

Figure 3.11

a: View south into house VII.6.7 through the main entry, from the perspective of a person standing on *Vico di Modesto*, just north of the fountain at the south end of *insula VI.3* (to the right). The house suffered heavy damage from bombing in World War II. The niche shrine and almost the entire peristyle were destroyed.

b: The niche shrine on the rear wall of the peristyle in house VII.6.7, on the far right of the photo (the SW corner of the peristyle). Other than the area from the stairs eastward, only the base of the NE column and a portion of the back wall are preserved today. (AFS C359, courtesy of the Soprintendenza Archeologica di Pompei.)

c: View from the perspective of a person standing in front of the niche shrine. This perspective reveals the alignment of the niche with *Vico di Modesto*.

d: Plan of house VII.6.7.

Figure 3.12

a: View of the location of the shrine painting in bakery VI.3.3/27-28, on the wall between the water basin and work surface in the rear of the mill room. This view represents the perspective of a person standing on *Vico di Modesto*, looking west into the property. It is the only point at which the shrine is fully visible, and it is an awkward angle for wheeled traffic, which could only travel north. It is most accessible to a pedestrian who is approaching through the entry at No. 27.

c: Plan of bakery VI.3.3/27-28.

b: View into bakery VI.3.3/27-28 from the perspective of a person standing in *Vico di Modesto* just north of No. 27. The millstones obscure the view of the shrine from this angle.
