit{kûtu-\textit{eš}} at the end of the break in l. 10, which must be rejected both because the dupl. \textit{KBo} VI 3 ii 29 has \textit{[sa]-\textit{di}-y\textit{a-aš}} and because it is probably the shared usage of the word \textit{šardi} which accounts for the placement of § 38 after this paragraph—see already Souček, “Bemerkungen zur Schlußformel der hethitischen Gesetze,” \textit{ArOr} 29 (1961): 22, n. 121.

\textsuperscript{43} On the Indo-European background of the comparison of a human criminal to a wolf, see V. Ivanov, “On the Interpretation of the § 37 of the Hittite Laws in the Light of Other Indo-European Traditions,” \textit{Linguistica} 13 (1973): 102–10, and cf. also V. Korolec, “Einige Probleme zur Struktur der hethitischen Gesetze,” \textit{Acta Antiqua} 22 (1974): 297 with n. 34. Do obv. 17–23 of the poorly preserved \textit{KUB XLIII} 22 perhaps deal in greater detail with a case such as that described in Law § 37?

\textsuperscript{45} \textit{KBo} 14 obv. 18 f.:

\textsuperscript{46} \textit{Am-ni-ni a-na ya-ši UR.MAH}

\textsuperscript{47} LÜ.MEŠ [\textit{tu-u-ri-yu SUM-yu u-uz-za-nu-ni}]

The sense of the verb here is not certain. \textit{AHw.} 252 lists it as “unkl.” under the D-stem of \textit{ešu}, a form it renders as “beriechen, beschäumeln.” This interpretation informs my understanding of the passage. However, while \textit{CAD E} 345 does not cite \textit{KBo} 1 14, it translates \textit{usunu} as “to smell bad, to make (something) smell bad.” If this is the nuance intended by the Hittite scribe, Ḫattušili’s complaint is rather “Why do they find fault (lit.: cause to stink) my gift?”
popular tale about a lion and some contemptible animal may well be correct, it was a venerable tradition in Hatti to compare the monarch to the king of beasts.

A particularly interesting use of a proverb is contained in an incantation to chthonic deities (CTH 447):

[14] O Sun-Goddess of the Earth, the king and queen have now heaped up for themselves the Black Earth (i.e., dug a ritual pit). The materials of the ritual concerning (evil omen) birds, (namely) nine sheep, nine loaves, (and) nine libation jugs (are placed) on the right. Cook a favorable (lit.: the right) ear to them, O Sun-Goddess of the Earth, and receive this ritual with your right hand! And if it was a bird of evil (omen), you change it, O Sun-Goddess of the Earth! Render it nine times favorable! “The tongue is a bridge!”

Set out, O Sun-Goddess of the Earth! Make everything favorable; attend to it! If you do not attend to it, let the divine oath of this ritual proceed to seize you, O Sun-Goddess of the Earth!

In this instance the disharmony of the proverbial material with its context is particularly apparent. Nothing before or after the sentence “The tongue is a bridge” deals with human anatomy, with curses, or with architecture. Of the entire incantation, this sentence alone is provided with the quotative particle, thus setting it off explicitly. Here on the juncture between the request and the threat to the deity, the proverb affirms the power of the incantation to achieve the goals of the practitioner. The incantation, often referred to as a “tongue” in Hititite magic, is a bridge between the human and the divine world. The inevitable oral accompaniment to offering or manipulation of ritual equipment renders explicit the logic of the magic and leaves even the most recalcitrant deity no choice but to comply with the human request.

We can now see that the function of proverbial material in Hititite texts is identical to that of the analogic magic incantations in rituals. Just as this analogic magic ensures

---

36 Kizz 28, n. 1:3. No translation is offered.
37 The use of this imagery is quite frequent in historical texts of the Old Hititite period. To cite just one example, in his Bilingual Edict (KUB 1 I 16 ii 39—CTH 6), Hattushili I predicts of his successor: [DINGIR] I'm [EME-aš] pī-dī UR [MAH-aš] an-pāt ritansuzi(?)
The go[a]d [will install?] only a[a]ll[on] in the place of the lion.
39 KBo XI 10 iii 10 ff.: 10. [(tāk- n)] a-aš 4UTU-uš ku-a-ša LUGAL SAL LUGAL GE-iN KI-1n

18. na-at-te KI-aš 4UTU-uš i-ya-an-ti nu ḫu-u-
19. ma-an SIGs-in i-ya na-at-kān aš-nu-ut ma-a-na-eš-kān
20. Ū-UL-ša aš-nuši nu-ut-ta ă-š-d[u] ki-i ŠA SISKUR SISKUR
21. 51 ŠI-ES DINGIR UM tu-uk tāk-na-aš 4UTU-un e-š-du
Restorations are from KBo XI 72 + KBo XX 92 ii 47 ff., which has a few variants insignificant for our purposes. Cf. CHER 112 ("The tongue is a bridge."). CTHT 2, 21 ("und die Zunge (sei) Brücke."). And Otten, “‘Brücken’ im hethitischen Schrifttext,” Fb Bibel 434 ("Die Zunge (Rede) ist die Brücke."). The interpretation presented by HW 327—“Machte es (Opfer) zu einem 9x günstigen Vogel (der sagt) ‘Brücke der Zunge’ (sc. zu den Göttern)—is in my opinion forced. See Hoffner, review of Friederich and Kammenhuber, HW 3, Lieferungen 4 and 5 (Heidelberg, 1979–80). BlOr 40 (1983): 412.
41 See CHER 112-25.
42 Note that the denominal verb aramziy—"to bridge, überbrücken," could be used in a metaphorical sense; see HW 327.
that the action carried out on the physical level will find its equivalent in the realm of
nonhuman forces, so the citation of, or allusion to, a proverb mobilizes the authority of
Hittite tradition in the service of the rhetorical and social goals of the author. Indeed,
because this material was shared by all participants in Hittite culture, its citation is often
laconic, and its interpretation correspondingly difficult for the modern researcher.

I have restricted myself in this discussion to a few of the clearer examples of Hittite
proverbs and proverbial allusions. A great many more are available, particularly in the
incantations.

EXCURSUS

HITTITE “WISDOM LITERATURE”?  

This paper raises the question of whether the Hittites possessed a literary genre
comparable to the “wisdom literature” of the Old Testament. At the outset of his study
of Akkadian “wisdom” texts, Lambert admits the difficulty of employing this generic
classification in connection with a text corpus other than that to which it is native:

“Wisdom” is strictly a misnomer as applied to Babylonian literature. As used for a literary genre
the term belongs to Hebraic studies and is applied to Job, Proverbs, and Ecclesiastes. Here
“Wisdom” is a common topic and is exalted as the greatest virtue. While it embraces intellectual
ability the emphasis is more on pious living: the wise man fears the Lord.  

This theological position is of course absent from ancient Mesopotamia, but Lambert
nonetheless finds it useful to designate as “wisdom” those Akkadian literary works
younger in subject matter to the Hebrew wisdom books.

Since Yahwist piety informs no Hittite texts, may we follow Lambert in recognizing a
more general “wisdom” in Hittite analogues to Proverbs, Job, and Ecclesiastes? Such an
approach yields little: in regard to the first Hebrew book, I have already mentioned that
no collections of native Hittite proverbs are known. And although the Story of Appu
(CTH 360) is somewhat reminiscent of Job—both in the initial situation of its
protagonist and in its Märchen-like character—the similarities are superficial. Finally,
although both texts present advice to posterity from a wise and experienced ruler,  

42 On this genre in Mesopotamia, see most recently Sara Denning Bolle, “Wisdom in Akkadian Literature: Expression, Instruction, Dialogue” (Ph.D. diss., University of California, Los Angeles, 1982), in which extensive bibliography is presented. For an interesting application of genre theory to the comparative study of Mesopotamian and Israelite literature, see Tremper Longman III, “Fictional Akkadian Royal Autobiography: A Generic and Comparative Study” (Ph.D. diss., Yale University, 1983).

43 Edited by Siegelová, StBoT 14, 1–34.

45 The display of wisdom in a more general sense is limited largely to the Hittite king himself. In addition to the wise policies enunciated in the various royal edicts (CTH 5, 6, 19, etc.), note the contrast between the intelligent orders issued by the king and the bumbling efforts of his officers to carry them out in the Siege of Uru (CTH 7; see Güterbock, “Die historische Tradition und ihre literarische Gestaltung bei Babyloniers und Hethitern bis 1200,” ZA 44 [1936]: 130). The sole example known to me of a royal advisor is Pimpira/it, author of the Fürsten-
spiegel CTH 24 (latest edition by A. Archi, in F3Laroche 39–44), who was himself a member of the
royal house (see Archi, “L’Humanité des hittites,” F3Laroche 39, n. 20).
Bilingual Edict of Ḥattušili I (CTH 6)\(^4\) and Ecclesiastes differ radically in purpose and spirit. An examination of the vocabulary of “wisdom” offers a second approach. According to a standard Hebrew lexicon\(^4\) ḫkm, “wisdom,” may be more closely defined thus: “(1) skill in war; (2) wisdom in administration; (3) shrewdness; (4) prudence in religious affairs; (5) ethical and religious wisdom.” By far, the bulk of the attestations, and almost all of those occurring in the three wisdom books mentioned earlier, are assigned to meaning 5.

ḥattatar, the Hittite noun usually translated “wisdom,”\(^4\) is found most frequently in the divine epithet ḥannatas šEN/LUGAL, “lord/king of wisdom.” The god thus qualified is usually Ea\(^5\)—but in a single text Kumarbi\(^6\)—and the term is clearly a calque of the Akkadian bel nēmeqi(m).\(^7\)

ḥattatar is generally the possession of a deity. In the myths of the Kumarbi cycle we encounter the construction ḥa-GALGA-tar/ḥattatar štananzi piran/kattan da-; “to take ḥattatar into one’s mind.” For example:

Kumarbi takes ḥattatar into his mind, he who rears the (evil) day (and) the evil person. He (under)takes for himself evil against the Storm-God, and he rears a replacement\(^5\) for the Storm-God.\(^4\)

Since this text proceeds to detail the initial actions in Kumarbi’s scheme of revenge, a translation “plan of action, plot” is appropriate here.

Elsewhere ḥattatar is a quality dispensed by deities. The recipient might be another god, as in the prediction of a deity about to be born:

---

Old Testament prophets often speak out on contemporary problems in an attempt to correct the policies of the monarch. Such activity is not, however, attested for the Hittite \(^4\) ṭumiyant, “ecstatic prophet” (see Goette, “Die Pestgebete des Muršili,” KIF 1 [1927]: 233). Note only that the “men of the gods” (ši-ū-an-an an-ta-ub-li-ši), who may be the same group, bemoan the internecine bloodshed in the time of Telepinu (KBo III 1 i 32 f.—CTH 19).

\(^4\) Edited by Sommer and Falkenstein, HAB.

\(^6\) See HW\(^1\) 65: “Weisheit, Verstand, weiser Rat.” See the basic discussion of this word and its family, HAB 97–100.

\(^5\) E.g., KBo IV 1 i 32 f. = KUB 112 2 i 40.

\(^4\) KUB XXXIII 120 ii 5: ḫa-at-an-na-ak šar-tum-na-as [EN-ša], and iii 15: ḫa-at-a-an-na-ak šar-tum-na-ak EN-ša. This expanded form of the epithet, to be translated “lord of wisdom” (and) of the headwaters, contains a reference to the Apsu; see Laroche, “Études de toponymie antiquelle,” RHA 69 (1961): 79.

\(^5\) See CAD N 161 (v.1); and n. 66 below.

\(^3\) See H. M. Kümmer, SiBoT 3, 36 f.

I have included only those variants from the duplicate KUB XXXIII 96 i 5–8 which are relevant for the present discussion. (For a complete edition, see Güterbock, “The Song of Ulikummi,” JCS 5 [1951]: 146 f.) The interchange of preverbs in the duplicates suggests that the variation is merely stylistic. Other similar passages are KUB XXXIII 98 i 9–10 (dupl. KUB XXXIII 96 i 9–11); KUB XXXIII 101 + KBo XXVI 69 ii 6–8; KUB XXXIII 106 iv 25–26; KUB XXXIII 119; 113 and KUB XXXIII 113 + XXXIII 121 i 14–15. Since the reflexive particle is found in all cases where the text is preserved, it should be restored also (contra Güterbock’s transliteration, “The Song of Ulikummi (continued),” JCS 6 [1952]: 10) in the last passage cited.
The Earth will give me her strength; Heaven will [g]ive me his heroism; Anu will give me his manhood; Kumari will give me his bāttātār.\(^{55}\)

As an abstract term, comparable to "strength" and "heroism," bāttātār should mean something like "capacity to generate a plot."

A human might also receive bāttātār from a beneficent deity. The Prayer of Kantuzili (CTH 373) includes this praise:

Ever since I was born, I have experienced all of the compassion (and) bāttātār of my god.\(^{56}\)

In contrast, Muršili II reproaches the gods in one of his prayers (CTH 376) for withholding the same:

Your bāttātār has been cut off from humanity, so that the correct thing which we would do is nought.\(^{57}\)

Since this human incompetence is a consequence of the absence of divine bāttātār, the nuance of the word here must be "advice" or "guidance."

Only two texts present bāttātār on a strictly human level. Most important of these is the Bilingual Edict. Hattušili first instructs his subordinates:

But now [you who k]now my words and my bāttātār—make my son ibu. (battātārij),

and later he directly addresses his heir:

Let this [tablet] be read before you monthly, so that you will press my [words and my bāttātār to (your) heart].\(^{58}\)

In this document bāttātār seems to encompass both shades of meaning met thus far—the bāttātār of the old king is guidance for the younger, while Muršili's bāttātār must be his own skill in rule. Significant is the close connection of bāttātār with words, for guidance and instruction would have of necessity been imparted orally to most Hittites.\(^{59}\)

Of great interest is the Hittite translation of a lost Akkadian proverb.\(^{60}\)

---

\(^{55}\) KUB XXXIII 120 ii 8–9 (CTH 344):

8. KI-ziš-nu KAL-tar-še-it pa-a-i AN-ziš-nu
    ŠRAG-li-ya-tar-še-it [pa]-š-e
9. dU-nu-ta-su-AN ŠU-na-tar-še-it pa-a-i Ku-marbi-ta-su-AN b’a-at-ša-zi-tar pa-a-i

The remainder of this passage is too damaged to be of use here, but note also line 12: na-ak-ki-ya-tar-še-it b’a-at-ta-tar-še-it-ta pa-a-i, "will give his[?] power and his bāttātār." Cf. also KUB XXXIII 105 i 10 ff.

\(^{56}\) KUB XXX 10 obv. 11: ku-ziš-im-mu miš-ša-ta nu-Za-ta ŠA DINGIR-YA du-ud-Uš-mu b’a-at-ta-ta ŠU-ma-an-ta ša-ki-UN-un. Parallel is KUB XXXI 127 ii 27–28 (CTH 372). Since the object here is compound, it is uncertain whether this passage presents a unique plural form of bāttātār.

\(^{57}\) KUB XXXIV 3 ii 17–19 (CTH 376):

17. . . . na-ziš-[u A-NA DU MU.LU.LU\(^{(2)}\)]
18. b’a-at-ta-tar-šu-mi-it Šar-ak-{u} (nu ku-un-na-an ku-ui i-ta <u-ê-n>)]
19. na-AR NU.GĀL

Restorations are from KUB XXIV 4 obv. 8–9; see R. Lebrun, Hymnes et prières hittites (Louvain, 1980), p. 160.

\(^{58}\) KUB 16 ii 56–57:

57. [ku-i-eš ša] ak-te-ni nu DUMU-la-ma-an b’a-at-ta-ši-iš-ši-ki-te-en

Ibid. iii 56–58:

56. . . . nu ki-i
57. [up-pi] ITU-mi ITU-mi pi-ra-an-iti hul-zi-ši ša-an-du na-za-an
58. [ud-da-ša-ar-me-it b’a-at-ta-ta<ša-te>] me-it-ta kar-ta ši-iš-ši-it

See HAB f. and 14 f. The Akkadian correspondence of neither passage has been preserved.

\(^{59}\) Cf. also KUB XXXIII 101 + KBo XXVI 69: 7: GALGA(?)-tar me-iš-ši-ki-nu-un.

\(^{60}\) See n. 6 above.
Be quiet now and listen! Such matters as concern (lit.: are placed before) a mortai—research(!) them by means of your battatar! Maintain them by means of regulation! Know them by heart! Inquire into them by means of the assembly! Look them up on the wooden tablets!

Although battatar stands here at the head of the resources available to the mortal, nothing in the Hittite material suggests that it was the highest virtue. LÚ-natar, "manliness," and immaraatari, "strength," for example, are mentioned far more frequently, and battatar never appears among the boons requested on behalf of the royal family in the cult. Nor is battatar divinized.

In addition to the noun battatar, there exists a poorly attested adjective battant-, "characterized by ʰ₃," and a verb battalyë-, "to make ʰ₃," found only in the passage from the Bilingual Edict quoted above. Whatever the etymological connection between the family of words under consideration and the verb batta-, "to cut, hew," the participle of this latter word is identical in form to our battant-. Therefore, it is not always possible to distinguish the two words and/or meanings in broken or obscure contexts.

There are only three certain attestations of the adjective. Note first yet another translated proverb:

[Do not buy(!)] a meretricious(?) man! [Purchase(!)] a battant- companion!

and a similar passage from a myth:

Continually seek for yourself battant- men [... (?)]

---

61 This translation of araba ad(h) is only a suggestion. Elsewhere this combination is always employed in connection with looking out a window, excepting only KUB XXIV 7 iii 21, where a directional sense is none the less present; see Friedrich, ZA 49 (1950): 226 f.

62 See H. C. Melkert, "Ablative and Instrumental in Hittite" (Ph.D. dis., Harvard University, 1977), p. 406, for the possibility that several of the ablative in this passage indicate the source of the information sought.

63 C. Justus, Mat.heth. Thes 10/7 (1981): 54, translates karait sak- here simply as "learn." It is difficult to see how such an action in the present context could be "unintentional" as Justus claims for usages of sak- without -za (p. 1). With this usage, cf. karta (za-hi), on which see StBo T 29, 163 f.

64 KBo XII 128 rt. col. 6-14.

65 ḫu-uk-ku ka-ra-a-ass-en nu GESTUG-ten
7. nu DUMU.LŪ.UL.UL-zi ili ku-e INIM MEŠ-ar
8. pi-an GAM GAR-ri
9. na-ar-za-kān ḫa-ad-da-na-za
10. ar-ḥa a-us-ten
11. na-ar (i-ḥi-a-la-za ḫa[?]a]-ten
12. na-ar ŚA-ii še-ik-ten
13. na-ar tu-liya-ya pu-na-[u]š-ten
14. na-ar GĪ.ḪUR-za a-us-ten
66 See StBo T 29, 4, 11.

---

66 Note only ḫazziziz(zi) from Akk. ḫāṣīsu—"ear, understanding"). In Hurrian-influenced contexts, which Laroche, GLH 100, understands as a divinized attribute of Ea, corresponding to battatar.

67 Sommer and Feikenstein, HAB 100, suggest a connection with this verb, while J. Tischler, HEG 214 f. and 222, postulates a second, homonymous verb *ḥatta-, "denken, überlegen, klug sein," underlying battatar and its relatives.

68 Uncertain are ba-at-ta-an-te-es in KUB XXXIII 118 i(?) 26, and astawwa miwayya ba-at-ta-an-ta uis(du) in KBo XVII 105 iii 7-8. Hoffner has suggested to me that in view of the latter context—the referent is uis(?) in iii 6—we may be dealing here with an assimilated form of bandant- "pleasant."

69 See also KUB XXXIII 120 iii 38: ḫi-mi IG1.GAL-
-an-za-az.

70 KBo IV 3 + KBo XII 70 ii 33-35 (CTH 316):
33. me-is-ri-wa-en-da-an-za UN-an [li waši(?)
34. (blank)
35. a-ra-an-ar ḫa-ad-da-an-da-an [waši(?)

The Akkadian correspondence here is unclear. See Laroche, Uger V 781.

71 KBo XXVI 88 i 5-6 (CTH 346):
5. . . . na-za ḫa-at-ta-an-da-us UN, MEŠ-[uš-
(?)
6. [ṣu-an-ḥi-eš-ki . . . ]
Unclear, but certainly belonging here, is a line from the Tale of the Fisherman (CTH 363).  

The mind of the woman is *hantant*.  

These examples of the adjective confirm that the related *hattrat* is a positive attribute, but they add nothing to our understanding of this lexical family.  

In summary, we may define *hattrat* thus: “(1) a plan or plot (for oneself); (2) advice, guidance (for others); (3) the ability to generate 1 or 2.” Both the passages from the Bilingual Edict and several mythological contexts show that *hattrat* could be imparted by its possessor to another. Finally, *hattrat* is usually the possession of a deity or a human of high rank. Although “wisdom” is not inappropriate in some instances, the best single English translation would appear to be “cunning.”  

Comparing this result to the meanings of Hebrew *hkmh* adduced above, we see that *hattrat* might well encompass meanings 1–3. There is, however, no evidence that the Hittite word covered either meaning 4 or, more importantly, meaning 5. Thus it is best to avoid the term “wisdom” in discussions of Hittite intellectual categories and literary genres.

---

72 For the immediately preceding context see StBoT 29, 154.
