## Preface

This volume contains the contributions of the speakers of an international conference in honor of Jerry Draayer's 70th birthday, entitled "Horizons of Innovative Theories, Experiments and Supercomputing in Nuclear Physics". The list of contributors includes not only international experts in these fields, but also many former collaborators, former graduate students, and former postdoctoral fellows of Jerry Draayer, stressing innovative theories such as special symmetries and supercomputing, both of particular interest to Jerry. The organizers of the conference intended to honor Jerry Draayer not only for his seminal contributions in these fields, but also for his administrative skills at departmental, university, national and international level.
