SEMI-STRUCTURED INTERVIEW/SURVEY QUESTIONS

FOR WOMEN IN GROUP ANC

The following questions are to be asked of the women from GANC participating in a focus group.

First say: Now we are ready to get started with the focus group. I will be the moderator today. We will be meeting for about 1 hour. We are going to use a tape recorder so we do not forget the important things you tell us. If you do not want to have your voice recorded, or you change your mind about participating, you can leave at any time.

This focus group is an interview that is conducted in a natural way, much like a discussion. In the focus group, people are free to give their views and opinions to the questions. I want to remind you that your comments are the research team only to learn more about the community and nothing you say will not be shared with others. Please keep the discussion confidential and do not share or discuss with anyone outside this group.

Thank you, Let's begin.

START THE TAPE RECORDER HERE!

1. Tell me how you felt about receiving information about pregnancy in a group.
2. What did you like best about receiving care in a group?
3. What did you like least about receiving care in a group?
4. Were there any additional topic you wish were included?
5. What suggestions do you have for improving the way Group ANC is offered
6. What do you find useful about the take action card booklet?
7. Any other suggestions, ideas or comments about group ANC
