

**DOES WHERE WE LIVE MATTER? NEIGHBORHOOD CONTEXT AND
IMPLICATIONS FOR STRESS AND HEALTH.**

by

Allison Brenner

A dissertation submitted in partial fulfillment
of the requirements for the degree of
Doctor of Philosophy
(Health Behavior and Health Education)
in The University of Michigan
2012

Doctoral Committee:

Professor Marc A. Zimmerman, Chair
Professor Ana V. Diez Roux
Associate Professor Cleopatra Howard Caldwell
Assistant Professor Jose Arturo Bauermeister

ACKNOWLEDGEMENTS

I would first like to thank my advisor and chair, Dr. Marc Zimmerman, who has given me endless support from the day I arrived at the University of Michigan. Marc has helped me to realize my full potential as a researcher, writer and thinker, and I will forever be grateful for his tough love. I would also like to thank Dr. Jose Bauermeister for all of his assistance and patience as he guided me through many statistical challenges, and through my transition into an independent researcher. Thank you to Dr.'s Cleo Caldwell and Ana Diez-Roux for their support and feedback through the dissertation process.

Although I thoroughly enjoyed this journey, my friends and dissertation support group were integral to my success and sanity. Thank you dear friends, for always being right there behind me. Finally, I would like to thank my family. First, my parents Jay and Cheryl for a lifetime of love and motivation – you have always been my loudest cheering section. And thank you to Katie, my friend, partner and fiancé, for staying by my side through my successes and defeats, and being one of my biggest supporters. I would be remiss not to thank my dog Stella, for her blissful unawareness of my dissertation, which forced me to enjoy regular walks, regardless of my looming deadline.

TABLE OF CONTENTS

ACKNOWLEDGEMENTS	ii
LIST OF TABLES	iii
LIST OF FIGURES	iv
CHAPTER 1: Introduction and study rationale	1
CHAPTER 2: Neighborhood context and perceptions of stress over time: An ecological model of neighborhood stressors and intrapersonal and interpersonal resources and coping	22
CHAPTER 3: Stressful neighborhoods and health: The effect of living in disadvantaged neighborhoods on adolescent cortisol	78
CHAPTER 4: What is it about disadvantaged neighborhoods? Unraveling the mechanism through which neighborhood disadvantage affects health	137
CHAPTER 5: Discussion and implications	191

LIST OF TABLES

Table

2.1 Means (SD)/Frequency(%) of time varying predictors	64
2.2 Changes in perceived stress and time varying covariates and effect of neighborhood disadvantage on the stress trajectory	65
3.1 Sample description	118
3.2 Correlations between individual-level study variables	119
3.3 Individual and interpersonal (fixed) influences on baseline cortisol and cortisol reactivity	120
3.4 Individual, neighborhood, and cross-level effects on baseline cortisol and cortisol reactivity	121
4.1 Correlations among study variables	174
4.2 Standardized coefficients and error terms for measurement portion of final structural model	176

LIST OF FIGURES

Figure

1.1 Conceptual model for the dissertation	14
2.1 Neighborhood disadvantage and psychological stress model	66
2.2 Variation in socio-economic disadvantage across neighborhoods	67
2.3 Effect of neighborhood disadvantage on perceived stress trajectory	68
3.1 Biopsychosocial Model	123
3.2 Conceptual model for neighborhood disadvantage and cortisol	124
3.3 Baseline cortisol by coping and neighborhood vacancy	125
3.4 Cortisol reactivity by perceived stress and public assistance	126
4.1 Hypothesized structural model for neighborhood context, stress and health	177
4.2 Neighborhood measurement model	178
4.3 Structural model with path coefficients	179
4.4 Post-hoc (re-specified) structural model with path coefficients	180
