Biobanking: Honoring Donors’ Rights
Biobank Basics

• Collection of biological material and data
• Information available for research
• Have existed since the 1800s
• Registries and surveys prompted recent attention
Questions of Morality

- Consent procedures
- Confidentiality
- Research results
- Incidental findings
Consent Procedures

- Blanket consent
  - No restrictions on researchers
  - European preference and emerging trend
- Tailored consent
  - Choices about research types
  - American preference
Consent Procedures

- Blanket consent disadvantages
  - The more general, the less informed
  - Only broad descriptions about the purpose are available
Consent Procedures & Confidentiality

• Tailored consent advantages
  • Types of research
  • Uses of data
  • International sharing
  • Commercial partners
  • Link data to personal and medical information
  • Can re-contact donors
Research Results

- Normally published long after the study began
- Published in science journals
- Not always published
  - No value
  - Misleading information
Incidental Findings

• Individual research participant
• Potential health or reproductive importance
• Discovered in the course of conducting research
• Beyond the aims of study
Reduced level of social benefit in return for honoring rights of donors
