

Supporting Figure 5
Bender et al.

Supporting Figure 5. *DR5:GUS* in *pin6* mutant backgrounds. Significantly reduced auxin-dependent *DR5:GUS* signal was observed in the lateral nectaries of *pin6-1* and *pin6-2*, which is consistent with what was observed in *pin6* lines expressing *DR5:GFP* (Figure 6). Note: the particular *DR5:GUS/pin6-2* flower shown was missing median nectaries, which also occasionally occurs in wild-type flowers.
