Abstract
Considering the cost of textbooks, we try to make e-textbooks available to students whenever possible. In Fall 2011 we provided 41 e-textbooks to 2072 students in 36 engineering classes (~8% of all engineering classes). Our survey sought to learn about student use and perceptions of the e-textbooks.

Method
Qualtrics survey with 21 questions asked about:
• Demographics
• Awareness of e-textbook
• Students’ e-textbook experience
15% response rate (n=299)

Findings: Awareness Matters!
• 71% of students who were aware of the e-textbook used it.
• Students are more likely to use library copies of e-textbooks when they know there is a copy available.
• Students are about 51% more likely to use library electronic copies given the advanced notice.
• Providing students with information about the availability of electronic copies has the most significant impact on increasing student use of e-textbooks from the library.

Future Plans
• Publicize the e-textbooks more.
• Publicize them early.
• Work to provide links in course registration module and course management sites.
• Conduct focus groups to get more information.
