Figure 1. Additional backscattered electron images of lunar sample 15597 basalts showing the groundmass texture and pyroxene phenocrysts.
Figure 2. Additional backscattered electron images of 15597 pyroxene-hosted melt inclusions that are crystalline.
Figure 3. Additional backscattered electron images of 15597 pyroxene-hosted melt inclusions that are broken and/or have cracks.
Figure 4. Additional backscattered electron images of 15597 pyroxene-hosted melt inclusions that are glassy but too small.
Figure 5. Backscattered electron images of embayment in 15597 pyroxene phenocrysts.
