UNIT 007

Level 1 5YR 3/3 dark reddish brown

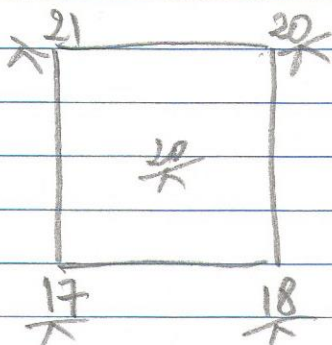

New unit is opened on the northern side of unit 005.

This is numbered as unit 007 located on a small flat area within the fenced boundary. Unit 007 is small 50x50m. The ground surface is not horizontal, but is little sloping in the N-S direction.

Level 001 of unit is a darkish sandy clay deposit directly under the ground surface, many grass roots and small rocks. There are few finds in this level which are very small in size and rounded. They represent secondary redeposits here.

Level 2

5YR 4/4 reddish brown. Some mid-size rocks in this level, together with roots. Moderate quantity of artifacts; small in size and rounded in shape. Redeposited material.
